2014 Wisconsin Youth Tobacco Survey Fact Sheet – High School

The Wisconsin Youth Tobacco Survey (YTS) is a comprehensive measure of youth awareness, attitudes, and behaviors related to tobacco use. The purpose of this survey is to monitor trends in these attitudes and behaviors to assist in improving youth programs and initiatives. The 2014 YTS was funded by the Wisconsin Department of Health Services, Tobacco Prevention and Control Program. The high school Wisconsin YTS is a school-based survey of students in grades 9 through 12, conducted every other spring semester of the academic year since the 1999-2000 school year. Fifty schools were randomly selected in 2014 to participate in the survey, followed by the random selection of classrooms. All students in the selected classes were eligible to participate. The overall high school response rate for the 2014 YTS was 53.03%. A total of 1,236 of the 1,522 sampled students completed the survey. The data used in these analyses were unweighted.

**Prevalence**
- 42.9% of students have ever tried a tobacco product (9th=29.3%, 10th=35.8%, 11th=46.9%, 12th=62.0%)
- 30.1% of students have ever tried cigarettes (Male=35.1%, Female=25.2%)
- 20.0% of students currently use other tobacco products (Male=26.7%, Female=13.0%)
- 10.7% of students currently smoke cigarettes (Male=14.5%, Female=6.9%) (9th=5.7%, 10th=10.6%, 11th=11.1%, 12th=17.0%)
- 8.9% of students currently smoke cigars, cigarillos, or little cigars (Male=13.1%, Female=4.6%)
- 16.4% of students who have ever tried cigarettes first tried cigarette smoking before age 11
