Section 1: General Information
Mission
The UW-Milwaukee Joseph J. Zilber School of Public Health (UWM’s Zilber SPH) conducts rigorous public health research and scholarship; educates the current and future public health workforce; and influences the development of strategies and policies that promote health among diverse populations.

Academic Programming
The Master of Public Health is designed to prepare students with the foundation necessary to build a career of leadership in public health. The MPH program has five specialty tracks – Biostatistics, Community and Behavioral Health Promotion, Environmental Health Sciences, Epidemiology, and Public Health Policy and Administration. Learn more about the Master of Public Health tracks online and in the first section of this handbook.

The PhD in Environmental Health Sciences offers graduate study leading to the doctoral degree. Faculty for this program are drawn from a number of departments and research units at UWM, affording the student an unparalleled opportunity for cross-disciplinary training and the performance of novel research projects. Laboratories and equipment are available across campus to promote innovative concepts in issues of Environmental Health Sciences.

The PhD in Public Health - Community and Behavioral Health Promotion is designed to train students in social and behavioral science aspects of public health research and intervention with a particular emphasis on the development of community-level interventions.

Future Academic Program Planning
The growing Joseph J. Zilber School of Public Health plans future PhD programs. Concentration areas may be Epidemiology, Data Sciences, Maternal and Child Health, or Public Health Policy.

**Administrative Structure**

The Zilber SPH Graduate Program Committee sets policies for the operations of all academic programming. The Graduate Program Committee oversees the MPH program with input from the full Zilber School faculty, the Zilber School Dean, the Associate Dean of Academic Affairs, and the Zilber School staff. Students elect two representatives to serve on the Graduate Program Committee, one PhD student and one MPH student. During Academic Year 2014-15, the Graduate Program Committee Chair is Paul Florsheim.

Amy Harley is the MPH Director, and Spencer Huang acts as the UWM Graduate Representative for all public health degree programs through Academic Year 2014-15.

Each track designates a Faculty Lead. During Academic Year 2014-15, designated Faculty Leads are as follows:

- Biostatistics – Paul Auer
- Community and Behavioral Health Promotion – Young Cho
- Environmental Health Sciences – Kurt Svoboda
- Epidemiology – Ruth Etzel
- Public Health Policy and Administration – Linnea Laestadius

George Henion leads the Faculty Support Office. He can be reached in ZSPH 368 or at henion@uwm.edu.
The Zilber School’s Student and Academic Affairs office is led by Interim Associate Dean of Academic Affairs Ron Perez. Staff consists of a Graduate Program Manager, Graduate Recruiter and Field Experience Coordinator, University Services Associate II, and Student Assistants as needed.

_Call or email Darcie if you have any questions about the programs, policies, or procedures in this handbook._

**Contact Information**

Darcie K.G. Warren, Graduate Program Manager  
ZSPH Building Room 521  
1240 N. 10th St.  
Milwaukee, WI 53205  
Phone: (414)227-3256  
Email: darcie@uwm.edu

Kathrine Barnes, Graduate Recruiter and Field Experience Coordinator  
ZSPH Building Room 597  
1240 N. 10th St.  
Milwaukee, WI 53205  
Phone: (414)227-3207  
Email: klbarnes@uwm.edu

University Services Associate II: Vacant
Financial Information: Tuition and Segregated Fees
Students in public health degree programs typically pay on-campus tuition rates. Credits taken per semester and student residency status determine the exact program cost.

</table>

The amounts listed on this fee schedule do not include any special course fees, distance education fees, or differential tuition that will be charged in addition to normal tuition. Online public health courses will incur an additional fee of $200.00. Consult the Schedule of Classes for a complete listing.

The mandatory/ segregated fee is a part of the total amount paid to the University by students taking credit classes on campus. These funds are earmarked for the support of certain student services. Students enrolling exclusively in audit or off-campus classes are not charged mandatory/ segregated fees and will not be able to use some campus facilities or obtain a University bus pass. If you fall into one of these categories for a semester but want full access to all campus facilities, you may pay an additional fee based on the number of credits taken. Contact the Cashier’s Office, Mitchell Hall room 285 or (414) 229-4914 for more information.
Financial Information: Text Books
Many public health classes will require the students purchase text books and other materials. Students can search the Schedule of Classes online at to view required textbooks. Class listings will include a syllabus, which outlines topics covered in class and associated readings.

Students may search for course text books at the UWM Bookstore online (http://www4.uwm.edu/collegeconnection/order-textbooks.cfm). Many books are for sale at the UWM Bookstore on the Kenwood campus student union.

Students may also purchase text books from other vendors, but students choosing to do this will want to check with the course instructor listed on the Schedule of Classes to ensure they order the correct edition of required books. Any question about assigned text books, readings, and assignments should be directed to the course instructor.

Some Faculty post readings on d2L, UWM’s web-based course management system.

Note that many scholarly journals are available for UWM students to download articles for free. Students can access these journals on the UWM Libraries website. You can search by topic, author, title, etc.
Financial Information: Applying for Loans

All students are strongly encouraged to apply for financial aid every year. The first step in the process includes filling out the Free Application for Federal Student Aid (FAFSA). This should be done online at www.fafsa.gov.

Please note that March 1st is the priority filing date for enrollment that begins the following fall. However, many funds are limited, so you are encouraged to file as soon after January 1st as possible. Note that the Zilber SPH deadline for most other funding opportunities – assistantships, fellowships, and scholarships – is January 15th, 2015.

Once the priority filing date has passed, you are still encouraged to apply for aid. As long as you are still enrolled in classes or the enrollment period has not begun, you will be offered aid from the programs that have funding remaining at the time your file is reviewed. The final date to submit a FAFSA is actually June 30th AFTER the academic year is over. (i.e., June 30, 2015 for the 2014-2015 Academic Year.) However, a student must still be enrolled in classes in order for financial aid be offered and any loans must be certified by that date as well. The entire process can take 6-10 weeks.

Visit http://www4.uwm.edu/financialaid/ for more information.
Financial Information: Assistantships, Fellowships and Scholarships

In order to apply for ANY AND ALL FUNDING OPPORTUNITIES other than loans, you must complete all parts of the Application for Financial Support (Appendix H).

To apply, email darcie@uwm.edu one pdf by 11:59 p.m. on January 5th that includes:

- Completed Application for Financial Support
- CV/Resume
- Unofficial transcripts (see application for directions to print transcripts)
- Essay responses (3 pages total)
  1. What are your career goals? Be specific in how your goals demonstrate a commitment to social and environmental justice.
  2. What unique or unusual circumstances set you apart? (include if you are a low-income and/or first generation college student)
  3. What are the strengths of your academic career to date?

Note that students renewing an existing scholarship award, such as the Stein or Zilber scholarships, and those who are funded as RAs on faculty grants must turn in the application cover page only, noting what funding they expect. Turning in the supplemental materials is not necessary for students who have promised funding, unless the student wants to apply for additional funding.

Students will receive a confirmation email on or before January 6th. If no email confirmation is received, send the email again. Forward the original email to prove you sent it by the deadline.

Financial Information: Assistantships

Visit the Graduate School’s website at http://www.graduateschool.uwm.edu/faculty-staff/administrative-financial/assistantships/ for complete information about assistantship funding, policies, and procedures. The Zilber SPH offers some assistantship support. Assistantships are typically awarded to doctoral students through a competitive application process. To apply for the following Academic Year, return a completed Funding Application to darcie@uwm.edu. Apply by January 15th for consideration.

Teaching Assistants

The title Teaching Assistant is used for graduate students enrolled in the University of Wisconsin System who are regularly assigned teaching and related responsibilities (other than manual or clerical responsibilities) under the supervision of a member of the faculty.

The UWM International Teaching Assistant Assessment (MITAA) is a requirement for some international teaching assistants who are non-native speakers of English and who will be assigned
classroom duties as part of a graduate teaching assistantship. A Department representative must be available to participate in the assessment. There is no charge for the MITAA.

Program Assistants & Project Assistants

“Program assistant” or “project assistant” means a graduate student enrolled in the University of Wisconsin System who is assigned to conduct training, administrative responsibilities or other academic or academic support projects or programs, except regular preparation of instructional materials for courses or manual or clerical assignments, under the supervision of a member of the faculty or academic staff, primarily for the benefit of the University, faculty or academic staff supervisor or a granting agency.

Research Assistants

“Research assistant” means a graduate student enrolled in the University of Wisconsin System who is assigned to conduct research that is for the benefit of the student’s own learning and research and for the benefit of the University, faculty or academic staff supervisor or granting agency. This title does not include students provided fellowships, scholarships, or traineeships which are distributed through other titles such as advanced opportunity fellow, fellow, scholar, or trainee.

Financial Information: Fellowships

The Graduate School currently offers three types of fellowships for full-time study, each with a monthly stipend for the academic year, coverage of in-state tuition and remission of out-of-state tuition (for students who are not residents of the State of Wisconsin), and eligibility for state-sponsored health insurance. To apply for any of the fellowships, you must complete the fellowship application online in addition to the complete Application for Financial Support process described above. These fellowship applications will require you to duplicate some of the supplemental materials, and they include letters of recommendation. Enter online your letter writers’ names and emails, and instruct them to email their letters to me. If I don’t receive them by the January 5th deadline, I will email them to request they send the letter. We must receive all letters of recommendation by January 15th for your application for the fellowship(s) to be considered complete.

See the Zilber School of Public Health Procedure for UW-Milwaukee Graduate Student Fellowships in the Policies and Procedures section of this Handbook for more information about the application and selection process. Note: Graduate School fellowship stipends count as financial aid.
The **Distinguished Graduate Student Fellowship (DGSF)** for new and continuing UWM graduate students. The DGSF is a one-year, non-renewable fellowship. The academic-year stipend for 2014-2015 is $15,000. In addition, Fellowship recipients will benefit from a $1,000 travel award that will accompany each fellowship award. The money should be spent in accordance with UWM travel regulations by the end of the fiscal year following the year in which the fellowship award is held. The money will be spent on travel to present at a major national or international conference in the student's discipline. The DGSF is not open to doctoral students who will achieve dissertator status by the application deadline for the award.

The **Distinguished Dissertation Fellowship (DDF)** for current UWM PhD students who have either achieved dissertator status or will achieve dissertator status during the award year. The DDF is a one-year, non-renewable fellowship. The academic-year fellowship stipend for 2014-2015 is $16,500. In addition, recipients will benefit from a $1,000 travel award that will accompany each fellowship award.

The **Advanced Opportunity Program (AOP) Fellowship** for new and continuing qualified UWM graduate students who are:

- Members of groups underrepresented in graduate study.
- First-generation college graduates who were eligible for Pell Grants or considered "high financial need."
- Students with disabilities.

**Procedure for UWM Graduate Student Fellowships**

*Approved by the Graduate Program Committee 2/25/2014*

Graduate students have the opportunity to submit applications for three fellowships through the UWM Graduate School:

- The Distinguished Graduate Student Fellowship
- The Distinguished Dissertation Fellowship (PhD students only)
- The Advanced Opportunity Program Fellowship

These fellowships are designed to support excellent students while they complete their graduate studies and develop their professional or research portfolio. This procedure is to describe the steps involved the application process.
1. In early Fall of each academic year, the Graduate Program Manager will send a notice to all graduate students at the Zilber School informing them of the three fellowship opportunities.

2. A student who is interested in applying for any of these fellowships must visit the Graduate School’s website and read the application instructions, paying attention to the eligibility requirements and the need for letters of recommendation. [http://graduateschool.uwm.edu/students/financial-support/fellowships/](http://graduateschool.uwm.edu/students/financial-support/fellowships/)

3. A student who wishes to apply must complete the application by January 15, 2015 so that the Fellowship Selection Subcommittee can review all applications and forward the most qualified applications to the Graduate School for consideration.

4. A student must submit the completed Application for Financial Support, including all supplemental materials in one pdf, by January 15, 2015.
   - Completed Application for Financial Support
   - CV/Resume
   - Unofficial transcripts (see application for directions to print transcripts)
   - Essay responses to below questions (3 pages total; about 250 words per question)
     1. What are your career goals? Be specific in how your goals demonstrate a commitment to social and environmental justice.
     2. What unique or unusual circumstances set you apart? (include if you are a low-income and/or first generation college student)
     3. What are the strengths of your academic career to date?

The Fellowship Selection Subcommittee will recommend up to the number of students allowable by the Graduate School each year for the Advanced Opportunity Program Fellowship, the Distinguished Graduate Student Fellowship, and the Distinguished Dissertation Fellowship.

The Fellowship Selection Subcommittee will consider all materials in the comprehensive package of materials submitted and will review each application “holistically”. The subcommittee will base their recommendations on the following factors:

- Grades in graduate school and completion of coursework needed to successfully achieve fellowship goals/proposed project
- Quality of statements required (quality of the writing and depth of experience)
- Quality of research and/or practice experience evident in prior and current activities
- Community service and/or University service activities
• Quality of Letter(s) of Recommendation received by the application due date

5. Students who are on academic probation are not eligible to apply for the fellowships.

6. The Zilber School of Public Health nominations (and accompanying letters) are sent to the Graduate School by their established deadline.

7. The Zilber School GPC Chair will inform students whether their application(s) have been recommended to be forwarded to the Graduate school. These nominations (and accompanying letters) are due to the Graduate School in early February.

8. The Graduate School will notify students of their application outcome in mid-March, 2015.

Financial Information: Scholarships

Over $100,000 in scholarships are available. Awards range from $5,000 to $10,000, and approximately 36% of UWM’s public health students receive scholarship support. Current scholarships include:

1. BMO Harris Student Success Scholarship
   For any Zilber School of Public Health student
2. Constance A. Greiser Scholarship
   For MPH students
3. Jerry & Louise Stein Scholarship
   For MPH students studying Community and Behavioral Health Promotion or Environmental Health Sciences
4. Vera Zilber Public Health Scholarship
   For MPH students studying Biostatistics, Epidemiology, or Public Health Policy & Administration

The Application for Financial Support is available on the Resources page of the Zilber SPH website: http://www4.uwm.edu/publichealth/resources/index.cfm. All scholarships are awarded on a competitive basis, with an average award of $5,000. Apply by January 15th for consideration. To apply, return a completed Application for Financial Support to darcie@uwm.edu.
Student Travel for University Business
Note that if you are traveling using School funds, grant funds, travel awards, or professor's start-up funds, you will need to fill out a travel authorization form.

The form will need to be signed by the individual authorizing funds or the Graduate Program Manager.

Please turn in the form and copies of any e-mail denoting award, use of funds, etc. to the Faculty Support Office. These should be turned in as soon as possible and, preferably, before you begin to plan the travel.

See this handbook’s Appendices for the Travel Support Request form.
Section II: The Master of Public Health (MPH) Program
Goal and Description
UWM’s Zilber School of Public Health offers a Master of Public Health (MPH), a professional master’s degree program with five distinct tracks of study. The MPH program provides students with a broad understanding of public health practice and allows specialization in Biostatistics, Community and Behavioral Health Promotion, Environmental Health, Epidemiology, or Public Health Policy and Administration.
Like most MPH programs, the Zilber SPH’s program imparts knowledge and skills in each of these core disciplines in public health, helping prepare all students to analyze information and consider solutions to public health problems at the community, institutional, and societal levels. Courses have been designed to teach crosscutting program competencies as defined by Zilber SPH faculty. In addition, students apply for a specific track of study, gaining deeper knowledge in one of five areas. Please find below an overview of innovations that set these tracks of study apart from many MPH programs.

Track Summaries

Biostatistics

The Biostatistics track builds on the classic Public Health Biostatistics skill and knowledge base and takes advantage of special knowledge of its faculty in the areas of genetics, bioinformatics, network analysis, causal inference, and big data science. Students have the opportunity to learn and apply statistical genetics in the context of complex disease study, high throughput computing used in ‘big’ data science, applications in evidence-based patient-centered outcome studies, and population-based epidemiological studies. Courses include topics and material such as interpretation of personalized and evidence-based medicine in the context of public health; basic understanding of genetics and epigenetics; general ‘omic’ approaches and concepts; as well as classic Biostatistics topics such as Survival and Categorical data analysis.

Community and Behavioral Health Promotion

The Community and Behavioral Health Promotion (CBHP) track focuses on promoting the health of communities through innovative approaches to community engagement and collaborative practice. Coursework addresses theories and frameworks in social and behavioral science, evidence-based methods for program planning (including assessment) and implementation, and program evaluation. Students apply a social justice and equity-centered approach to public health training and practice. Methodological approaches address quantitative, qualitative, and community-engaged techniques.

Environmental Health Sciences
The Environmental Health track offers students an opportunity to learn laboratory techniques important for public health practice professionals. Students benefit from faculty expertise in environmental and developmental toxicology and faculty use of animal models to research public health issues. All students complete a Field Experience, too. Placed with the Milwaukee Health Department’s Division of Disease Control and Environmental Health or another environmental health-based community partner, students’ experiences incorporate environmental health theories with crosscutting public health competencies like communication, public health biology, systems-thinking, or leadership.

Epidemiology

The Epidemiology track is unique among national schools of public health in its emphasis on the application of epidemiologic theory and methods for promoting social justice and health equity. Our integrated multidisciplinary curriculum bridges theory, research, and practice to prepare students to engage in rigorous, collaborative, evidence-informed, and reflexive public health practice. Through both didactic and experiential learning, students acquire foundations of applied epidemiological methods, epidemiologic data analysis, theories of social inequality, social epidemiology, and community partnership building. Graduates are able to collect, analyze, and interpret epidemiological information, generate theory-driven hypotheses and research questions, and work in true collaboration with diverse community partners to create social change to improve the public’s health and reduce health inequities.

