

Continuing Education for *Healthcare Professionals*

COURSE DESCRIPTION:

Expand your treatment approach to provide more complete and efficient patient care. Integrating yoga into rehabilitation is effective treatment, especially for those patients who don't fall into the traditional treatment pathways.

You will learn the basics of therapeutic yoga which can be immediately integrated into your current practice to address neck, shoulder girdle, and upper extremity dysfunction. This lab-based continuing education course includes yoga breathing techniques and yoga pose progressions, with manual cues and partner work incorporated throughout. This course will emphasize postural reeducation of the neck and shoulder girdle, scapular stabilization, and thoracic spine and rib mobility. These techniques will be particularly useful for addressing neck pain and radicular symptoms, scapulothoracic pain, shoulder impingement, thoracic outlet syndrome, and overuse injuries of the elbow/wrist/hand. Evidence for the use of mind-body exercise will be presented. Practical application of the yoga techniques will be supported by specific case examples.

In addition to learning new skills to improve your patient outcomes, you may be pleasantly surprised by the effects of yoga practice on your own aches and pains!

LEARNING OUTCOMES:

- List the benefits of yoga as therapeutic exercise
- Describe the basic history of yoga and current popular types of yoga practice
- Summarize current evidence for the use of yoga as part of a rehabilitation program
- Describe how postural faults and stress patterns contribute to neck and upper extremity dysfunction
- Utilize yoga breathing techniques to increase neck, shoulder, and rib mobility and decrease stress
- Identify key muscle groups for breathing techniques and scapular stabilization
- Apply yoga preparatory exercises and poses for postural reeducation, thoracic spine and rib mobility, and scapular stabilization
- Create a practical yoga-based rehabilitation program for upper quarter dysfunction

AUDIENCE:

Physical Therapists and Physical Therapist Assistants, Occupational Therapists and Occupational Therapist Assistants, Athletic Trainers

Integrating Yoga into Rehabilitation of Upper Quarter Dysfunction

INSTRUCTOR:

Katy O'Leary, MPT, RYT, earned her Master of Physical Therapy degree at the University of Wisconsin-Madison. She is currently a practicing physical therapist in sports medicine at the University of Wisconsin Hospital Sports Rehabilitation Clinics in Madison. In addition, Katy is a 200-hour level Registered Yoga Teacher through the Yoga Alliance national organization. She completed her yoga teacher training in Alignment Yoga with a strong focus on therapeutic yoga techniques. She has been practicing yoga for over 15 years and has been teaching group classes and private therapeutic yoga lessons in the Madison area for 8 years. Katy incorporates yoga into rehabilitation as a holistic way to move towards improved function, and looks forward to the opportunity to share these successful techniques with you.

DATE: Thursday, October 5, 2017
 8:00 a.m. to 4:00 p.m.
