The Master of Nursing (MN) prepares graduates for advanced generalist practice in culturally diverse urban communities at the point of care. Students complete undergraduate coursework initially leading to a BS in nursing, followed by graduate level courses leading to the master’s degree. This program provides the groundwork for practice as a Clinical Nurse Leader who functions independently and collaboratively to provide care for individuals, families, and populations at the microsystem level.

**Admission:** Fall, Spring and Summer.

**Application:** Please review the application materials online at www.nursing.uwm.edu

### Curriculum Plan

Students who have chosen the RN to MN program have a jump start on the Nursing Core Courses (9 credits) which are taken during the RN to BS program. Upon admission to the RN to MN program, students complete the remaining 24 required credits in the post-licensure MN curriculum, for a total of 33 graduate credits for the MN.

**Nursing Core Courses (Taken as electives in RN to BS curriculum)**
- Health Promotion Perspectives