Public Health Policy and Administration

The Public Health Policy and Administration (PHPA) track is unique in its focus on equipping students with an inter-sectoral, systems-level, applied approach to informing public health policy and administration that promotes health equity. Emphasizing a comprehensive perspective and integrated strategy that links theory with practice, the PHPA curriculum provides students with a foundational understanding of social and policy theory, quantitative and qualitative methods, and policymaking and its broader context. Graduates obtain a breadth of knowledge and skills applicable to a variety of fields in the public and private sectors as well as the ability to effectively apply their knowledge and tools to practice.
Crosscutting Competencies
All graduate students in UWM’s Zilber School of Public Health are expected to:

1. Explain the foundational principles and historical perspectives that shape the field of public health.
2. Describe how multiple determinants, including socioeconomic, biological, behavioral, and environmental, and the interrelations among these determinants shape population health and health inequities.
3. Integrate principles of social and environmental justice within public health practice and research.
4. Employ ethical principles and protocols in public health practice and research.
5. Implement approaches to public health practice and research that recognize the social, cultural and environmental circumstances of individuals, communities and populations.
6. Utilize appropriate quantitative and/or qualitative methods in public health practice and research.
7. Apply inter-disciplinary theories, research methods and best practices to address public health issues and promote population health.
8. Collect, synthesize and critically analyze information and data to identify and address, and inform public health issues and interventions.
9. Practice a high standard of professionalism, demonstrated by integrity, respect, transparency, sound judgment, and constructive interactions with colleagues, community members, stakeholders and the public at large.
10. Demonstrate leadership and partnership skills that foster and support collaborations across diverse communities, settings and sectors.
11. Communicate effectively about public health issues with diverse audiences using a variety of strategies and modalities.
12. Advocate for the public’s health and health equity.
Track Competency Sets

Master of Public Health students in the Biostatistics Track are expected to:

1. Function as a collaborator with community partners on public health projects and in developing recommendations for appropriate study designs that advance social justice and population health.
2. Translate research objectives into testable hypotheses.
3. Differentiate between quantitative problems that can be addressed with routine methods and those requiring input from a doctoral-level biostatistician.
4. Demonstrate a broad knowledge and understanding of statistical techniques used in public health studies and health-related scientific investigations.
5. Identify and apply a variety of appropriate statistical methods for developing inferences about public-health-related questions.
6. Demonstrate basic programming skills in multiple statistical software packages and data management and integration techniques for public health and big data projects.
7. Apply basic informatics techniques with vital statistics and public health records in the description of public health characteristics and in public health research and evaluation.
8. Interpret and critique statistical analyses in publications for public health professionals.
9. Demonstrate a cognizance of the social, environmental and public health contexts that are impacted by the results of statistical analyses.
10. Demonstrate effective written and oral communication skills when reporting statistical results to different audiences of public health professionals, policy makers and community partners.
11. Formulate and produce graphical displays of quantitative information (e.g., scatter plots, box plots and line graphs) that effectively communicate analytic findings.
12. Differentiate between ethical and unethical reporting of data and results.

Master of Public Health students in the Community and Behavioral Health Promotion Track are expected to:

1. Demonstrate a broad knowledge and understanding of community and behavioral health theories and their application to health promotion and prevention.
2. Apply relevant theories, concepts and models from the social and behavioral sciences to public health research and practice.
3. Engage and include key stakeholders in the planning, implementation and evaluation of public health programs, policies, and interventions.
4. Demonstrate cultural humility and collaborative skills when working with disadvantaged individuals and diverse communities on public health problems and solutions.
5. Identify and operationalize social and community-level solutions to public health problems.
6. Develop and apply collaborative partnership and engagement skills with diverse community agencies and stakeholders to address health disparities and promote health equity.

7. Assess for potential social and behavioral factors influencing the health of individuals and communities.

8. Assess the strengths and limitations of social and behavioral science interventions and policies within the context of health promotion.

9. Apply qualitative and quantitative methods to the assessment of public health problems, the articulation of community strengths, and the evaluation of prevention and intervention programs.

10. Identify and apply theoretically grounded, evidence-based approaches to the development and implementation of social and behavioral science interventions.

11. Facilitate and/or lead the planning, implementation and evaluation of public health programs, policies and interventions.

12. Integrate principles of social justice and human rights into planning, implementing and assessing public health interventions.

13. Develop and apply effective health communication strategies with diverse stakeholders.

Master of Public Health students in the Environmental Health Sciences Track are expected to:

1. Describe/understand the direct and indirect human health effects of major physical, chemical and biological factors from both natural and built environments.

2. Describe genetic, physiological and overall human health effects of primary environmental hazards resulting from both chronic and acute exposures.

3. Describe/understand how animal models are utilized to address societal issues that intersect between basic science and public health.

4. Describe approaches for assessing, preventing and controlling environmental hazards that pose risks to both human and ecological health.

5. Perform a risk assessment of an environmental health agent.

6. Identify, locate and use appropriate reference materials.

7. Comprehend the primary scientific research literature, and obtain information directly from experts in the field of environmental health sciences.

8. Analyze data statistically and conceptually, interpret results, make conclusions, and describe the relevance of such results to public health problems/issues.

9. Communicate and disseminate complex scientific and public health information simply and accurately in both written and spoken word, in both informal and formal interactions, targeted appropriately and respectfully to audiences of diverse backgrounds.

10. Interact and collaborate with individuals and organizations across the spectrum of public health disciplines.
Master of Public Health students in the Epidemiology Track are expected to:

1. Apply multidisciplinary social and environmental justice, human rights, critical social science, population health and health equity perspectives to frame and interpret epidemiologic research and practice.

2. Identify and describe socio-structural, environmental, behavioral and biological determinants of health and health equity.

3. Systematically gather, critically evaluate and synthesize epidemiological literature and other relevant information to advance population health and health equity.

4. Apply epidemiological skills in collaboration with community partners and key stakeholders to advance social and environmental justice and population health.

5. Use interdisciplinary knowledge to formulate theory-driven hypotheses and research questions with relevant policy and practice implications for advancing population health and health equity.

6. Apply appropriate field and surveillance methods to investigate disease outbreaks and assess patterns of exposures and health outcomes in the population.

7. Engage ethically in interactions with study participants, communities and colleagues, in the performance of research and practice activities, and reporting of data and findings.

8. Select epidemiologic methods and conduct statistical analyses to describe patterns of health and determinants of health, assess associations between exposures and health outcomes while minimizing threats to causal inference.

9. Interpret and contextualize results, with attention to strengths and limitations of the study framing, design and analysis, and policy and practice implications.

10. Communicate epidemiologic findings using a variety of modalities to diverse audiences and translate how findings are relevant to academics, community organizations, policy-makers, public health practitioners and other stakeholders.

Master of Public Health students in the Public Health Policy and Administration Track are expected to:

1. Distinguish public health policy and administration from health care policy and administration, and articulate the importance of public health policy in shaping population health.

2. Examine how public policy and established socio-economic structures influence population health and health disparities, and develop strategies for leveraging policy to reduce inequities.

3. Incorporate a breadth of disciplines, sectors and stakeholders in public health policy and administration to promote population health, health equity, and social and environmental justice.
4. Integrate ethical principles into public health policy, practice, research and administration by ensuring respect for diverse values, beliefs, and cultures and the dignity of individuals and communities.

5. Demonstrate effective oral and written communication skills to present, explain and advocate for public health policies and programs.

6. Describe the policy-making process and identify the actors, structures and forces that influence and shape the public health policy process.

7. Explain the legal framework of public health policy and administration as well as its role in influencing population health and in both perpetuating and ameliorating health disparities.

8. Conduct policy analysis in public health policy and administration, identifying and assessing policy options, outcomes, and potential contributions to population health and health disparities.

9. Apply appropriate methods to gather and analyze a robust basis of evidence to inform and evaluate public health policy, practice and administration.

10. Assess and translate available evidence into public health policy and administrative planning, development and implementation to promote population health and health equity.

11. Describe the organizational structures, financing and administration of public health and health care systems, and the authorities of various levels of governmental public health agencies.

12. Apply best-practice leadership and management principles into public health practice and administration.
Curriculum and Courses

All students enrolled in the MPH program take a common set of core classes designed to provide basic skills and knowledge of public health concepts. The core curriculum consists of at least 20 credit hours, including at least three credits Field Experience and a two-credit capstone seminar. In addition to the common core, students complete the required coursework in one of five specialization tracks: Biostatistics, Community and Behavioral Health Promotion, Environmental Health Sciences, Epidemiology, or Public Health Policy and Administration. The MPH degree varies from 42-48 credits depending on the track. Students must maintain a cumulative G.P.A. of 3.0 or better in order to progress through the program.

MPH Required Common Core Courses (at least 20 credits)

- PH 702: Introduction to Biostatistics (3 credits)
- PH 703: Environmental Health Sciences (3 credits)
- PH 704: Principles and Methods of Epidemiology (3 credits)
- PH 705: Public Health Policy and Administration (3 credits)
- PH 706: Perspectives in Community and Behavioral Health (3 credits)
- PH 790: Field Experience in Public Health (at least 3 credits)
- PH 800: Capstone in Public Health (2 credits)
Curriculum and Courses Biostatistics Track (42 credits total)

Highlighting denotes courses not yet developed and/or approved via UWM governance.

Required Biostats Track Courses (13 credits)

- PH 710: Seminar in Biostatistics and Bioinformatics (1 credit)
- PH 711: Intermediate Biostatistics (3 credits)
- PH 712: Probability and Statistical Inference (3 credits)
- PH 713: Analyzing Observational and Experimental Data (3 credits)
- PH 718: Data Management and Visualization in R (3 credits)

Biostats “S”electives – Choose three (9 credits minimum)

- PH 707: Introduction to Statistical Computing (1 credit)
- PH 709: Public Health Informatics (3 credits)
- PH 714: Statistical Genetics and Genetic Epidemiology (3 credits)
- PH 715: Applied Categorical Data (3 credits)
- PH 716: Applied Survival Analysis (3 credits)
- PH 717: Applied Longitudinal Data Analysis (3 credits)
- PH 720: Special Topics in Biostatistics (1 – 3 credits)
- PH 721: Introduction to Translational Bioinformatics (3 credits)
- PH 722: Clinical Trials (3 credits)
Curriculum and Courses Community and Behavioral Health Promotion (CBHP) Track (44 credits total)

Highlighting denotes courses not yet developed and/or approved via UWM governance.

**Required CBHP Track Courses (15 credits)**

- PH 701: Public Health Principles and Practice (3 credits)
- PH 725: Theories and Models of Health Behavior (3 credits)
- PH 726: Community Health Assessment (3 credits)
- PH 727: Program Planning and Implementation in Public Health (3 credits)
- PH 728: Program Evaluation in Public Health (3 credits)

**CBHP Methods “S”electives- choose two (6 credits minimum)**

- PH 729: Survey Research Methods in Public Health (3 credits)
- **PH 731**: Community Engaged and Participatory Research and Practice (3 credits)
- **PH 736**: Advanced Qualitative Methods (3 credits)

**CBHP Electives – Choose one (3 credits minimum)**

- PH 732: Youth Mental Health Practice for Non Mental health Professionals (3 credits)
- KIN 732: Physical Activity and Health across the Lifespan (3 credits)
- PH 752: Public Health and Mental Health (3 credits)
- PH 719: Social Justice, Race, and Health (3 credits)
- PH 740: Special Topics in Public Health (3 credits)
- PH 999: Independent Study
- Other classes as approved by advisor
Curriculum and Courses

Environmental Health Sciences (EHS) Track
(42 credits total)

Highlighting denotes courses not yet developed or approved via UWM governance.

**Required EHS Track Courses (11 credits)**

PH 701: Public Health Principles and Practice (3 credits)
PH 743: Environmental Risk Assessment (3 credits)
PH 762: Environmental Epidemiology (3 credits)
PH 750: Seminar in Environmental Health Sciences (1 credit x 2)

**EHS Built Environment “S” elective – Choose one**

GEOG 520: The Physical Geography of the City (3 credits)
GEOG 880: Challenges to Urban Sustainability (3 credits)
GEOG 945: The Internal Structure of the City (3 credits)
IE 580 Ergonomics (3 credits)
URBPLAN 791 Intro to Urban GIS for Planning (3 credits)
URBPLAN/GEOG 880 Challenges of Urban Sustainability (3 credits)
*Other classes as approved by advisor*

**EHS Chemical Environment “S” elective- Choose one**

PH 741: Environmental Health Microbiology (3 credits)
PH 744: Environmental Toxicology (3 credits)
PH 745: Developmental Toxicology (3 credits)
*Other classes as approved by advisor*

**EHS Biological Environment “S” elective- Choose one**

PH 741: Environmental Health Microbiology (3 credits)
PH 745: Developmental Toxicology (3 credits)
PH 775: Mechanisms of Infectious Disease (2 credits)
*Other classes as approved by advisor*
EHS Electives – Choose one additional course

from the Built, Chemical, or Biological “S” electives listed above or other classes as approved by advisor
Curriculum and Courses Epidemiology (EPI) Track (47 credits total)

*Highlighting denotes courses not yet developed and/or approved via UWM governance.*

**Required EPI Track Courses (18 credits)**

- PH 700: Structures of Inequality and Population Health (3 credits)
- PH 758: Social Epidemiology (3 credits)
- PH 759: Applied Quantitative Methods for Studying Population Health and Health Disparities (3 credits)
- PH 761: Epidemiology Field Methods (3 credits)
- PH 763: Epidemiology in Action for Equity I (3 credits)
- PH 764: Epidemiology in Action for Equity II (3 credits)

**EPI “S”electives – Choose one (3 credits minimum)**

- PH 762: Environmental Epidemiology (3 credits)
- PH 768: Cancer Epidemiology (3 credits)
- PH 769: Nutritional Epidemiology (3 credits)

**EPI Electives – Choose two (6 credits minimum)**

- PH 714: Statistical Genetics and Genetic Epidemiology (3 credits)
- PH 715: Applied Categorical Data Analysis (3 credits)
- PH 716: Applied Survival Analysis (3 credits)
- PH 727: Program Planning and Implementation in Public Health (3 credits)
- PH 728: Program Evaluation in Public Health (3 credits)
- PH 729: Survey Research Methods in Public Health (3 credits)
- PH 784: Social Policy as Health Policy (3 credits)
- PH 867: Intermediate Epidemiological Theory and Analysis (3 credits)
- PH 868: Links between Infectious and Chronic Disease (3 credits)
- UrbPlan 692: Data Analysis and Visualization (3 credits)

*Other classes as approved by advisor*
Curriculum and Courses Public Health Policy and Administration (PHPA) Track (at least 45 credits total) *

Highlighting denotes courses not yet developed and/or approved via UWM governance.

Required Courses (16 credits)
PH-700: Structures of Inequality and Population Health (3 credits)
PH-776: Applied Qualitative Methods for Public Health Policy and Administration (3 credits)
PH-777: Quantitative Research and Methods for Public Health Policy and Administration (3 credits)
PH-779: Public Health Policymaking and Policy Analysis (3 credits)
PH-780: Seminar in Public Health Policy and Administration (1 credit)
PH-785: Principles of Public Health Economics (3 credits) - Students should enroll in recommended ECON class until further notice

Administration “S”elective – Choose one (3 credits)
BUS ADM-755: Health Care Administration and Delivery Systems (3 credits)
PUB ADM-763: Scope and Dynamics of Public Administration (3 credits)
BUSMGMT-718: Concepts and Practice of Nonprofit Management (3 credits)
ED POL-601: Foundations of Community-Based Organizations (3 credits)

Content “S”elective – Choose one or two (3 to 6 credits)
PH-719: Social Justice in Public Health (3 credits)
PH-725: Theories and Models of Health Behavior (3 credits)
PH-774: Crime Policies and Public Health (3 credits)
PH-784: Social Policy as Health Policy (3 credits)
PH-786: The Science and Policy of Sustainable Diets (3 credits)
BUS ADM-757: Managed Care and Integrated Health Networks (3 credits)
ED POL-611: Community Policies and Urban Minority Youths (3 credits)
ED POL-630: Race and Public Policy in Urban America (3 credits)
GEOG-564: Urban Environmental Change and Social Justice (3 credits)
NONPROF-789: Theory and Role of Nonprofit Organizations (3 credits)
URB STD-965 Municipal Management (3 credits)
Other classes as approved by advisor

Methods “S”elective – Choose one or two (3 to 6 credits)
PH-711: Intermediate Biostatistics (3 credits)
PH-726: Community Health Assessment (3 credits)
PH-728: Program Evaluation in Public Health (3 credits)
URBPLAN-791: Intro to Urban GIS for Planning (3 credits)
ED POL-602: Proposal Writing and Fundraising Skills for Community-Based Organizations (3 credits, online)
ED POL-711: Community Organizing: Collective Action for Social Change (3 credits)
PUB ADM-730: Budgeting for Public Sector Professionals (3 credits)
PUB ADM-769: Analyzing and Evaluating Public Policies and Programs (3 credits)
BUSMGMT-721: Fundraising and Development for Nonprofit Organizations (3 credits)
SOCIOL-752: Fundamentals of Survey Methodology (3 credits)
NONPROF-791: Nonprofit Advocacy and Public Policy (3 credits)
# Biostatistics Track Plan of Study (for students beginning in Fall 2015)*

**Summer 2015 (0 or 3 credits)**

- PH 790
  - Field Experience in Public Health
  - or no summer classes

**Fall 2015 (12 credits) | Spring 2016 (5 to 11 credits)**

- PH 779
  - Public Health Policymaking and Policy Analysis
- Fundamental Methods “S” Elective or Elective**
- Admin “S” elective
- Elective**
- PH 790
  - Field Experience in Public Health
  - or Elective**
- PH 800 (2 credits)
- Capstone in Public Health

* Note that this is the updated curriculum and that part-time students should maintain an updated Plan of Study with their Faculty Advisor.

