AVAILABLE COURSES

Drawing & Self-Expression  
July 17-21, 9am-12pm (Art 463)
Drawing is a language that can transform a blank page into a new world. Drawing is also a skill that helps us express our imaginations, develop our ideas, and better understand the world around us through observation and translation. Shane Walsh, an accomplished artist and popular painting instructor at Peck School of the Arts, will guide students to work from observation and imagination to help them develop their skills and artistic voice.

Makin’ it Real!  
Turning 3D Ideas into Models and Proposals  
July 24-28 9am-12pm (Art B87)
This course is perfect for high school students interested in 3D, sculpture, architectural space and civic engagement. Nationally known public artist (and UWM Art instructor) Kathryn E. Martin leads aspiring artists and designers on the path from concept to proposal, turning ideas into drawings and scale models using a range of media and techniques. This intro level 3D course will help high students build confidence and gain photo-documented projects for college portfolios!

Do it Digital! Designing for Digital Art Making  
July 24-28 1pm-4pm (Kenilworth Studios)
Join Peck School of the Arts instructor Michael Dale Bernard (MDB) in UWM’s Digital Innovation Studio to create using digital technologies. Students will learn and apply 2D and 3D designing, printing, and vinyl cutting to their art making. Using Adobe Illustrator, TinkerCAD, and Fusion 360 they will design vinyl cut stickers, makerbot printed sculptures, and laser cut cardboard sculptures. This class is perfect for the high school student interested in working digitally for graphic design, sculpture, jewelry, metalsmithing and product design.

Take one, two, or all three of our available courses! You choose!
