Dive in to the Freshwater Sciences Professional Science Master’s program

$2000 SCHOLARSHIPS for FIRST YEAR PSM STUDENTS

The Professional Science Master’s degree is an interdisciplinary science program combining advanced scientific study in freshwater with management and communication skills. An internship with a water-related business, government or non-profit organization provides you with real-world experience, soft-skill and technical skill growth, professional connections, and mentoring from leaders in the field.

Provost PSM Scholarship requirements and conditions:

• All incoming PSM students will be considered for these competitive scholarships - no separate application is necessary
• Scholarships will be awarded based on academic achievement & potential
• You must be accepted for Spring 2016 or Fall 2016
• You must attend full time during the award period
• You must maintain a cumulative grade point average of at least 3.0
• The award will be disbursed over the first two semesters of enrollment in two equal installments of $1000/semester