** Students must take one Methods Elective (3 credits) and one Content Elective (3 credits). Additional electives are optional.
PH 790 Field Experience, Graded Satisfactory/Unsatisfactory

The purpose of the Field Experience is to provide students with a practical public health experience that allows them to apply the knowledge and skills learned in the classroom to public health problems. Students work with their Faculty Advisor and coordinating staff to identify a placement that matches the student’s public health interests and career goals.

Students complete a minimum of three credits (65 contact hours per one credit, 200 hours total) with the organization. Many students choose to complete their field experience working in a local health department or community-based organization with public health-related programs and services. The experience is a mentored placement engaging both a Faculty advisor and a Site Preceptor.

The over-arching objectives of the practice experience are:

- To help students further develop skills or competencies learned in their coursework by applying them in a public health practice setting.
- To provide a means for acquiring practical skills that are useful to public health professions and that are not available solely through academic instruction.
- To link the classroom experience to the core functions of public health practice and priorities as described in the Healthy People 2020 and Healthiest Wisconsin 2020 plans (or their successors).
- To understand the political, economic, environmental, social and organizational contexts within which public health activities are conducted.
- To gain exposure to an organizational and/or community context for public health activities.

Two workshops are held annually – one in mid-October and one in late February – to prepare students for this experience. Attendance is mandatory before enrolling in PH 790. A separate Field Experience Handbook exists to provide in-depth information to students, precepting organizations, and Faculty Advisors. It is distributed during the mandatory workshop.
PH 800 Capstone in Public Health, Completed in the Final Year of Study
The capstone requires students to integrate the knowledge and skills learned in the classroom, Field Experience, and/or lab into some aspect of professional public health practice. Students work with their Faculty Advisor to write a project proposal the semester prior to the capstone reflecting the student’s interests and career goals. Students then implement the project during their final semester of the program. The project has both a written paper and oral presentation component, in addition to attending a weekly seminar. The capstone project is an opportunity for students to demonstrate public health competencies.
Course Descriptions

PH 700: Structures of Inequality and Population Health (3 credits)
This course covers theory, practice-based skills, and foundations of traditional public health and health equity practice. Students will identify assumptions, core constructs, and explanatory frameworks of key public health, social justice, and critical social science theories. Prereq: grad st.

PH 701: Public Health Principles and Practice (3 credits)
Examination of fundamental principles designed to improve the health of the public, public health theories, domains, and practices.

PH 702: Introduction to Biostatistics (3 credits)
Development and application of statistical reasoning and methods in addressing, analyzing and solving problems in public health. Prereq: Grad st; Competency in College Algebra as reflected with a grade of B or better in a course (or diagnostic exam) equivalent to UWM's MATH 116 College Algebra.

PH 703: Environmental Health Sciences (3 credits)
Survey of effects environment has on humans, and effects humans have on environment, emphasis on toxicology and infectious disease. Prereq: grad st.

PH 704: Principles and Methods of Epidemiology (3 credits)
Introduction of the quantitative study of patterns and determinants of health in human populations, including problem conceptualization, study design, measurement, causal inference, estimation accuracy, and threats and solutions to validity. Prereq: grad st; completion of or concurrent enrollment in PH 702 or equivalent statistics course by consent of instructor.

PH 705: Principles of Public Health Policy and Practice (3 credits)
This course discusses the integral role of policy in influencing population health, explores policies and policy strategies that protect and promote public health, provides a framework for the policymaking process, and introduces the planning, organization, and administration of health systems. The course emphasizes applied skills through a policy brief, policy analysis, and “mock” public hearing. Pre-req: grad stat, PH704 preferred

PH 706: Perspectives in Community and Behavioral Health (3 credits)
Philosophical underpinnings, conceptual frameworks, and strategies for the application of behavioral and social science concepts to the goals of public health. Prereq: grad st.

PH 707: Introduction to Statistical Computing (1 credit)
Introduction to statistical methods as implemented in SAS, including macros and core statistical analysis functions. Prereq: grad st; PH 702(C) or cons intr.

**PH 709: Public Health Informatics (3 credits)**
Overview of the rapidly emerging and evolving field of public health informatics - active learning and exposure to new and relevant public health informatics methods, applications, and tools. Prereq: grad st; PH 702 or cons inst.

**PH 710: Seminar in Biostatistics and Bioinformatics (1 credit)**
The Biostatistics, Bioinformatics or Data Science Seminar will be held every semester and will have a different theme each semester rotating through special topics in Biostatistics, broad overview of Bioinformatics or recent developments in Data Science and Genetics. Prereq: grad st.

**PH 711: Intermediate Biostatistics (3 credits)**
Introduction to modern multivariable statistical analysis, based on generalized linear models. Topics include linear regression, logistic regression, one-way and two-way ANOVA, longitudinal analysis, missing data, and mixed models. Prereq: grad st; PH 702(P) or cons instr

**PH 712: Probability and Statistical Inference (3 credits)**
This introductory course covers mathematical treatment and understanding of key concepts in probability and distribution theory, and statistical inference. Covers probability, discrete, and continuous distributions, expectation, generating functions, limit theorems, transformations, sampling theory, statistical point and interval estimation, hypothesis testing, method of moments, and maximum likelihood, among other topics. Prereq: grad st; Calculus I and II or cons inst.

**PH 713: Analyzing Observational and Experimental Data (3 credits)**
This is a graduate-level course that will provide students with a basic understanding of issues involved in analyzing data from both experiments and observational studies. The distinction between experiments and observational studies will be cast within a causal inference framework, and applications in public health will be emphasized. This course will cover randomization, confounding, blocking, ANOVA, selection bias, and missing or mis-measured data. Pre-reqs: PH 704 (P), PH 711(C) or PH 759(C); or cons inst.
PH 714: Statistical Genetics and Genetic Epidemiology (3 credits)
Statistical methods for the analysis of family and population based genetic data. Topics include allele frequency estimation, classical segregation and linkage analysis, family- and population-based association studies. Students will be exposed to the latest statistical methodology and computer tools on gene mapping in complex human disease. 
Prereq: grad st; PH 711 or cons inst.

PH 715: Applied Categorical Data Analysis (3 credits)
This course will cover key concepts for analyzing contingency tables such as odds-ratios, relative risks, tests of independence and trend tests. Generalized linear regression models for the analysis of categorical data will be covered including logistic, probit, Poisson, and multinomial response models. Prereq: grad st; PH 711 or cons inst.

PH 716: Applied Survival Analysis (3 credits)
This course covers the statistical concepts and techniques that are commonly used in the practice of survival analysis. Survival functions, hazard rates, types of censoring and truncation will be introduced. Life tables, Kaplan-Meier plots, log-rank tests, Cox regression models. Inference for parametric regression models will be covered. Prereq: grad st; PH 711 or cons inst.

PH 717: Applied Longitudinal Data Analysis (3 credits)
This course covers modern methods for the analysis of repeated measures, correlated outcomes, and longitudinal data, including the unbalanced and incomplete data that are characteristic of biomedical research. Connections with multilevel modeling will be discussed. Prereq: grad st; PH 711 or cons inst.

PH 718: Data Management, and Visualization in R (3 credits)
This course covers basics of data management in UNIX and R and an introduction to databases (e.g., SQL). Data visualization and large-scale, parallel and batch computing will be taught within the context of implementing common algorithms in statistical computing. Applications will focus on research problems encountered in public health investigations. Prereq: grad st; PH 711 or cons inst.
PH 719: Social Justice, Race, and Health (3 credits)
This course is designed to introduce you to the major social variables that affect public health. These include: socioeconomic status, race, poverty, income distribution, social network, social support, social capital, neighborhood/community environment, Psychosocial stress. Prereq: grad st

PH 720: Special Topics in Biostatistics (1 - 3 credits)
Survey of an area in Biostatistics. Specific credits and additional prerequisites announced in Schedule of Classes each time course offered. Retakable w/chg in topic to 9 cr max.

PH 721: Introduction to Translational Bioinformatics (3 credits)
Broad overview of bioinformatics and hands-on practice using widely-used bioinformatics software to solve a variety of biological and biomedical problems. Topics include: introduction to high throughput technologies, bioinformatics database searching, supervised and unsupervised analysis, gene ontology analysis, pathway meta-analysis, and network analysis. Prereq: grad st; PH 711 or cons inst.

PH 722: Clinical Trials (3 credits)
Introduce the design, conduct, and analysis of clinical trials, combining clinical trial results with meta-analysis, and dissemination of results. Topics also include the ethics of human experiments and the role of human subjects committees, how basic methods are adapted to special situations such as studies intended to establish non inferiority. Prereq: grad st; PH 711 or cons inst.

PH 725: Theories and Models of Health Behavior (3 credits)
Examine theories of health behavior targeted to each level of the social ecological model, including historical and public health context. Assess utility of these theories in various domains. Prereq: grad st.

PH 726: Community Health Assessment (3 credits)
Introduction to the concepts and techniques of community health assessment; conducting and critically analyzing community assessments. Prereq: grad st; PH 701 or cons instr

PH 727: Program Planning and Implementation in Public Health (3 credits)
Systematic approach to planning and implementing public health programs, examining program monitoring, methods of impact assessment, and measuring efficiency. Prereq: grad st.
PH 728: Program Evaluation in Public Health (3 credits)
Students design and present research and evaluation plans, receive guidance on developing conceptual frameworks and hypotheses, collecting and analyzing data, and developing program evaluation plans. Prereq: grad st

PH 729: Survey Research Methods in Public Health (3 credits)
The application of survey methods with emphases on sampling, survey design and planning, and data collection procedures. Prereq: grad st.

PH 731: Community Engaged and Participatory Research and Practice
Community empowerment and involvement plays a role in public health, policy change, social, and environmental justice. This class will introduce students to community engaged and participatory research. The course will cover philosophical, practical, and methodological issues in the conduct of community-based participatory research across different public health disciplines. Prereq: grad st.

PH 732: Youth Mental Health Practice for Non Mental Health Professionals (3 credits)
Examination of mental health principles and practices from a public health professional's perspective, including ethical guidelines, necessary interpersonal skills, and mental health screenings and referrals to services. Prereq: grad st.

PH 733: Public Health Approaches to Physical Activity and Nutrition (3 credits)
This course will examine major factors contributing to obesity with a key focus on the contribution of physical activity, nutrition and the built environment as contributing factors and key public health intervention strategies. Prereq: grad st

PH 736: Advanced Qualitative Methods (3 credits)
This course will introduce students to qualitative research methods and their application in public health research and practice. Prereq: grad st
PH 741: Environmental Health Microbiology (3 credits)
Study of microbial processes in water, land, and food that affect human health. This course will focus on topics in two major areas: 1) environmental factors regulating disease transmission among human populations, and 2) the role of microorganisms in maintaining sustainable healthy ecosystems (e.g. wastewater treatment). Prereq: grad st; cons inst for MPH students.

PH 743: Environmental Risk Assessment (3 credits)
Introduction to current risk assessment practices and procedures and exploration of the intrinsic complexities and challenges associated with analysis of environmental health risks. Topics include both human and ecosystem health, risk communication, relevant regulation, management, and mitigation of risks. Federal agencies and international organizations are discussed and evaluated. Prereq: grad st

PH 744: Environmental Toxicology (3 credits)
Anthropogenic and naturally occurring chemicals (in the air, water, and food) sometimes have detrimental effects on human and ecosystem health. Learn about occurrence of toxicants, their transport, how they can induce damage in human and biological systems, how they to test for them, and how they are regulated. Prereq: grad st

PH 745: Developmental Toxicology (3 credits)
An introduction to the field of developmental toxicology and how environmental contaminants influence vertebrate development, including humans. Prereq: grad st

PH 750: Seminar in Environmental Health Sciences (1-3 credits)
Survey of an area in environmental health. Specific credits and additional prerequisites announced in Schedule of Classes each time course offered. Retakable w/chg in topic to 9 cr max.

PH 752: Public Health and Mental Health (3 credits)
Understanding mental health and mental illness from a public health perspective; designed for an interdisciplinary audience of students, researchers and practitioners. Prereq: grad st (for 734) or cons inst (for 634)
PH 758: Social Epidemiology (3 credits)
This course provides an overview of key concepts and theoretical frameworks for the study of social determinants of health. Students will gain understanding of the biological pathways by which social factors “get under the skin” to perpetuate health inequities over time and learn to critically assess social epidemiology literature. Prereq: grad st; PH 700, PH 702, and PH 704 or consent of instructor

PH 759: Applied Quantitative Methods for Studying Population Health and Health Disparities (3 credits)
Using STATA, students will learn how to manage and code a large national dataset, build regression models, perform diagnostics, and interpret results. The utilization of social theory to guide the development and interpretation of statistical models in order to study and understand population health and health disparities is emphasized. Prereq: grad st; B- or better in PH 700, PH 702, and PH 704, or cons inst. This course may satisfy the PH777 requirement with approval of Instructor.

PH 761: Epidemiology Field Methods (3 credits)
This course provides background to prepare students to conduct epidemiologic studies in the field. Students will be introduced to a variety of methods including reviewing literature on a specific topic, designing questionnaires, developing surveillance systems, conducting emergency outbreak investigations, applying for IRB approval, and communicating with partners and the public. Prereq: grad st; PH 700, PH 702, and PH 704 or consent of instructor

PH 762: Environmental Epidemiology (3 credits)
Expands upon basic epidemiological principles to tackle current problems in studies of health impacts of contaminants in air, water, food supply, consumer products, and indoor spaces, emphasizing a cross-disciplinary approach. Prereq: grad st; PH 703(P) and PH 704(P) or cons instr.

PH 763: Epidemiology in Action for Equity I (3 credits)
In this course students will work in small groups to partner with a community-based social justice organization and apply their epidemiology knowledge and skills to the design or development of an intervention, program, policy, or other strategy aimed at achieving structural change to promote social and/or environmental justice. Prereq: grad st; PH 700, PH 761; Co-requisite: PH 758 or consent of instructor
PH 764: Epidemiology in Action for Equity II (3 credits)
In this course students will partner with a community-based organization to develop applied tools, and collect and analyze data to address a research or evaluation question relevant to advancing the social justice goals of the organization. Prereq: grad st; PH 759, PH 763

PH 768: Cancer Epidemiology (3 credits)
The course will focus on cancer surveillance and biology as they impact on the design and interpretation of studies in cancer epidemiology, the understanding of major risk factors for cancer, as well as screening and public health approaches to cancer control. Prereq: grad st; PH 702, PH 704 and PH 759 or consent of instructor

PH 769: Nutritional Epidemiology (3 credits)
The course will focus on the role of diet and nutrition in disease etiology and prevention. Research methods in nutritional epidemiology and issues related to study design, analysis and interpretation will be discussed. Prereq: grad st; PH 702, PH 704 and PH 759 or cons inst

PH 773: Immigration Policies and Health (3 credits)
This seminar introduces students to the interrelationships between migration and health in the United States. This course will examine historical and contemporary policies shaping immigrant, refugee, and asylee health, and how these policies relate with other social determinants of health. Prereq: grad st; PH 700 and 705 or cons inst.

PH 774: Crime Policies and Public Health (3 credits)
This seminar examines criminal justice policy in the United States from a public health perspective. It examines how mass incarceration contributes to racial, gender, and class inequalities and thereby works as a social determinant of health. Students will also explore alternative models to harm and violence prevention. Prereq: grad st; PH 700 and 705 or cons inst.

PH 775: Mechanisms of Infectious Disease (2 credits)
Molecular and cellular means by which microorganisms facilitate infection, withstand or evade immune response, induce damage to host, and ensure transmission to human populations. C L Sci 775 & PH 775 are jointly offered; they count as repeats of one another. Prereq: grad st; Ic & la course in medical microbiology
PH 776: Applied Qualitative Methods for Public Health Policy and Administration (3 credits)
This course introduces Masters level students to foundational approaches for qualitative research in public health policy and administration. The course reviews research ethics, researcher positionality, and will provide opportunities to practice foundational interview, focus group, participant observation, research analysis, and research design skills. Prereq: grad st; Graduate Student Status Corequisite: PH777

PH 777: Survey of Quantitative Methods for Public Health Policy and Administration (3 credits)
This course will introduce students to the quantitative methods commonly used in public health policy and administration decisionmaking and will provide students with the skills to both critically analyze quantitative research and to appropriately apply knowledge generated from research to the public health policy and administration context. Prereq: grad st; PH 702, PH 704; Corequisite: PH 776. Students with a strong background in math may elect to take PH759 in place of this course with approval of PH759 Instructor.

PH 779: Public Health Policymaking and Policy Analysis (3 credits)
This course provides an in depth examination of policymaking and public health policy analysis. Common policymaking models are examined, with discussion of their implications for policy change. Students learn to apply a policy analysis framework, with a focus on identifying policy alternatives and effectively presenting policy recommendations. Prereq: grad st; PH 705

PH 780: Seminar in Public Health Policy and Administration (1 credit)
This seminar explores current topics in public health policy and administration. The course draws upon the expertise of faculty and practitioners from a wide variety of disciplines and sectors. Content varies from year to year depending upon current issues and interests. Prereq: grad st; Final semester of PHPA track

PH 782: Policy, Politics, and Structural Inequalities (3 credits)
This course is an advanced seminar in critical theories of state, social, and economic power and conflict for health policymaking and social transformation. Case studies explore the transformation of the health sector in the United States, federalism, and the disciplinary and regulatory roles of health policy. Prereq: grad st; PH 700 and PH 705 or cons inst.
PH 783: Inequalities in the Socially Just City (3 credits)
This seminar provides an interdisciplinary grounding in urban theory relevant for understanding the socioeconomic forces and policies that contribute to health disparities and environmental inequities. It explores how principles of urban justice--such as right to the city, environmental justice, and spatial justice--can contribute to health justice. Prereq: grad st; PH 700 and PH 705 or cons inst.

