2012 Wisconsin Youth Tobacco Survey
Other Tobacco Products Fact Sheet – Middle Schools

The Wisconsin Youth Tobacco Survey (YTS) is a comprehensive measure of youth awareness, attitudes, and behaviors related to tobacco use. The purpose of this survey is to monitor trends in these attitudes and behaviors to assist in improving youth programs and initiatives. The 2012 YTS was funded by the Wisconsin Department of Health Services, Tobacco Prevention and Control Program.

The middle school YTS is a school-based survey of students in grades 6 through 8, conducted every other spring semester of the academic year since the 1999-2000 school year. Fifty schools were randomly selected in 2012 to participate in the survey, followed by random selection of classrooms. All students in the selected classes were eligible to participate. The overall middle school response rate for the 2012 YTS was 72.94%. A total of 1,741 of the 2,005 sampled students completed the survey.

**Cigars**
- 7.2% of students have ever smoked cigars (Male=8.9%, Female=5.5%)
  (6th=4.4%, 7th=9.0%, 8th=8.4%)
- 1.6% of students currently smoke cigars (Male=1.8%, Female=1.4%)

**Pipes**
- 5.1% of students have ever smoked tobacco in a pipe (Male=5.7%, Female=4.5%)
  (6th=2.6%, 7th=5.2%, 8th=7.4%)
- 1.3% of students currently smoke tobacco in a pipe (Male=1.9%, Female=0.7%)

**Smokeless Tobacco**
- 5.0% of students have ever used smokeless tobacco (Male=7.0%, Female=2.8%)
