Repeat Policy

At the undergraduate level, if a course is repeated, only the highest grade earned will be counted in the official UWM grade point average.

Unless a restriction is stated in the Schedule of Classes, students may repeat any course once.

Under exceptional circumstances, one additional repeat (a third take of a course) may be allowed. Students must receive written permission from the chair of the department in which they wish to repeat a course. This statement should be taken to Holton Hall 142 for final approval. Mathematics and Math Stats are the exception to this rule. Students wishing to take any Mathematics or Math Stats course for a third time (second repeat) should fill-out the form in Holton 142.

For the purpose of repeats in Letters and Science, a course listed as “WR” is considered a take of the course. Courses that have been audited also count as a take. A course listed as “W” is not considered a take.

Transfer students may take a course at least once at UWM regardless of how many times the course was taken at their previous institution(s).

**Students may not repeat a course at another institution in an effort to improve a grade earned at UWM.**