PH 784: Social Policy as Health Policy (3 credits)
This course examines how social policies, including education, income re-distribution, and housing shape population health. A broad overview of the social determinants of health is introduced/reviewed and current knowledge of the impact of social policies on health and health disparities is evaluated through readings, class discussions, and writing assignments. Prereq: grad st; B- or better in PH 759 or cons inst.

PH 785: Principles of Public Health Economics (3 credits)
This course introduces the basic principles of microeconomics, and its application to examining public health policy issues. Basic economic concepts including supply and demand, market failure, efficiency, incentives, externalities, and moral hazard as applied to public health and health care are examined. Principles of economic evaluation are introduced. Prereq: grad st; PH702 and (PH759 or PH777), or cons of inst.

PH 786: The Science and Policy of Sustainable Diets (3 credits)
Introduces students to the connections between dietary choices, environmental sustainability, and public health. Discusses and evaluates multiple policy approaches to the promotion more environmentally sustainable dietary choices. Prereq: grad st; PH 705 or cons inst.

PH 787: Public Health Perspectives on the Private Sector (3 credits)
This seminar explores the relationship between the private sector and public health. Through examination of case studies, students consider corporations’ dual role as both a driver of and a barrier to population health, the rise of public-private partnerships, corporate social responsibility, and approaches to reforming corporate practices. Prereq: grad st; PH 705 or cons inst.

PH 790: Field Experience in Public Health (1-6 credits)
Apply skills learned in the classroom to real world public health problems in a mentored field placement, engaging both faculty and site preceptors. Prereq: grad st; PH 701(P), PH 702(P), PH 703(P), PH 704(P), PH 705(P), PH 706(P), and PH 707(P) or cons instr.
PH 800: Capstone in Public Health (2 credits)
Application of acquired public health knowledge, experience and competencies in developing a public health project that demonstrates readiness for professional practice. Prereq: grad st; PH 790(P) or cons instr

PH 820: Maternal and Child Health Foundations, Policy, and Practice (3 credits)
The foundations of MCH, historical context, financing, challenges, and opportunities in advancing MCH at state, national and international level including the integration of men. Prereq: grad st; PH 702(P), 704(P) or cons instr

PH 867: Intermediate Epidemiological Theory and Analysis (3 credits)
This course utilizes readings, lecture, and hands-on data analysis to reinforce and build upon epidemiological concepts relevant to drawing inferences from human population data. Students will complete a data analysis project using the statistical package SAS. Concepts of data visualization and identifying and addressing threats to validity will be emphasized. Prereq: grad st; PH 702, PH 704, and (PH 759 or PH 711), or consent of instructor

PH 868: Links between Infectious and Chronic Disease (3 credits)
This course will outline the historical overview of the epidemiologic transitions that have shaped the linkage of infectious and chronic disease over time and students will incorporate sociological, epidemiological and biological frameworks to the examination of the epidemiologic evidence linking infections to various chronic disease outcomes and write a mini-study proposal. Prereq: grad st; PH 704, PH 758 and PH 759 or cons instr.

PH 740: Special Topics in Public Health (3 credits)
Topics of current interest in public health. May be repeated w/ chg in topic to 9 cr max. Prereq: grad st

PH 999: Independent Study (1-3 credits)
Independent study on a topic not available as a regular course, directed by a member of the graduate faculty. Prereq: grad st; cons intr.
Master of Public Health Advising
Approved by the Graduate Program Committee, May 13, 2014
Note that changes to add Field Experience and Capstone Advisor responsibilities not yet approved

A. Description

Each Master of Public Health (MPH) student will be assigned a track-specific Faculty Advisor during Orientation week preceding the first semester. Faculty Advisors assist the student in the development of an individual Plan of Study designed to advance the career goals of the student and consistent with track curricula.

UWM’s Zilber School recognizes the importance of a strong faculty advising program coupled with a sound system for monitoring student progress in all programs. A school wide student evaluation each semester assesses progress and ensures that students are on track for graduation. Feedback in December to students will be through Faculty Advisors, while students will receive a letter in May signed by the Faculty Advisor and program director confirming progress and noting any guidance for the second year, including plans and timetable for remediation when necessary.

Administrative offices of the Zilber School of Public Health have staff assigned on policies and procedures for admission, academic progression, and graduation. If deemed necessary, any student can petition to the Zilber SPH’s Office of Academic and Student Affairs for a reassignment of Faculty Advisor. Program track faculty will make every effort to accommodate requests to give all students opportunities for success in the program.

B. Roles and Responsibilities

Faculty Advisor Academic Advising Responsibilities
Faculty Advisors in the MPH program are responsible to meet at least once per semester with each MPH Advisee. They should respond to student inquiries within three business days and make an effort to accommodate requests from MPH Advisees between these biannual meetings.

A Faculty Advisor helps an MPH student plan a course of study that aligns core and track curricula requirements, the Zilber School of Public Health Three Year Curriculum Grid, and planned Schedule of Classes with student-specific interests and scheduling needs. To perform these duties, it is necessary to understand the MPH Program of Study, including how often and when classes will be offered. Other regular academic advising requests triaged by Faculty Advisors include course equivalencies, elective approvals, Requests for Exception, transfer...
requests, etc.

In addition to serving as the first point of contact for MPH Advisees, the Faculty Advisor monitors student progress and development. Advisors conduct an informal review at the end of Fall semester to make sure students are “on track” for the following semester. This review is conducted in an expedited manner during a regularly scheduled track meeting in January of each year, and the Faculty Advisor should be prepared to report on the progress of MPH Advisees. It is the responsibility of the Faculty Advisor to provide informal feedback to students in good standing at this time. For students who are experiencing significant difficulties or who are not making sufficient progress, the Faculty Advisor must draft a formal letter that should outline plans for remediation and setting deadlines. In these rare cases, the Faculty Advisor coordinates the co-signatures of the designated track lead and Chair of the GPC, mails the letter, and copies the Graduate Program Office, which keeps a copy of the letter in the Advisee’s student file.

The Advisor also conducts a formal annual review in the Spring semester. To facilitate the annual review, Faculty Advisors review the Advisee’s Student Self-Evaluation Progress Report and unofficial transcript during a face-to-face meeting towards the end of the Spring semester. The faculty advisor then completes a Student Progress Summary Form. The Advisor sends the completed form to the student via email and after one week, the Faculty Advisor turns in both forms to the Graduate Program Office, along with any additional appendices from the student.

The Advisor is also involved in developing the student’s Field Experience and mentoring them in the capstone. The advisor is encouraged to communicate goals for a particular student’s Field Experience to the Field Experience Coordinator and the Field Experience Course Instructor. The Faculty Advisor guides the student in the development and submission of Institutional Review Board documentation, as needed. During the Field Experience, Faculty Advisors may consult with a student to develop skills the student has not yet learned in the classroom (e.g., a particular statistics software, advise on program evaluation, etc.). The Faculty Advisor also reviews the student’s project and recommends a grade for the student to the Field Experience Course Instructor. The Faculty Advisor may meet and correspond with the Site Preceptor throughout the student's Field Experience.

The PH 800 Capstone in Public Health seminar requests the Faculty Advisor’s participation as follows:

1. Provide guidance to the student, as needed, in the development of the Capstone Project.
2. Review and approve the Capstone Project proposal.
3. Grade the Capstone Project paper to assess competencies in specific areas. Submit grade to course instructor.
The Advisor agrees to be prepared for the student meetings and conduct them in a professional and collegial manner.

**MPH Student Responsibilities in the Advising Relationship**

MPH students are responsible to meet at least once per semester with their Faculty Advisors. They should respond to Advisor inquiries within three business days and make an effort to accommodate requests from their Advisors to meet between these biannual meetings. Students should view the Faculty Advisor as a resource and first point of contact to develop an individual Plan of Study and to answer other academic and career-related questions.

Students will participate in the Fall and Spring evaluations with their advisors. For the formal Spring evaluation, students will fill out a self-evaluation progress report and meet with their Advisor to review it towards the end of the Spring semester. MPH students are responsible to bring to this meeting the Student Self-Evaluation Progress Report and an unofficial transcript, which students can obtain via PAWS. When the student receives the Student Progress Summary Form via email, if the student agrees with the written summary, the student will co-sign it and return it to the Faculty Advisor within one week. If a student does not agree with the summary, or perceives inaccuracies in the information upon which it is based, or does not wish to comply with the recommendations/requirements of his or her Advisor, he or she may append comments to the summary. The student is responsible to respond within one week.

The Student agrees to be prepared for the advisor meetings and conduct themselves in a professional and collegial manner.
Time Limit
The student must complete all requirements for the degree within five years of the date of initial enrollment in the program.

Graduation
The Graduate School administers graduation for all graduate students. Here are steps to follow during the semester you expect to graduate:

1. Enroll for a minimum of 1 graduate credit (audit not allowed). If you have met all academic and credit requirements, or if you have reached your thesis credit limit, you may enroll in course 888, "Candidate for Degree," if your program offers it. This course does not add to your credit total, apply to your degree, or affect your GPA. You are assessed the equivalent of one credit in fees and receive a grade of S.

2. Apply for graduation by the posted deadline for the semester in which you intend to graduate. Complete the Master's Graduation Application and submit it electronically. Applications do not carry forward; you must re-apply if you did not graduate in the semester you anticipated.

3. Pay the non-refundable $40 graduation fee, billed by the Bursar's Office during the semester.

4. Obtain commencement information from the Secretary of the University (Web site, secofunv@uwm.edu, 229-4163). Ceremonies are optional and are held in May and December; August graduates are invited to the December ceremony. You can order graduation regalia on the Web site as well.

If you want your name to appear in the commencement bulletin, be sure that your directory information with the University is not restricted. If you restricted the release of your address, phone number, and other limited information, contact the Department of Enrollment Services Information Center, Mellencamp 274. This should be done by the second week of the semester in which you expect to graduate to ensure that your name will appear in the bulletin.

Removal of the restriction will allow your directory information to be released for all publicity purposes, as well as the commencement booklet.
Graduation Review and Approval

The Graduate School reviews your record to ensure that you will have fulfilled degree requirements at the end of the current semester. Graduate School minimum graduation GPA requirement is a cumulative 3.0 (4.0 basis).

Your graduation application is then forwarded to your graduate program unit for its recommendation and approval. When your graduate program unit has reviewed and approved your application, it is returned to the Graduate School.

You cannot graduate with Incomplete, Not Reported, or Progress notations remaining on your record. Transcripts and diplomas cannot be released until Hold notations are cleared. The Graduate School has the final authorization to grant the degree.

If you do not graduate when anticipated, you must re-apply to graduate in the next semester, but a second graduation fee is not required.

Diploma

Diplomas and a copy of an official transcript will be mailed to your address listed on PAWS approximately 8 to 10 weeks after the official degree conferral date. Your name on your diploma will be printed exactly as it exists on your university records. Changes to your name must be made in Mellencamp 274 at least one month before graduation; a fee will be assessed for name changes requested after diplomas have been ordered.

If you have a hold on your record, you must clear it before these documents will be mailed.
Section III: The PhD in Environmental Health Sciences Program
Description
The program in Environmental Health Sciences offers graduate study leading to the doctoral degree. Laboratories and equipment are available across campus to promote innovative concepts in issues of Environmental Health Sciences.

Faculty for this program are drawn from a number of departments and research units at UWM, affording the student an unparalleled opportunity for cross-disciplinary training and the performance of novel research projects. For a complete list of faculty, visit the online Graduate Bulletin.

The PhD in Environmental Health Sciences (EHS PhD) requires 64 credits beyond the Bachelor's degree. In addition to the PhD Common Core Coursework, credits include required concentration coursework (16 credits), “S”electives (at least 12 credits), and the remaining credits taken as research. Electives are divided into three categories: molecular, organismal, population/environment. See the below table for a list of EHS PhD requirements.
Competencies

1. Apply public health science theories, principles, and methods when developing and implementing public health programs and research.
2. Correlate issues of population diversity and social justice with principles of environmental and occupational health.
3. Describe the major environmental and occupational agents and their effects on human populations and the environment.
4. Describe genetic, physiologic, and environmental factors that affect susceptibility to adverse health outcomes following exposure to common hazards.
5. Explain current environmental risk assessment methods.
6. Describe approaches for detecting, preventing, and controlling environmental hazards that pose risks to human health and safety.
7. Identify the general mechanisms and/or modes of action of agents in creating an adverse response to environmental exposures via various routes and doses.
8. Develop an original hypothesis and design research studies to test it, and then conduct appropriate research and results synthesis to produce a definitive result.
9. Demonstrate acceptable skills in scientific writing and oral presentation, to both scientific audiences and the general public.
10. Demonstrate knowledge of relevant literature for a selected area of study including identification of knowledge gaps.

Curriculum and Courses: EHS PhD Coursework

**Required EHS Concentration Coursework (6 credits)**

- PH 705  Principles of Public Policy and Administration  3
- PH 743  Environmental Risk Assessment  3
- PH 750  Environmental Health Seminar (1 credit, taken twice)  2
- PH 821  Advanced Survey of Environmental Health  3
- PH 822  Molecular and Cellular Basis of Environmental Disease  3
- BIO SCI 750  Scientific Writing  2

**Molecular Level “S”electives (Choose at least one course for at least 3 credits)**

- PH 775  Mechanisms of Infect Disease  2
- BIO SCI 529/540  Molecular Biology of Micro-Organisms  3
- BIO SCI 564  Eukaryotic Gene Regulation  3
- BIO SCI 700  Principles in Molecular Biology  4
- CHEM 601  Biochemistry: Protein Structure and Function  3
- CHEM 602  Biochemistry: Cellular Processes  3
- CHEM 604  Biochemistry: Metabolism  3
- CLS 590  Public Health Nutrition and Food Politics  3
- CLS 615  Cellular and Molecular Toxicology  3
- CLS 733  Molecular Epidemiology  3

Residence Requirements
The student must complete 8 to 12 graduate credits in each of two consecutive semesters, or 6 or more graduate credits in each of three consecutive semesters, exclusive of summer sessions. Residence requirements cannot be met at the master’s level.

Time Limit
The student must complete all requirements for the degree within 10 years of the date of initial enrollment in the program

PhD Advisory Committee
The student, in consultation with the Major Professor, will select four additional members to form a PhD Advisory Committee. A minimum of three committee members must be EHS program faculty. See the Graduate School Doctoral Requirements page for more information on the doctoral committee.

Qualifying Examination
During the end of the second semester of enrollment, a student must pass a brief qualifying exam. The duration of this exam is 90 minutes. The student gives an oral synopsis/self-evaluation of his/her first year in the program and describes highlights from his/her coursework. An academic advisory committee then evaluates if the student has demonstrated a knowledge base in public health that was to be firmly established in the first year of coursework. As this exam will be offered for the first time in Spring 2016, the grading rubric will be established by the end of the Fall 2015 semester in alignment with PhD program competencies. The academic advisory committee in conjunction with the student also maps any remaining coursework that needs to be completed by the end of the third of year in the program. Students failing this important first exam will not be allowed to continue in the program and will forfeit their TAship, PAship, or RAship, if applicable.

Preliminary examination
This examination must be taken no later than the end of the third year of study. In order to take the preliminary exam, all formal coursework must be completed with a GPA of 3.0 or higher. The preliminary examination consists of two parts: written and oral.

The written portion of the examination is designed as a grant proposal suitable for a major federal funding agency, such as NIH or NSF. This written proposal serves as the student’s dissertation proposal. In keeping with the NIH/NSF grant proposal formats, the proposal must include sections for Specific Aims, Significance, and Innovation, and each aim must include justification, feasibility, preliminary data, research strategy, expected outcomes, and potential pitfalls and alternative explanation section headings. A strong and relevant hypothesis should be stated, and the work should show evidence of a mastery of the literature in relation to the dissertation topic area. The dissertation proposal is to be no more than 12 pages single-spaced, and it must be turned in two weeks prior to the scheduled oral portion.
The oral portion of the examination is broken into two subparts: oral proposal and oral defense. The proposal phase consists of the student presenting his/her dissertation proposal to the examining committee. The student is evaluated on the clarity of the presentation, quality of the materials presented, and the logic and creativity of the proposal. The role of the examination committee is to evaluate both the written and oral presentations in detail, probing the student’s knowledge of the dissertation topic.

A student who fails the doctoral preliminary examination will be dismissed from the program. Conditions exist to give a second chance to a student whose written proposal is unsatisfactory. The Zilber School adheres to all Graduate School policies and procedures to log milestones of doctoral study. Visit the Graduate School website for more information.

There are two parts to the evaluation process for the Dissertation Preliminary Examination. If a student receives a letter grade of Unsatisfactory (U) while enrolled in research for credit, he/she will be dismissed from the program. If the student is receiving funding in the form of a TAship, PAship, or RAship, that funding shall be forfeited immediately.

The assessment rubric outlines the evaluation process for the exam itself, which consists of three parts. For the first part, students write a grant proposal/dissertation proposal suitable for a major federal funding agency, such as NIH or NSF. Evaluation criteria include a strong and relevant hypothesis, mastery of the literature for the dissertation topic, solid organization of the proposal sections, clarity of writing, and overall logic and creativity of the proposal.

The Dissertation Preliminary Examination has two oral components. In the first part, the student presents the proposal to the committee. The committee uses the rubric below to evaluate the student’s knowledge of discipline-specific and subject matter concepts within Environmental Health Sciences, clarity of the presentation, ability to synthesize information, originality of the proposal, and feasibility of the research.

The second oral component focuses on the student’s knowledge of public health as reflected in all the doctoral coursework. Using the rubric cited below, the evaluation process consists of assessing the integration and synthesis of broad EHS doctoral competencies (see Appendix B in IX. Supplementary Documentation, A.) through all the coursework as well as clarity and organization of presentation. A student who fails the doctoral preliminary examination will be dismissed from the program.

