Internship Facts

- 544 hr. requirement
- Paid or volunteer
- Out-of-state options
- 12 credits
- Valuable hands-on learning
- Requires background check

How do I go about getting an internship?

1. Research internship sites of interest
   Student should consider type of clients/population served and fit with future career goals. Supervisor must have a degree in a related field and have held their current position for at least one year.

2. Contact the internship site(s)
   Find out if the agency can accept a student at that time. Discuss the nature of the internship and requirements. You may be asked to send a resume and then interview, especially for competitive sites.

3. Accept/Choose the internship
   Once you have found an internship, send a declaration letter including name and address of facility, start date, end date, supervisor contact info and student contact information to the KIN internship coordinator no later than six weeks prior to internship semester.
