**Russian futurism, 1910-1916.**

Monochrome and color microfiche containing manifestos, collections of poetry, journals, and illustrations concerned with Russian art and literature for the years 1910-1916. The originals have never been gathered into a single public collection, so it was necessary to film private collections in England, France, and America. Some of the originals were made of highly perishable materials and will not tolerate handling by researchers. This film collection is the only source for these valuable primary materials.

1. Futurism (Literary movement)--Russia. 2. Russian poetry--20th century. 3. Art, Russian. 4. Russian literature--20th century.

Description from the Library of Congress