**Assessment Rubric for the Dissertation Preliminary Examination**

**Evaluation Criterion (Scale of 1-5)**
A score of 5 exceeds expectations
A score of 3 meets expectations
Anything below a score of 3 does not meet expectations.

- Did the student demonstrate an integrated knowledge of Public Health?
- Did the student demonstrate knowledge of discipline specific concepts within Environmental Health Sciences as well as the subject matter in the specific proposal?
- Did the student demonstrate good communication skills, both written and oral?
- Did the student demonstrate an ability to synthesize information clearly?
- Were the ideas put forth in the proposal original ideas that could ultimately culminate in a PhD thesis?
- Are the experiments proposed doable at UWM/Zilber School of Public Health?

**Dissertation Defense**

The dissertation is the culminating project of about three years of directed research in an EHS-sponsored laboratory. Part of the faculty’s evaluation process at this stage includes a review of the student’s conference presentations and publications. EHS doctoral students are expected to present their research findings at local, regional, national, and/or international meetings at least once before the dissertation defense. Examples of meetings include the American Public Health Association (APHA), Society of Toxicology (SOT), Society for Neuroscience (SFN), American Society of Microbiology (ASM), and Society of Environmental Toxicology and Chemistry (SETAC). While a journal publication is not required prior to the dissertation defense, it is strongly encouraged.

EHS faculty use the rubric below in their evaluation process for this last milestone. The dissertation committee is evaluating both the oral defense and the written product. The committee assesses the student’s clarity of presentation, ability to answer questions during both the public and private portions of the defense, knowledge of the subject matter, ability to synthesize information, originality of ideas, appropriateness of experiments, and clarity of writing.

**Assessment Rubric for the Dissertation Defense**

**Evaluation Criterion (Scale of 1-5)**

A score of 5 exceeds expectations
A score of 3 meets expectations
Anything below a score of 3 does not meet expectations

§ Did the student demonstrate an integrated knowledge of Public Health?
§ Did the student demonstrate knowledge of discipline specific concepts within Environmental Health Sciences as well as the subject matter in the specific proposal?
§ Did the student demonstrate good communication skills, both written and oral?
§ Did the student demonstrate an ability to synthesize information clearly?
§ Were the ideas/results put forth in the thesis original ideas with no duplication with previous studies?
§ Was the science/experimental methodology presented performed appropriately?
§ Will the data chapters in the thesis document be able to be converted into manuscripts, if they have not been published prior to the thesis defense?

Dissertator Status
Specific requirements which must be completed before a doctoral student qualifies for dissertator status are described on the Graduate School Doctoral Requirements page. 

Dissertation
Doctoral students should be aware that the research component is extremely important and requires significant time allocation. A full-time commitment is required to complete this critical component of the degree. Successful doctoral students in our EHS program should anticipate working long hours, including on weekends, winter intersession and summer months. Students are also expected to enroll in, and successfully complete research credit. Six or more of these research credits must be obtained at the level of dissertator.

All successful doctoral students must prepare and successfully defend a dissertation reporting the results of their research. A full time student who does not pass the dissertation defense within six years of admission may be required to take another preliminary examination and be readmitted to the program.

Graduation
The Graduate School administers graduation for all graduate students. To graduate in the semester you applied for, you must meet these deadlines:

1. Apply for graduation by the posted deadline for the semester in which you intend to graduate. Submit the Application for Doctoral Graduation to the Graduate School. Applications do not carry forward; you must re-apply if you did not graduate in the semester you anticipated.
2. At least two weeks before the graduation ceremony date: Hold the dissertation defense.
3. Submit your final dissertation by the posted submission deadline

Submission to the Graduate School must include:
• An electronic submission of the thesis through ProQuest ETD Administrator. More information on the submission process found on the UWM ETD Web site.
• Thesis & Dissertation Approval and Publishing Options Form with an original signature from you and your major professor.
• Complete the online Survey of Earned Doctorates

If any of these deadlines are not met, you must apply and graduate in the next semester. You will not be required to register for the next semester if the dissertation has been defended, passed, and accepted by the Graduate School before the first day of classes for the next semester. The date of graduation, however, will be the next semester.

If you want your name to appear in the commencement bulletin, be sure that your directory information with the University is not restricted. If you restricted the release of your address, phone number, and other limited information, contact the Department of Enrollment Services Information Center, Mellencamp 274. This should be done by the second week of the semester in which you expect to graduate to ensure that your name will appear in the bulletin.

Removal of the restriction will allow your directory information to be released for all publicity purposes, as well as the commencement booklet.

Graduation ceremonies are held in May and December. August graduates attend the December graduation ceremony.

About one month before graduation, all eligible degree candidates will receive a letter from the Secretary of the University’s office containing the date, location, and time of the ceremony, as well as information on ordering caps and gowns. Any questions about the commencement ceremony should be directed to the Secretary of the University.

Diploma
Diplomas and a copy of an official transcript will be mailed to your address listed on PAWS approximately 8 to 10 weeks after the official degree conferral date. Your name on your diploma will be printed exactly as it exists on your university records. Changes to your name must be made in Mellencamp 274 at least one month before graduation; a fee will be assessed for name changes requested after diplomas have been ordered.

If you have a hold on your record, you must clear it before these documents will be mailed.
Section IV: The PhD in Public Health Program
Description

Beginning in Fall 2016, the Zilber School of Public Health offers a Master of Public Health (MPH), a PhD in Public Health with Concentrations in Biostatistics and Community and Behavioral Health Promotion, and a PhD in Environmental and Occupational Health (to be renamed PhD in Environmental Health Sciences as of Fall 2015).

Students will choose between two concentrations in the PhD in Public Health offered by UW-Milwaukee’s Joseph J. Zilber School of Public Health. The two concentrations share a common core of four courses for a total of 12 credits toward the required course work. Students in the Concentration in Biostatistics will select an elective to replace the introductory biostatistics course, as they will likely enter the program having already completed that level. The following sections describe each concentration in more detail.

Concentration in Biostatistics

The Biostatistics doctoral program is designed to train students in the development of techniques, methods and tools to conduct public health research using rigorous statistical, bioinformatics and general quantitative methods. Faculty interest areas include: bioinformatics, statistical genetics, network analysis, causal inference, biostatistical methods, and high throughput computing.

Students entering the program will be trained at the graduate level in the analysis of data from genetics and genomics, electronic medical records, and population-based epidemiological studies. Such research will include approaches requiring large populations, large data sets, and as needed, the collection, processing and analysis of data used in the pursuit of improving the public’s health. Graduates of this program will be able to participate and execute the study design, data collection, analysis and dissemination of results. Technical areas include database management, causal inference, network analysis, medical and population genetics, as well as tools and techniques for acquiring, processing, warehousing, and analyzing public health data. Other areas of expertise include data mining, computer-based decision support systems, statistical genetics, and computational biology. The PhD in Public Health with a concentration in Biostatistics requires 69 course credits beyond the Bachelor’s degree. Course work includes core courses as outlined below, methods courses, electives, and credits taken as doctoral research.
Concentration in Community and Behavioral Health Promotion (CBHP)
The Community and Behavioral Health Promotion (CBHP) doctoral program is designed to train students in social and behavioral science aspects of public health research and intervention with a particular emphasis on the development of community-level interventions. Faculty interest areas include: maternal, infant, and child health; health disparities; obesity; nutrition; food security; HIV and STD prevention; adolescent health; violence prevention; substance abuse prevention; creating healthy environments; and promoting mental health.

Students entering the program will be trained at the graduate level in health promotion from a public health perspective. Students will also have exposure to other key areas of public health (environmental health, epidemiology, biostatistics, and policy and administration), which will allow them to be integrated into the broader public health profession upon graduation. The PhD in Public Health with a concentration in CBHP requires 69 course credits beyond the bachelor’s degree (as of Fall 2015). Course work includes core courses as outlined below, research and methods courses, electives, and credits taken as pre-dissertation research supporting CBHP faculty research. In addition, students will prepare for public health leadership through their own original research.

Student research in community and behavioral health promotion may focus on the social and behavioral determinants of disease and injury, the interaction of social and behavioral factors with other disease susceptibility or health promoting factors, or on interventions that seek to improve health through social and behavioral strategies within a community.

The PhD programs in both concentrations align with UWM’s mission to further academic opportunities at all levels for women, minority, part-time students, and financially or educationally disadvantaged students. In addition, the program consistently strives for diversity within its faculty ranks to achieve the University’s goal for cultural competency in teaching and learning.
Competencies
Upon graduation, a student completing the requirements for the PhD in Public Health with a concentration in Biostatistics will be able to:

1. Develop new statistical methodologies to solve problems in biomedical, clinical, public health, or other fields
2. Contribute to the body of knowledge in the field of biostatistics by writing and successfully submitting manuscripts for publication in a peer-reviewed journal
3. Perform all responsibilities of a statistician in collaborative research; in particular: design studies, manage and analyze data and interpret findings from a variety of biomedical, clinical or public health experimental and observational studies
4. Communicate statistical information effectively with individuals with varying degrees of statistical knowledge through written and oral presentations
5. Use statistical, bioinformatic and other computing software to organize, analyze, and visualize data
6. Review and critique statistical methods and interpretation of results in published research studies, presentations, or reports
7. Demonstrate solid theoretical knowledge necessary for the development and study of new statistical methods.
8. Understand and implement modern statistical approaches emerging in the literature to improve biomedical and public health

Upon graduation, a student completing the requirements for the PhD in Public Health with a concentration in Community and Behavioral Health Promotion will be able to:

1. Identify individual, organizational, community, and societal influences on health, health behaviors, disease, injury, illness, and disability
2. Develop, implement, and evaluate behavioral and structural interventions to prevent disease and injury, alleviate illness and disability, improve the quality of life, and reduce health disparities
3. Conduct and disseminate rigorous and innovative social and behavioral science research of relevance to public health
4. Serve as an expert social and behavioral scientist on a collaborative team of public health investigators
5. Appreciate the history and philosophy of public health, health behavior, health education, and health communication as well as understand similarities and differences of these disciplines from other social science disciplines
Curriculum and Courses
The concentrations in Biostatistics and CBHP require the same core PhD courses (12 credits). The credits and courses are described below for each concentration.

Concentration in Biostatistics
Minimum degree requirement is 60 graduate credits beyond the bachelor's degree (plus an additional 9 credits dedicated toward dissertation writing and research), at least 35 of which must be earned in residence at UWM. The student, in consultation with the major professor, must create a plan of study and submit to the Biostatistics Faculty by the end of the first year. Minimum course requirements for all work requires approximately two to three full years of study.

**Required Core PhD Courses, 12 credits**
PH 702 Introduction to Biostatistics, 3 cr**
PH 704 Principles and Methods of Epidemiology, 3 cr
PH 801 Seminar in Public Health Research, 3 cr
PH 819 Social and Environmental Justice in Public Health, 3 cr
** It is expected that PH 702 will be waived for the majority of PhD students based on prior training, and an additional elective will be substituted

**Required Methods Courses, 27 credits**
MTHSTAT 761 Mathematics Statistics, 3 cr
MTHSTAT 762 Mathematical Statistics, 3 cr
MATH 571 Introduction to Probability Models, 3 cr, or MATH 771 Theory of Probability, 3 cr
PH 711 Intermediate Biostatistics, 3cr
PH 8XX Generalized Linear Models, 3cr
PH 8XX Practice of Biostatistical Consulting, 3cr
PH 718 Data Management and Visualization in R, 3cr
PH 8XX Statistical Computing, 3cr
PH 713 Analyzing Observational and Experimental Data, 3cr

**Electives, at least 21 credits**
PH 710 Seminar in Biostatistics and Bioinformatics, 1cr (TBD)
PH 714 Statistical Genetics and Genetic Epidemiology, 3cr
PH 715 Applied Categorical Data, 3cr
PH 716 Applied Survival Analysis, 3cr
PH 717 Applied Longitudinal Data Analysis, 3cr
PH 720 Special Topics in Biostatistics, 3cr
PH 721 Introduction to Translational Bioinformatics, 3cr
PH 723 Design, Conduct and Analysis of Clinical Trials, 3cr
PH 758 Social Epidemiology, 3cr
PH 762 Environmental Epidemiology, 3cr
PH 768 Cancer Epidemiology, 3cr (TBD)
PH 769 Nutritional Epidemiology, 3cr (TBD)
PH 7XX Introduction to Bioinformatics in Biomedical and Public Health Sciences, 3cr (TBD)
PH 8XX Statistical Learning, 3cr (TBD)
PH 8XX Network Analysis, 3cr (TBD)
PH 8XX Causal Inference, 3cr (TBD)
CompSci 708 Scientific Computing
CompSci 711 Pattern Recognition - Statistical, Neural, and Fuzzy Approaches, 3cr
BIOL 597 RNA structure, function, and metabolism, 3cr
BIOL 490 Molecular Genetics, 3cr
MTHSTAT 564 Time Series Analysis, 3cr
MTHSTAT 565 Nonparametric Statistics, 3cr
MATH 768 Applied Stochastic Processes, 3cr
MTHSTAT 863 Hypothesis Testing, 3cr
MTHSTAT 869 Advanced Topics in Mathematics Statistics, 3cr

Doctoral Thesis at least 9 credits
PH 990 Research and Dissertation, 3cr. repeatable

Concentration in Community and Behavioral Health Promotion
A minimum of 69 credits of coursework beyond the bachelor's level must be completed to earn the degree, at least 35 of which must be earned in residence at UW-Milwaukee. The course list consists of required common PhD core courses, CBHP core courses, research and methods courses, and elective courses. Also, students will be required to complete three credits of supervised research under the tutelage of the primary advisor prior to the required dissertation research requirement. This is to ensure that all students obtain hands-on, supervised research training. After achieving dissertator status, students will enroll in three research credits per semester for at least three semesters.

The PhD is the highest degree awarded in the field of public health and dissertation is expected to demonstrate an extraordinarily high level of knowledge, expertise and originality. Students are required to register for a minimum of 9 credits for dissertation, but a high quality dissertation will likely require much more than the time equivalent of 9 credit hours. Given the vast differences between students and the types of research that qualify as dissertation research, it is impossible to predetermine a necessary amount of time. Expectations regarding the level of difficulty of the dissertation will be addressed at the time of the dissertation proposal.
The assemblage of elective courses is not exhaustive but reflects a starting point for the new program. With few exceptions, all of the courses are graduate-level courses. Those that are designated as Undergraduate/Graduate (U/G) classes are taught at the level of advanced undergraduate students, but include additional material and assignments consistent with graduate-level curricula. Zilber School of Public Health faculty will continue to expand the choice of elective courses as future programs develop.

In addition to regular coursework and research, doctoral students are expected to attend monthly seminars. ZSPH hosts the seminar series, "On Public Health," regularly during the lunchtime and evening hours. The seminar series provides doctoral students the opportunity to meet with ZSPH faculty and affiliated Center scientists who will present on critical public health-related research and new developments in all areas of public health. Seminars are free and open to the public. Students must regularly attend the On Public Health series in-person or remotely to successfully progress in the PhD program.

**Common Required PhD Courses (12 cr.)**
- PH 702 Introduction to Biostatistics, 3cr.
- PH 704 Principles and Methods of Epidemiology, 3 cr.
- PH 801 Seminar in Public Health Research, 3 cr.
- PH 819 Social and Environmental Justice in Public Health, 3 cr.

**CBHP PhD Required Core Courses (18 cr.)**
- PH 725 Theories and Models of Health Behavior, 3 cr.
- PH 727 Program Planning & Implementation in Public Health, 3 cr.
- PH 820 Maternal and Child Health Foundations, Policy and Practice, 3 cr.
- PH 826 Principles of Community Intervention Research, 3 cr.
- PH 831 Community Engagement and Participatory Research Approaches in Public Health, 3 cr.
- PH 919 Core Seminar in Community and Behavioral Health Promotion (TBD)

**Research and Methods Required Courses (18 cr.)**
- PH 827 Research Design in Community and Behavioral Health Promotion, 3 cr.
- PH 736 Advanced Qualitative Methods, 3 cr. (TBD)
- PH 728 Program Evaluation in Public Health, 3 cr.
- PH 729 Survey Research Methods in Public Health, 3 cr.

Choose one of the following:
- PH 711 Intermediate Biostatistics, 3 cr.
- PH 759 Applied Quantitative Methods for Studying Population Health and Health Disparities, 3 cr. (TBD)
- PH 823 Applied Methods & Analysis in Public Health Research (TBD)
SOC WRK 962 Applied Multiple Regression Analysis, 3 cr.

Choose one of the following:
- PH 715 Applied Categorical Data Analysis, 3 cr. (TBD)
- PH 716 Applied Survival Analysis, 3 cr. (TBD)
- PH 717 Applied Longitudinal Data Analysis, 3 cr. (TBD)
- SOC 982 Advanced Quantitative Analysis, 3 cr.
- ED PSY 823 Structural Equation Modeling, 3 cr.
- ED PSY 826 Analysis of Cross-Classified Categorical Data, 3 cr.

**CBHP Elective Courses (9 cr.)**
- ANTHRO 803 Survey of Cultural Anthropology, 3 cr.
- ANTHRO 744 Theories of Social Action: Understanding Agency & Social Structure, 3 cr.
- PH 758 Social Epidemiology, 3 cr.
- PH/HS 917 Seminar in Health Outcome Assessment, 3 cr. (TBD)
- PH 734 Public Health and Mental Health, 3 cr. (TBD)
- PH 768 Cancer Epidemiology, 3 cr. (TBD)
- PH 769 Nutritional Epidemiology, 3 cr. (TBD)
- SOC 917 Sociology of Inequality, 3 cr. (TBD)
- SOC 982 Advanced Quantitative Analysis, 3 cr.
- SOC 715 Systematic Sociological Theory, 3 cr.
- GEOG 725 Advanced Geographic Information Science: Geographic Modeling, 3 cr.
- GEOG 734 GIS and Society, 3 cr.
- SOC WRK 705 Individual Behavior and Social Welfare, 3 cr.
- ED POL 711 Community Organizing: Collective Action for Social Change: (Subtitled), 3 cr.
- KIN 732 Physical Activity and Health Across the Lifespan, 3 cr.

Other electives may be considered

**Pre-Dissertation Research (3 cr.)**
- PH 990 Research and Dissertation, 3cr.

**Doctoral Thesis (minimum 9 cr.)**
- PH 990 Research and Dissertation, 3cr repeatable.
Preliminary/Qualifying Exam Process

Students in both concentrations for the PhD in Public Health must pass a qualifying exam. The process for each concentration is described below. The qualifying exams must be successfully completed within five years of initial enrollment in the PhD program.

Concentration in Biostatistics

Students must successfully complete a preliminary examination process before formally achieving dissertator status. When the student is sufficiently prepared, a doctoral preliminary examination to determine the student's knowledge and achievement is taken. The exam evaluates the student's general knowledge of mathematical statistics, and general biostatistical and quantitative methods. Students must pass this examination to continue in the program. With permission of the examination committee, the student may repeat this examination once within one year. After successful completion of the qualifying process, the student will concentrate on the development of the dissertation.

Concentration in CBHP

The preliminary exam is designed to assess a student's mastery of knowledge and skills to ensure adequate preparation for individual dissertation research. Students taking the preliminary exam are expected to demonstrate knowledge, competency and mastery of core public health concepts, issues and content relevant to the CBHP PhD Program. The preliminary exam consists of three sections: an open book integrative review, a closed book exam focusing on a case study, and an oral exam. (Please refer to the CBHP Qualifying Exam Policies and Procedures.) At the discretion of the examining committee, a student who fails the qualifying process may be allowed one additional attempt with all or part of the examination. After successful completion of the qualifying process, the student will concentrate on the development of the dissertation.

Dissertation Proposal Hearing

In consultation with his or her primary faculty advisor, the dissertator will develop a dissertation research plan and form a dissertation advisory committee. The composition of the dissertation committee must be in compliance with the rules and regulations of the Graduate School. The dissertator then submits a written dissertation plan to be reviewed and formally approved by the dissertation advisory committee. The research plan must clearly outline the student’s obligation for completing an original piece of work of sufficient quality, which is to be determined by the committee. The review and approval process will include a formal presentation to the committee.
Dissertation

Upon approval of the dissertation proposal, students will proceed with an original and significant research investigation under the supervision of their major professor, culminating in a written dissertation. As a final step toward the degree, the student must pass an oral examination in defense of the dissertation.

Dissertation Defense

The dissertator must, as the final step toward the degree, pass an oral examination in defense of the dissertation. The dissertation defense will be publically announced and open to the academic community. Once the defense is completed, students will be encouraged to revise their dissertation and submit it for publication.

Once the committee has formally approved the dissertation document and the oral defense, and the Chair of the appropriate program has certified completion of all requirements, the candidate is awarded the PhD in Public Health.

Time Limit

All degree requirements must be completed within ten years from the date of initial enrollment in the doctoral program.
**Major Professor as Advisor**

The student must have a major professor to advise and supervise the student's studies as specified in Graduate School regulations. Each student will be assigned a Faculty Advisor on the basis of his or her research interests. The Faculty Advisor will typically become the student's mentor. There will be clear guidelines established for switching advisors if a mismatch occurs. The Faculty Advisor plays a critical role in a student's development as a scholar, researcher, and public health professional. Throughout their graduate student career, the Faculty Advisor will assist in the development of an individual course of study. The Faculty Advisor is also responsible for advancing the career goals of the student by supporting community collaborations, publications, presentations, and other professional activities.

The Faculty Advisor will help prepare the student for their preliminary exams and advise the student regarding his or her dissertation. If a student is not ready for the preliminary exam or the dissertation process, the Faculty Advisor will work with the student to help them prepare by addressing academic weaknesses through additional coursework, readings, or research experience. Mentors will often employ their students as research or teaching assistants or help their students find such employment. The program Faculty Advisor serves as the chair of the student's dissertation committee, and the committee as a whole provides advice about both academic and professional development student with a breadth of input. See the Graduate School [Doctoral Requirements](#) page for more information on the doctoral committee.

The Zilber SPH administrative office also has staff assigned to advise prospective and current students, related to recruitment, academic progress, and graduation.
Qualifying Exam Policies and Procedures

Introduction

The qualifying examination (QE) (aka, preliminary exam) is designed to assess a student’s mastery of knowledge and skills to ensure adequate preparation for individual dissertation research. Students taking the QE are expected to demonstrate knowledge, competency and mastery of core public health concepts, issues and content relevant to CBHP PhD program. They are also expected to demonstrate their ability to design a research project and/or evaluate a public health problem/case study. This document provides general guidance to help prepare students for their qualifying exam.

Eligibility to Sit for the Qualifying Exam (QE)

The QE must be taken either in the semester the student is completing her/his coursework or the following semester. Coursework refers to all core courses, research methods and statistics courses and advanced theory and applications courses, research credits and electives. The student’s advisor should review the coursework in the semester the student is completing his/her coursework, and the advisor should request that the CBHP program leader form an exam committee. The CBHP faculty will assign members to the QE committee. The committee will consist of 3 UWM faculty members including the student’s advisor serving as the chair of the committee. Once the committee is formed, the student must complete the electronic Application for the Doctoral Preliminary Examination, located in the online Doctoral Milestones System (http://www.graduateschool.uwm.edu/students/current/doctoral/). After the student electronically submits the form, CBHP PhD program will be notified to submit its approval. Upon approval, eligibility is validated by the Graduate School and the student will be awarded one semester of “prelim” status which permits the student to maintain full time student status with one or more graduate credits.

Preparing for the Exam

Orientation Session

A mandatory one-hour orientation session will be held each semester (either in February or September) for any students planning to take the exam. During this meeting, a timeline with exact dates will be provided and exam logistics and guidelines will be covered. Students may ask any questions about the exam’s general content and/or preparation; however, specific information about the exact content or structure of a specific semester’s exam will not be revealed.
Disability Accommodations
Students with acute or chronic physical or mental disability or problems should inform the CBHP program lead PRIOR to the exam so that proper accommodations can be made within the school and/or through University Accessibility Resource Center (http://uwm.edu/arc/getting-started/). The disability or problem should be officially documented by the Student Accessibility Office prior to the exam. Documentation is required to ensure that appropriate accommodations are made. Disabilities cannot be used to appeal the results of a failed exam unless that disability was noted prior to the exam and appropriate accommodations were not made.

The Exam

The exam consists of three sections or parts (open book integrative review, closed book exam focusing on a case study, and oral exam) as described below.

Take-Home Section
The open-book component of the exam is designed to test whether a student can critically evaluate, synthesize, and integrate a broad base of research and theory pertaining to a self-selected area of public health. Students will be asked to 1) assess the state of knowledge concerning their topic of interest, 2) critically evaluate the strengths and weaknesses of past research and theory, and 3) address the critical issues that research and theory has left unresolved, and 4) propose a conceptual approach and recommend future research that will foster new knowledge. This integrative review paper is expected to be 25-30 double spaced pages in length (approximately 6000-7500 words with 1 inch margins and 12 point Times New Roman font), excluding references, tables, and figures. The format of the paper should follow American Medical Association Manual of Style (http://guides.library.uwm.edu/c.php?g=56454&p=363108).

Students will be required to hand in two (2) hard copies and one (1) electronic copy of their integrative review to the CBHP program lead or a designated proctor of the exam by 12:00 noon on the day it is due. Late exams are not accepted.
The process is as follows:

(1) Student submits a topic (500-word abstract) to his/her exam committee. A timeline of QE submission dates will be provided yearly. A student may work with his or her faculty advisor on the proposal. The topic is expected to be relevant to the student’s desired dissertation topic.

(2) The exam committee will review the proposed topic and give the student feedback. When appropriate, the student will be asked to revise and resubmit the topic to the committee. Revision due dates will be provided in the QE timeline.

(3) The revised proposed topic will be reviewed by the committee. After approval, a student has four (4) weeks to complete the integrative review. Once approved, a student may not receive input from faculty.

(4) After the exam is completed and turned in, the committee will provide a pass/no pass grade based on a majority vote (2/3) of the committee.

While this review will likely draw on knowledge gained in coursework, the submitted paper must constitute original work. It should not be recycled text from previously submitted papers. The submitted document must reflect in-depth, critical, and independent thought and analysis of the current state of the science in the selected domain.

**In-School Section**

The in-school section will be administered in accordance with the QE timeline. This component is a 5-hour in-school, closed-book written exam designed to test the student's ability to use CBHP knowledge and skills to address public health issues. More specifically, students will be asked to critically evaluate and/or propose a solution to a case study problem. Students are expected to demonstrate their skills in "translational" scholarship, defined as the capacity to integrate public health research and practice, through their analysis of the problem and their capacity to propose creative and practical solution(s). The case study and a series of questions will be provided to the student when they arrive for the exam.

Case study topics may vary across students taking the exam in the same semester. Students should not expect that they will be tested on a case study topic that perfectly matches their area of research interest. Rather, they should prepare to apply their skills in design, measurement, analysis and intervention planning (at multiple levels) to a broad array of public health problems.
The in-school section will be held in a designated room on a single day determined by the timeline. Students will be provided with laptops with power cords and a blank removable disk. At the end to the exam, students must bring the removable disk that contains their exam responses to the exam proctor's office. The proctor will print out a copy of the student's exam and request that the student review the work. It is imperative that students review the hard copy to be certain that all responses are complete and nothing was accidently deleted or left on the laptop hard drive. If the hard copy is complete, the student will hand it to the proctor.

The QE committee will both create the case study question(s) and evaluate student responses. As with the take-home section, the final pass/no pass result will be based on a consensus or majority vote of the committee.

**Oral Presentation & Exam**

After completing the integrative review and the case study exam, student will meet with their exam committee for a Q&A session. Students will be allowed to have a 15-minute introduction to highlight the most important points covered in their paper and case study analysis. It is important for student to remember that their committee members have read the paper and exam so a review is not necessary. Students should prepare the presentation using Power Point. After the presentation, committee members and other faculty will ask questions. It is expected that the Q&A portion of the exam will last 30 to 40 minutes.

**Examination Results**

Specific Learning Objectives for the Exam are outlined in Appendix (pp 6-7). These objectives can help students develop their exam materials in a manner that demonstrates these objectives and can help make grading more transparent. The exam committee will use the following interpretive statements for evaluating each section of the examination.

- **Pass**: Competent and sound work for a doctoral student. Work at this level shows signs of creativity, is thorough and well-reasoned, and demonstrates independent analysis, clear recognition and good understanding of the salient issues.

- **No pass**: Unacceptable work for a doctoral student; work at this level demonstrates neither a conceptual grasp of salient issues nor an aptitude for scholarly work.
The exam results with overall comments outlining strengths and weaknesses and a final pass/no pass grade will be communicated to the student after completion of his/her oral exam on the day of the oral exam. A more detailed letter may be e-mailed to the student by the chair of the exam committee as deemed necessary. If a student does not pass one or more sections of the exam, he or she may be allowed one additional attempt at the discretion of the examining committee to re-take the section(s) that not passed within one calendar year. It is expected that the student will meet with his/her faculty advisor to put together a remedial plan. This may include additional coursework, repeating courses, auditing courses, reading assigned articles and/or textbooks, or conducting independent study with faculty members. The timeline for this remedial plan should be within the Graduate School's requirement that a student should pass the QE within five years of initial enrollment in the doctoral program.

After successful completion of the qualifying process, the student will be admitted to dissertator status and concentrate on the development of the dissertation. Specific requirements, which must be completed before a doctoral student qualifies for dissertator status, are described on the Graduate School Doctoral Requirements page.

**Appealing Examination Results**

If a student wishes to appeal the results of his/her examination results, he/she must do so in writing to the program lead within 15 days of receiving results. All appeals will be discussed by all CBHP faculty and a decision will be communicated to the student within 2 weeks of receiving the appeal. Please note: if the exam is taken in December, the maximum 30 days of this process may be past the period for registering for spring semester remedial courses so it is important for students to act quickly when filing an appeal in December or January.

If students wish to see a copy of their in-school exam during their appeal process or during their remedial process, they may do so by making an appointment with his/her faculty advisor who will be given a copy and can review their responses with the student in the faculty member’s office. Students may not keep a copy of their in-school exam. It is recommended that students review their response(s) prior to retaking any portion of the QE.
The PhD Program Post-QE

Once a student has passed all sections of the QE, the student and his or her advisor will request the CBHP faculty form a dissertation committee that consists of at least 3 UWM graduate faculty including the advisor as a chair of the committee. The student must then submit an online Application for Doctoral Dissertator Status, located in the online Doctoral Milestones System (http://www.graduateschool.uwm.edu/students/current/doctoral/). Once the student has been admitted to doctoral candidacy, he or she may begin their 6 credits of Dissertation Research. Note that students cannot take regular courses after they are awarded dissertator status. They can only take research credits. Dissertators can take maximum three credits each semester and are considered full time.

CBHP Doctoral Qualifying Examination Learning Objectives

Upon completion of all the coursework, the CBHP Doctoral candidates are expected to be able to: 1) Apply social and behavioral science theories and methods to the design of public health research; 2) Utilize qualitative and quantitative data analysis methods relevant in the evaluation of public health data; and, 3) Demonstrate the capacity to communicate with students, researchers, professionals, and community members from a variety of disciplines and perspectives. In line with these general CBHP PhD program competencies, learning objectives of the exam are listed below as a guide for the students in preparation of the exam.

a. Problem Definition:
   • Critically review relevant literature on specific, selected issues and problems
   • Provide an informed and coherent rationale for focusing on selected problems/issues
   • Provide an informed and coherent rationale for selection of target populations and/or groups
   • Identify and evaluate social behavioral factors/determinants (e.g. predisposing, enabling, reinforcing factors) relevant to the selected problems/issues.
   • Identify health risk factors and disease preventive factors pertinent to the target population from the public health point of view
   • Address issues of health disparity between subpopulations and relevant to the selected problems/issues.
   • Examine and evaluate social justice issues pertinent to selected problems/issues.

b. Theory:
• Demonstrate knowledge and understanding of relevant theories of community and behavioral health
• Demonstrate ability to critically and thoroughly review and apply theories relevant to the issues of interest
• Describe a conceptual framework for understanding selected issues/problems, including the definition of major constructs
• Formulate relevant research hypotheses
• Explain how social, cultural, organizational, and institutional systems pertain to selected issues/problems

c. Methods:
  i. Study Design
    • Develop and describe an plan for testing/evaluating an intervention
    • Choose a study design and describe its feasibility, strengths and limitations in a given situation
    • Address issues related to the internal and external validity of specific study designs

  ii. Quantitative and/or Qualitative Methods:
    • Demonstrate in-depth knowledge and understanding of quantitative and/or qualitative approaches to addressing selected problems/issues.
    • Evaluate the strengths and weaknesses of quantitative and qualitative data collection methods pertaining to selected issues/problems
    • Explain why the chosen methods are appropriate; critically appraise alternative methods

  iii. Measurement Issues:
    • Describe key variables and explain how they will be measured (e.g., scale development, levels of measure, i.e., nominal, ordinal, interval, ratio, etc.)
    • Evaluate alternative measurement strategies and describe strengths and weaknesses of chosen measures
    • Address issues of the reliability, validity, sensitivity and specificity of chosen measures
    • Explain and justify data collection methods
iv. Analysis Plan:

- Evaluate analytical strategies appropriate to the study design and the characteristics of selected outcomes.
- Explain how the hypotheses will be tested using qualitative and/or quantitative analyses (appropriate to the type of variables and hypothesis)
- Demonstrate knowledge and ability to apply relevant quantitative analytical procedures
- Demonstrate knowledge and ability to apply relevant qualitative analytical procedures

d. Social Justice and Ethical/Professional Issues:

- Demonstrate in-depth understanding of ethical and social justice research issues relevant to marginalized communities
- Explore ethical issues relevant to interventions used (e.g., ignores individual or environmental influences, paternalistic, victim blaming, coercive)
- Identify and address ethical issues regarding research with human subjects
- Demonstrate an understanding of ethical and professional conduct
- Demonstrate ability to apply social justice principles to the design and implementation of research, including intervention research.
- Demonstrate the capacity to communicate with students, researchers, professionals, and community members from a variety of disciplines and perspectives.

* These are approximate dates. Exact dates will be announced two weeks before the orientation.
Dissertation
In consultation with his or her Faculty Advisor, the candidate will develop a dissertation research plan and form a dissertation advisory committee. The composition of the dissertation committee must be in compliance with the rules and regulations of the Graduate School. The candidate then submits a written dissertation plan to be reviewed and formally approved by the dissertation advisory committee. The research plan must clearly outline the student’s obligation for completing an original piece of work of sufficient quality, which is to be determined by the committee. The review and approval process will include a formal presentation to the committee.

Once the dissertation research and write up has been completed, the candidate submits the original work to the committee for review. In addition, the candidate must orally defend the dissertation document, including the research design, analysis and conclusion. The dissertation defense will be publically announced and open to the academic community. Once the defense is completed, students will be encouraged to revise their dissertation and submit it for publication.

Once the committee has formally approved the dissertation document and the oral defense, and the Chair of the CBHP Program has certified completion of all requirements, the candidate is awarded the PhD in Public Health with a Concentration in Community and Behavioral Health Promotion.
Graduation

The Graduate School administers graduation for all graduate students. To graduate in the semester you applied for, you must meet these deadlines:

1. Apply for graduation by the posted deadline for the semester in which you intend to graduate. Submit the Application for Doctoral Graduation to the Graduate School. Applications do not carry forward; you must re-apply if you did not graduate in the semester you anticipated.

2. At least two weeks before the graduation ceremony date: Hold the dissertation defense.

3. Submit your final dissertation by the posted submission deadline

Submission to the Graduate School must include:

- An electronic submission of the thesis through ProQuest ETD Administrator. More information on the submission process found on the UWM ETD Web site.
- Thesis & Dissertation Approval and Publishing Options Form with an original signature from you and your major professor.
- Complete the online Survey of Earned Doctorates

If any of these deadlines are not met, you must apply and graduate in the next semester. You will not be required to register for the next semester if the dissertation has been defended, passed, and accepted by the Graduate School before the first day of classes for the next semester. The date of graduation, however, will be the next semester.

If you want your name to appear in the commencement bulletin, be sure that your directory information with the University is not restricted. If you restricted the release of your address, phone number, and other limited information, contact the Department of Enrollment Services Information Center, Mellencamp 274. This should be done by the second week of the semester in which you expect to graduate to ensure that your name will appear in the bulletin.

Removal of the restriction will allow your directory information to be released for all publicity purposes, as well as the commencement booklet.

Graduation ceremonies are held in May and December. August graduates attend the December graduation ceremony.

About one month before graduation, all eligible degree candidates will receive a letter from the Secretary of the University’s office containing the date, location, and time of the ceremony, as
well as information on ordering caps and gowns. Any questions about the commencement ceremony should be directed to the Secretary of the University.

**Diploma**

Diplomas and a copy of an official transcript will be mailed to your address listed on PAWS approximately 8 to 10 weeks after the official degree conferral date. Your name on your diploma will be printed exactly as it exists on your university records. Changes to your name must be made in Mellencamp 274 at least one month before graduation; a fee will be assessed for name changes requested after diplomas have been ordered.

If you have a hold on your record, you must clear it before these documents will be mailed.
Section V: Policies and Procedures
Grading Procedures and Policies
Approved by Graduate Program Committee on 2/25/14

UWM uses a letter grade system that includes "plus" and "minus" grades and is based on a 4.000 scale. For convenience in computing averages, each letter grade carries a specified number of points per credit. The scale of grades and points follows:

<table>
<thead>
<tr>
<th>Grades</th>
<th>Grade Points</th>
</tr>
</thead>
<tbody>
<tr>
<td>A</td>
<td>4.000</td>
</tr>
<tr>
<td>A-</td>
<td>3.670</td>
</tr>
<tr>
<td>B+</td>
<td>3.330</td>
</tr>
<tr>
<td>B</td>
<td>3.000</td>
</tr>
<tr>
<td>B-</td>
<td>2.670</td>
</tr>
<tr>
<td>C+</td>
<td>2.330</td>
</tr>
<tr>
<td>C</td>
<td>2.000</td>
</tr>
<tr>
<td>C-</td>
<td>1.670</td>
</tr>
<tr>
<td>D+</td>
<td>1.330</td>
</tr>
<tr>
<td>D</td>
<td>1.000</td>
</tr>
<tr>
<td>D-</td>
<td>0.670</td>
</tr>
<tr>
<td>F</td>
<td>0.000</td>
</tr>
</tbody>
</table>

*Except for English 090/095, Linguistics 096, and Math 090/095. Letter grades are assigned for these courses, although they carry no degree or GPA credit.

Other Reports

CREDIT = "C-" or above in a credit/no credit course

NO CREDIT = Below "C-" in a credit/no credit course (course will not appear on your academic record)

NOT RPTD = Grade was not submitted in time to be reported

I = Incomplete (see below)

P = Progress (research and thesis course work still in progress)

S = Satisfactory (audit and zero-credit courses* only)

U = Unsatisfactory (zero-credit courses* only)

UNREC = The course will not be entered on your academic record (audit only)
Grade Point Average (GPA)

Students will take most of their course work on a graded basis. The general quality of class performance is expressed in terms of the grade point average (GPA). The number of grade points earned in a course is computed by multiplying the points for the grade by the number of credits for which the course is offered. For example, if a student earns a B in a three-credit course, he or she would earn nine grade points. GPA is calculated by dividing the total number of grade points earned by the total number of graded credits taken. The highest possible average is 4.000 or an A in every subject.

The grade point average recorded on official UWM transcript is based solely upon credits earned or attempted at UWM. UWM credits taken as audit or credit/no credit do not apply to the UWM GPA.

Grade Reports

Following the completion of a semester, students can view their grades and print a copy of the grade report via PAWS. Students can see their grades as they are posted, but complete grade reports are typically available within two weeks from the last day of final exams.

To check your grades, follow the steps below:

2. The “Student Center” page will appear.
3. Click “Grades” under the ‘Academic History’ section.
4. On 'View My Grades' page, select the term from dropdown menu and click “Change”
5. To print your grade report, click the printer friendly icon on the bottom of the page.
6. To go back to the grade report to select a different term click 'cancel' on the bottom of the printer friendly version of the grade report.

F-Grade Policy

When reporting a grade of ‘F,’ the instructor will also report a number corresponding to the student’s “week of last participation” in the course. This is the last week of the term for which there is documented evidence of the student's participation in the course.

“Documented evidence of participation” may include any work or materials received from the student, such as exams, quizzes, projects, homework, etc. Documented evidence of participation
might also take the form of an attendance roster (if attendance is taken in class), an annotation by the instructor that the student was observed attending class or otherwise participating in the course on a certain date, etc. Documented evidence of participation may not take the form of simply logging into an online class without active participation.*

The mechanism to report the week of last participation shall be that, when reporting an 'F' grade, the instructor will follow the 'F' with a numeral showing the student’s last week of participation, such as, for example, ‘F0,’ ‘F1,’ ‘F16,’ and so on, with 1 equating to the first week of the course, 2 to the second, etc. A student receiving the mark of ‘F0’ would, therefore, be one who never attended or participated, whereas a student marked ‘F16’ would have completed the entire term (assuming this was a full-term course during a 16-week semester). For a six-week summer session course, the possible marks would be ‘F0’ – ‘F6’ and so on. (See next page for a complete list of possible marks.)

On official transcripts, only the mark 'F' will be reflected. The numeral for “week of last participation” will be reflected on internal, unofficial transcripts and grade reports only.

Incomplete Policy
An Incomplete is appropriate only when the following conditions are present:

1. A student does satisfactory work in a substantial fraction of the course requirements prior to grading time and provides the instructor with evidence of potential success in completing the remaining work.
2. Extraordinary circumstances, not related to class performance, such as illness or family emergency, have prevented the student from finishing the course requirements on time. An Incomplete will not be given to enable students to do additional work to improve a grade. It is the student's responsibility to initiate a request for an Incomplete. If approved, the instructor will indicate the conditions for the removal of the Incomplete, including the dates for submitting all remaining work. The instructor may deny a request for an Incomplete and assign a letter grade based on the work completed at that point.

The student is responsible for seeing that the Incomplete is removed before the agreed deadline and that the instructor has reported the grade to the Graduate School. The instructor may change the I to a letter grade (including an F) or to a PI (Permanent Incomplete) if the student fails to meet the deadline for completion.

Permanent Incomplete
If the instructor does not change the Incomplete to a regular letter grade within one year from assigning the Incomplete grade, the Incomplete will lapse to a Permanent Incomplete (PI),
whether or not you are enrolled (A PI is not computed into the grade point average). The PI symbol subsequently cannot be changed to a regular letter grade. Except in cases where the work was completed, but the instructor neglected or was unable to file a grade change in time, the "PI" will remain on your record. If a student has received a PI and wants credit for that course, he or she must register again and complete the designated requirements. You may not register for a course for which an I remains on the transcript.

Students may graduate with a PI provided all degree requirements have been met. All Incompletes must be removed or changed to a PI before a student may graduate.

Grade Changes
Students anticipating a grade change may view their grades in PAWS daily to confirm whether or not a grade has been changed.

Only instructors assigned to teach a course may award or change grades for that course. The process is available online.

Repeat Policy
Students must earn a cumulative G.P.A. of 3.0 or better to progress. According to Graduate School policy, students may repeat a course once in which a grade of less than "B" was earned. The repeated course may be counted only once toward meeting degree requirements. Both attempts remain on the student's permanent record and both are counted in the grade point calculation.

Note that a change in the repeat policy goes into effect Academic Year 2014 – 15. Students who earned below a B- in required coursework before Fall 2014 must repeat the course in accordance with the previous repeat policy.
Course Substitution Approval Process

Approved by the Graduate Program Committee 2/10/2015

Requests for course substitution of a required class require a Course Equivalency Request Form.

Substitution of a Required/Common Core Course

The process for substituting a required/core course is as follows:

• The requesting student talks to his/her Faculty Advisor, who signs the Course Equivalency Form to recommend approval.

• Submit to Graduate Program Manager the Course Equivalency Form, signed by the Faculty Advisor, along with a course syllabus of the substituted course and a statement asking for the substitution.

• The core course instructor reviews the request. The course instructor will review the syllabus to determine if core competencies have been met. In some cases, the course instructor may choose to schedule an assessment exam with the student petitioner. The requesting student must earn an 85% or better on the exam.

• The MPH Director makes the final determination on equivalency for MPH students, and the PhD program Faculty Lead makes the final determination on equivalency for PhD students. Transfer courses are subject to Graduate School Dean approval.

Substitution of a Required or “S”elective Track Course

The process for substituting a required track course is as follows:

• The requesting student talks to his/her Faculty Advisor, who signs the Course Equivalency Form to recommend approval.

• Submit to Graduate Program Manager the Course Equivalency Form, signed by the Faculty Advisor, along with a course syllabus of the substituted course and a statement asking for the substitution.

• The designated Track Lead reviews the request.

• The MPH Director makes the final determination on equivalency for MPH students, and the PhD program Faculty Lead makes the final determination on equivalency for PhD students. Transfer courses are subject to Graduate School Dean approval.

Substitution of an Elective Course

The Faculty Advisor must approve elective substitutions in writing, copying the Graduate Program Manager, who inserts a copy into the student’s file.
Credit Transfer
Requests for transfer of courses taken outside of UWM or before matriculating into the public health degree program require the Graduate School’s Transfer Credit Evaluation Form, in addition to the Course Equivalency Request Form. The requesting student should submit the Transfer Credit Evaluation Form to the Graduate School. They first determine if transfer is possible, and then the student must follow the substitution process for the Zilber SPH to make a recommendation to the Graduate School about the transfer request.

Completion of courses in the Graduate Certificate in Public Health program does not guarantee approval of substitution or transfer into the MPH program.

The maximum number of transfer credits allowable is the higher of (a) 12 semester credits or (b) 40% of the total number of credits required for graduation. Continuing Education credits (CEU's) are not eligible for transfer.

To qualify, transferrable coursework must meet the following criteria:

- Graduate level, from an accredited institution.
- Taken within five years of admission to your UWM degree program.
- Not have been used to meet previous degree requirements.
- Grade of B or better (B- is not acceptable).
- Approved by your graduate program unit.

Transfer work may fit into any of the following four categories:

- UWM coursework taken as a Graduate Non-Degree student;
- UWM coursework taken as an Off-Campus Graduate student;
- Graduate-level coursework taken at another college or university; or
- UWM coursework taken while enrolled in a previous UWM graduate degree or certificate program.

Policy on Credit for Non-Course-Based Prior Work
The Zilber School of Public Health (Zilber School) does not permit credit for knowledge and skills obtained in past work or life experience. Zilber School does not provide opportunities to obtain credit for courses by taking an exam to demonstrate knowledge and competencies in the area, that is, there is no "testing out" of courses.

Policy on Credit Transfer (Completed Coursework)
In certain circumstances, students may obtain credit for courses that count toward required core coursework, track core, or elective courses for their Zilber School degree based on graduate
coursework previously taken at UWM or at another accredited university. The Zilber School follows the policies of the UWM Graduate School. In brief, students must apply using the Graduate Transfer Credit Evaluation Form, providing sufficient documentation on the course(s) for a determination to be made by the Graduate School with recommendations from the Zilber School of Public Health.

Zilber School students that have taken a UWM graduate course toward the Graduate Certificate in Public Health or in another course of study must complete the Graduate School’s required Transfer Credit Evaluation Form. If a course was taken prior to the course being offered by the Zilber School, beginning Fall 20II, the Zilber School Graduate Program Committee will recommend to the Graduate School that students receive transfer credits provided that the course meets all Graduate School conditions for transfer.

Equivalencies are as follows:

- Students who have previously taken NURS 727 Epidemiology will receive credit for PH 704 Principles and Methods of Epidemiology;
- Students who have previously taken CLS 590 Topics: Environmental Health will receive credit for PH 703 Environmental Health Sciences; and
- Students who have previously taken EOH 840 Topics: Perspectives on Community and Behavioral Health will receive credit for PH 706 Perspectives on Community and Behavioral Health Promotion.

Any student requesting transfer credit for these courses taken after the beginning of Fall 20II semester is also required to submit the Graduate Transfer of Credit Evaluation Form as described above, and credit transfer is not guaranteed.

The Graduate School will inform students of the final decision for transfers, and the Zilber SPH Graduate Program Manager will inform students of the final decision on course substitutions and equivalency requests other than transfer classes.
Withdrawal
Withdrawal is the formal termination of a student's complete registration in all courses for the semester. To simply stop attending classes does not constitute a withdrawal. Withdrawals are not accepted by telephone. You must fill out a withdrawal form or send a letter by certified mail to give notice to the Graduate School of the withdrawal.

The postmark date or the date the withdrawal form is received by the Graduate School becomes the effective date. This date determines the amount of fee/tuition that will be assessed. Check the UWM Web site for withdrawal deadlines and to determine the effect of withdrawal on your fees.

You may withdraw after the deadline only for reasons other than academic difficulty. You must first submit a Request for Exception to Graduate Student Services. If you request withdrawal for medical reasons, you must supply documentation from a physician.

Withdrawals will be noted on your transcript. Withdrawals after the fourth week of classes remain on your academic record with the course number and title followed by a W symbol.
Reentry
If a student returns to the public health program after an absence of two or more semesters (excluding summer and UWinteriM sessions), he or she must apply to re-enter. The following are requirements for re-entering students:

- Completion of a semester’s coursework within the past five years.
- A cumulative graduate GPA of 3.0 or higher.
- Clearance of academic and administrative holds.
- Being within the time limit for degree completion.
- Approval of the Track Lead.

A $20 processing fee is required for re-entry.
A. General Procedures

In addition to the informal monitoring of student progress provided by a student's faculty advisor and instructors, progress and development is regularly evaluated through a formal review process. For PhD and MPH students, each track's faculty will conduct two student reviews annually. The first review occurs at the end of Fall semester and is intended to make sure students are “on track” for the following semester.

The semi-annual review will be conducted in an expedited manner during a regularly scheduled track meeting in January of each year. The focus will be on conveying information about student problems and developing plans for remediation. Because discussion of individual students can be very time consuming, this meeting is best conceptualized as triage; if there is a need for a long discussion about a student, this should be handled by the faculty advisor and track lead in a separate meeting. After the mid-year review meeting, feedback to students in good standing is informally provided through the advisor. Students who are experiencing significant difficulties or who are not making sufficient progress will receive a formal letter (written by the advisor and co-signed by the designated track lead and Chair of the GPC), outlining plans for remediation and setting deadlines.

The second review, which occurs at the end of the Spring semester, is designed to provide all students with concrete feedback in a formal letter. This process occurs during a regularly scheduled track meeting in May of each academic year. Prior to the Spring annual review, students will be asked to fill out a self-evaluation progress report (see Appendix A) and to meet with their advisor to review recent accomplishments (and current problems if there are any to be addressed). In addition, specific goals and plans for the next six months will be discussed (e.g., plans for courses, research, teaching, and field work), including proposed plans for addressing problems.

Each student submits to their faculty advisor an unofficial transcript, which students can obtain via PAWS. As part of the year-end review for all students, the faculty advisor then completes a student progress summary form (Appendix B). This form will help to guide the review process. Prior to the student review meeting, each advisor shares the written summary with his or her student during a feedback meeting.
The advisor sends the completed form to the student via email, and the student has one week to review it and provide feedback. If the student agrees with the written summary, the student will co-sign Appendix B. If a student does not agree with the summary, or perceives inaccuracies in the information upon which it is based, or does not wish to comply with the recommendations/requirements of his or her advisor, he or she may append their own comments to the summary. This process is intended to ensure that communication between the faculty advisor and the student is clear and direct.

**B. Academic Action**

**Academic Probation**
Students may be placed on Probation for substandard academic performance and/or substandard professional behavior. When placed on probation, a student will be notified by the Zilber School Graduate Program Manager. If the student fails to satisfy probation’s requirements within one semester of being placed on probation, academic dismissal procedures may be initiated. For more information on probation and dismissal policies, visit [http://www.graduateschool.uwm.edu/students/prospective/areas-of-study/](http://www.graduateschool.uwm.edu/students/prospective/areas-of-study/) to review UWM’s Graduate Bulletin.

**Academic Dismissal**
Zilber School programs have the right to recommend to the UWM Graduate School that an MPH or PhD student be dismissed in accordance with UWM policies and procedures.

**C. Appeals**

See the Complaints, Grievances, and Appeals Policy.
Joint Faculty-Student Policy for Student Feedback-Request-Response Process

Overall Statement: In order for graduate level academic programs to run smoothly and effectively, there needs to be a continuous flow of feedback and response between students and faculty. The goal of this timeline and feedback loop is to ensure that exchange process. The first step is for the MPH and PhD students to meet in separate groups to compile feedback. The purpose of this meeting is to help ensure that various perspectives can be heard and that priority issues can be clearly articulated.

Note: This is not the only avenue for students to provide feedback to faculty; rather, this mechanism is intended as an alternative method that promotes transparency between faculty and students. Students are still encouraged to bring comments and issues forward to faculty advisors and other acceptable avenues in an effort to provide more immediate responses.

The second step (which include several faculty and administrative leaders) is to prepare a response to the students regarding the issues and requests made.

The third step is to conduct a town hall meeting with all students and faculty invited to discuss unresolved issues and the feedback process.

October of Each Year: Students Elect New Leadership

November of Each Year:

1. MPH Students meet as a group to compile feedback/requests to MPH Director (feedback/requests to be collated by elected or designated student representatives)
   i. Students are encouraged to meet and compile feedback individually, but students can request facilitators if needed.
2. PhD Students meet as a groups to compile feedback to be distributes to GPC Chair (feedback/requests to be collated by elected or designated student representatives)
   i. Students are encouraged to meet and compile feedback individually, but students can request facilitators if needed.

December of Each Year:

1. Programs provide response to GPC Chair (to be discussed at GPC)
2. GPC makes recommendation to tracks, MPH Director and Associate Dean
January of Each Year:
   1. MPH Director Provide Response to MPH students regarding requests
   2. GPC provides response to PhD students regarding requests

February of Each Year: Faculty/Student Town Hall Meeting to discuss Response with MPH Students and PhD Students (separately)
   The Town Hall Meeting is intended to allow faculty to share the reasoning behind decisions and actions and allow students to discuss their concerns and make suggestions regarding new and unresolved issues.
Student Complaints, Grievances, and Appeals
Approved by the Faculty Committee 2/3/2015

The University of Wisconsin-Milwaukee Zilber School of Public Health is committed to ensuring a fair and respectful process through which students can seek resolution of complaints and/or grievances involving Zilber School representatives (i.e., faculty member, faculty body, or staff member).

Non-Academic Complaints

Zilber SPH seeks to promote a supportive environment that values each member of its collective body and respects the diversity that each member brings. As such, UWM’s Zilber SPH does not tolerate harassment, intimidation, or discrimination based on race/ethnicity, sex/gender, sexual orientation, disability, religion, or other protected status designated by UWM (see UWM Discriminatory Conduct Policy #S-47, http://www4.uwm.edu/secu/docs/other/S_47.pdf)

If a student believes s/he has been the subject of discrimination, harassment, or intimidation by a Zilber SPH representative (faculty, staff, administrator), s/he may either ask the Zilber SPH representative to stop the behavior or discuss the matter with the Associate Dean of Academic Affairs, who will direct the student to appropriate resources and/or methods for resolution.

If the student’s complaint pertains to discrimination and harassment, s/he may wish to contact directly:

UWM’s Office of Equity/Diversity Services
Mitchell Hall 359
3203 N. Downer Ave.
(414) 229-5923
diverse@uwm.edu
www4.uwm.edu/eds

If a student continues to experience a nonacademic problem with Zilber SPH representative, has tried to solve it through Zilber SPH procedures, and has been unsuccessful, the student may direct his or her concern to the Office of Student Life. The staff there can help with a full array of student concerns. Student Life staff may refer students to other University offices or persons to help address nonacademic concerns or complaints.

Contact the Office of Student Life directly:
Complaints against someone other than a Zilber SPH representative: If a student believes s/he has been the subject of discrimination, harassment, or intimidation by a UWM faculty, staff or administrator other than a Zilber SPH representative, s/he should follow the same procedures laid out for complaints against Zilber SPH representatives (above).

**Academic Grievances**

If a student believes s/he has been treated unfairly by a Zilber SPH representative with regard to an academic matter (e.g., grade, evaluation, graduation decision, scholastic standing), Zilber SPH has a progressive three step grievance process: 1) Informal resolution with faculty member/body, 2) Formal grievance addressed to faculty member/body, 3) Formal grievance addressed to Hearing Committee.

1) **Informal Resolution with Faculty Member/Body**

Many issues and concerns can be addressed informally. Students may reach a satisfactory resolution by speaking directly with the responsible faculty member/body about the academic issue or concern. Ideally, the grievance process begins with a meaningful effort by the student to resolve the issue through informal discussion with the responsible faculty member or representative of the faculty body (dissertation committee, qualifying exam committee, etc.).

If the student is not satisfied with the outcome of the informal process, he or she may seek confidential guidance and consultation from the Graduate Program Manager, MPH Director, or Faculty Chair.

2) **Formal Grievance Addressed to Faculty Member/Body**

A student can initiate a Formal Grievance by submitting a written statement to the responsible faculty member/body within 30 working days of the action that prompted the appeal. The written grievance must include:

- A description of the specific nature of the issue, decision, or behavior
- The facts underlying the grievance
- All previous efforts made to address the issue
- The solution sought
The faculty member/body has 15 days to respond in writing to the student’s written grievance. The student should send a copy of the grievance to the Associate Dean of Academic Affairs.

If the student is not satisfied with the outcome of this Formal Grievance process, s/he may proceed with a Formal Grievance to the Hearing Committee within 15 days of receipt of the faculty member/body’s written response.

**Formal Grievance Addressed to Hearing Committee**

If the student is not satisfied with the outcome of the Formal Grievance Addressed to the Faculty Member/Body, the student may file a Formal Grievance with the Zilber School Graduate Program Committee within 15 working days of receipt of the faculty member/body’s written response to the grievance. The written grievance as addressed to the GPC must include:

- A description of the specific nature of the issue, decision, or behavior
- The facts underlying the grievance
- Evidence of all previous efforts made to address the issue (including the written response from the responsible faculty member/body)
- The solution sought

The GPC will formulate a Grievance Subcommittee to address the issue. If a member of the GPC is the faculty member responsible for the decision or behavior at issue, the faculty chair will appoint a faculty member to replace him or her for the hearing.

In the event that any of the members of the body hearing the Step 3 appeal were involved in rendering the Step 2 decision being appealed, they must be replaced for the purpose of hearing the Step 3 appeal. Substitute members will be chosen by the Faculty Chair. If the Graduate Program Committee’s decision or behavior is the basis for the grievance, the faculty chair should appoint an ad hoc committee to handle the appeal. The student will receive written notification of the outcome of the Step 2 appeal.

The Grievance Subcommittee has 30 days to respond with its determination in writing to the student’s written grievance.

3) If the Step 3 decision is negative, the student may, within 10 working days from the date of notification of that decision, appeal to the Dean of the Graduate School. The student must provide information on the reason for the appeal, substantial evidence in support of the appeal, and the solution sought, and send this in writing, with a copy sent to the Zilber SPH Associate Dean of Academic Affairs.
Academic grievances against a UWM faculty or staff other than a Zilber SPH representative: If a student believes s/he has been treated unfairly by someone other than a Zilber School representative with regard to an academic matter (e.g., grade, evaluation), s/he should follow steps outlined in the UWM Graduate School policy, outlined at http://www.graduateschool.uwm.edu/students/policies/appeals-and-exceptions/.
Code of Conduct

Approved by the Graduate Program Committee 11/25/2014

Preamble

The University of Wisconsin - Milwaukee Zilber School of Public Health (Zilber School) is committed to fostering integrity and ethics among all of its members: students, faculty, staff, and administrators. Such an environment is built upon the honorable and ethical conduct of all Zilber School members in all contexts - academic, research, and professional. Zilber School expects its members to value the ethical principles underlying this Code, to conduct themselves in accordance with the Code, and to take action against any suspected breach of the Code.

Values and Beliefs

As public health scholars, researchers, and practitioners and as members of the UWM community, we understand that:

1. Ethics are fundamental to all academic and professional activities.
2. Ethical behavior is crucial to maintaining the credibility and perceived value of our scholarship in the minds of our colleagues and the general public.
3. Academic and Professional Integrity means honesty concerning all aspects of public health work and studies.

Academic Conduct

Zilber School expects its members to be honest in their academic performance. Academic misconduct includes, but is not limited to, the following dishonest or inappropriate behavior:

- Cheating, including:
  1. Submitting material that is not yours as part of your course performance, such as copying from another student’s exam or allowing a student to copy from your exam
  2. Using information or devices that are not allowed by the faculty, such as using formulas or data from a computer program, or using unauthorized materials from a take-home exam
  3. Obtaining and using unauthorized material, such as a copy of an examination before it is given
  4. Fabricating information, such as data for a lab report
  5. Violating procedures prescribed to protect the integrity of an assignment, test, or other evaluation
  6. Collaborating with others on assignments without the faculty’s consent
  7. Cooperating with or helping another student to cheat
8. Other forms of dishonest behavior, such as having another person take an examination in your place, altering exam answers and requesting the exam be regarded, or communicating with any person during an exam other than the exam proctor or faculty

• Plagiarism, including:
  1. Directly quoting the works of others without using quotation marks or indented format to identify them
  2. Using sources of information (published or unpublished) without identifying them
  3. Paraphrasing materials or ideas of others without identifying sources

Allegations of academic misconduct will follow the procedures adopted by the UWM Graduate School (see, Academic Misconduct Procedures, UWM Faculty# 1686, UWS Ch. 14 at: http://www4.uwm.edu/acad_aff/policy/misconduct_flowchart.pdf).

Disciplinary actions will follow the procedures adopted by the UWM Graduate School (see, Student Academic Disciplinary Procedures, UWM Faculty# 1686, UWS, Ch. 14 at: http://www4.uwm.edu/acad_aff/policy/uws_4facdoc_1686.pdf)

Research Conduct
Zilber School expects its members to promote integrity in all research endeavors.
Research Misconduct includes, but is not limited to, the following dishonest or inappropriate behavior:

• Fabrication: Making up data or results and recording or reporting them
• Falsification: Manipulating research materials, equipment, or processes, or changing or omitting data or results such that the research is not accurately represented in the research record
• Plagiarism: The appropriation of another person’s ideas, processes, results, or words without giving appropriate credit
• Violations of requirements for the protection of human or animal subjects, including the protocols governing the use and disclosure of Protected Health Information (PHI) under the Health Insurance Portability and Accountability Act of 1996 (HIPAA).∗

1 UWM Graduate School, Academic Misconduct
http://www.graduateschool.uwm.edu/students/policies/appeals-exceptions/academic-misconduct/
2 UWM’s HIPAA Overview for Researchers at https://www4.uwm.edu/legal/hipaa/overviews/researchers/index.cfm
But does NOT include:

- Unintentional error
- Honest differences in the interpretation or judgment about data

Allegations of research misconduct will follow the policy adopted by the UWM Graduate School (see, Research Misconduct Policy, UWM Faculty #1793, at: http://www4.uwm.edu/secu/policies/saap/upload/S45-5.pdf).

Research Integrity: Students are encouraged to participate in UWM’s "Research Integrity Professional Development Series."

Professional Conduct
In addition to the academic code of conduct, public health students are expected to demonstrate a high level of professionalism and professional integrity. This includes:

- showing respect for a diversity of opinions, perspectives and culture
- maintaining honesty and integrity in all professional endeavors
- collaborating with other students and with community members when appropriate
- behaving in a respectful and considerate manner with colleagues, peers, supervisors, research participants and community collaborators.

Professional Misconduct includes, but is not limited to, the following inappropriate behavior:

- Behaving toward peers, staff, faculty, collaborators in a manner that is threatening, intimidating, harassing or overtly disrespectful.
- Violating the Federal Education Rights and Privacy Act (FERPA). This might include (1): posting education records (e.g. grades) using a student’s name, student ID number or any portion of the social security number violates FERPA; (2) leaving graded exams or papers in a public space for students to pick up.
- Violating the rights of Human Subjects. This might include: (1) disclosing of identifying information for subjects who have participated in research; (2) the improper handling of data stored on personal or UWM computers; (3) not informing the UWM IRB research activities conducted while a student at UWM. Other offenses as identified by UWM’s Dean of Student Life (see Non-Academic Review offenses at http://www4.uwm.edu/osl/dean/nonacademic.cfm).

3 UWM Graduate School, Research Misconduct
http://www.graduateschool.uwm.edu/students/conduct/research-misconduct/

4 http://graduateschool.uwm.edu/research/researcher-central/professional-development/rcr/
Professional Appearance
All public health students shall convey a positive, professional appearance as shown by their adherence of dress-code policies at their fieldwork sites and special events in order to represent the Zilber SPH and UWM in a dignified manner. Appearance includes a person’s dress, hygiene, and appropriate etiquette for the environment.
Appendix A: Student Self-Evaluation Progress Report

Appendix C: CEPH Accreditation FAQs

Is the University of Wisconsin-Milwaukee’s Zilber School of Public Health accredited?

The University of Wisconsin-Milwaukee is accredited through the Higher Learning Commission of the North Central Association of Colleges and Schools. Schools of public health and public health programs also have the option of becoming accredited through the Council on Education for Public Health (CEPH). In June 2014, the Joseph J. Zilber School of Public Health was approved as an applicant for accreditation by the Council on Education for Public Health (CEPH), an important step on the path of becoming a fully-accredited school of public health.

When will the Zilber School of Public Health become CEPH-accredited?

According to CEPH, most schools seeking accreditation for the first time take about two years to complete the self-study report from the time they become applicants. The accreditation decision usually comes within three years of the date of applicant status. The Zilber School of Public Health is on track to become accredited within the timeline recommended by CEPH.

The Zilber School of Public Health will not be CEPH accredited when I graduate. What impact will this have on job opportunities, training grants, internships/fellowships and other support?

Some employment opportunities are only open to graduates of CEPH-accredited schools and programs. There is not a comprehensive list of these employers. The same is true for internships/fellowships and training grants. Contact an employer/organization directly to learn about the policy.

Once Zilber School of Public Health is accredited by CEPH, what can I tell employers?

Accreditation is not retroactive; therefore, if you graduate before the School is accredited, you have not graduated from a CEPH-accredited school. You can tell employers that you graduated from a school that was on track for accreditation while you were a student.
What is the Association of Schools and Programs of Public Health?

The Association of Schools and Programs of Public Health (ASPPH) is a national organization representing accredited public health schools and programs. ASPPH promotes efforts to improve the public’s health through education, research, and policy.

What is the Council on Education for Public Health?

The Council on Education for Public Health (CEPH) is an independent, nonprofit organization that accredits public health schools and programs. Programs and schools awarded accreditation meet criteria established by CEPH to ensure students are prepared to work in their chosen field. Once a school or program is CEPH-accredited, it becomes a member of ASPPH.

What does it mean to be an associate member of ASPPH?

The Joseph J. Zilber School of Public Health is an associate member of ASPPH as of the summer of 2014. A school or program becomes an associate member of ASPPH after its application for accreditation is approved by CEPH.

What is the difference between a CEPH-accredited school and program?

CEPH accredits both schools of public health and Master of Public Health (MPH) programs. Schools of public health are required to offer MPH tracks in the five core areas of public health (Biostatistics, Community and Behavioral Health Promotion, Epidemiology, Environmental Health Sciences, and Public Health Policy and Administration), while programs are only required to offer a single MPH degree. In addition, schools of public health offer doctoral programs in at least three of the five core areas of public health. The Joseph J. Zilber School of Public Health is on track to become the first CEPH-accredited school of public health in the State of Wisconsin.

What is the National Board of Public Health Examiners? Will I be able to take the Certified in Public Health exam?

The National Board of Public Health Examiners offers the Certified in Public Health credential. The voluntary certification, administered in exam form, demonstrates that an individual has mastered the core competencies of public health. Individuals who graduate from an accredited school of public health, or graduate three years before the school is accredited, are eligible to take the exam.

Appendix E: Common UWM Forms and Links to Access Forms

Request for Exception Form

When a student requests an exception to any university rule, a Request for Exception form is required. The student must attach an explanation of why the exception should be granted. Access the form here:

http://www.graduateschool.uwm.edu/forms-and-downloads/students/exception-request.pdf

Registration Change Form

Classes or credits changed, added, swapped, or dropped after the published deadlines require a Registration Change Form. Use it to obtain permission to override prerequisites or closed courses, too. Access the form here:

Transfer Credit Evaluation Form

Students requesting transfer of courses must submit the Transfer Credit Evaluation Form. This form is necessary in addition to the Equivalency Form, which is an internal Zilber SPH form. Access the form here:

Links to all Graduate School forms can be found here:

http://www.graduateschool.uwm.edu/forms-and-downloads/
Appendix F: Application for Financial Support Form

For full consideration, please submit this application electronically to Darcie Warren (darcie@uwm.edu) by January 15th. Double click the grey boxes to check a box or insert text.

Resume/CV: Please submit a no-more-than-two-page resume/CV with your Education, Service, and Work Experience with particular emphasis on contributions to social and environmental justice.

Your response to the essay questions below should follow this format:
• Approximately 250-words
• Name on each page
• 12-point Times New Roman font
• Double-spaced
• One-inch margins

Essays

1. What are your career goals? Be specific in how your goals demonstrate a commitment to social and environmental justice.
2. What unique or unusual circumstances set you apart? (include if you are a low-income and/or first generation college student)
3. What are the strengths of your academic career to date?

Unofficial Transcripts

Directions for obtaining your unofficial UWM transcript from PAWS. You must have Adobe Reader. You can download this free program from www.adobe.com.

1. Go to www.paws.uwm.edu
2. Enter your ePanther username and password (your ePanther username is the first part of your UWM e-mail and the password is the same you use to access your e-mail account)
3. Click “Sign In”
4. Under “Student Center” the first box is “Academics”. In the drop down menu entitled “other academic…” select “ Transcript: View Unofficial” and click the yellow circle button marked “>>”

5. For “Transcript Type”, select “Graduate Campus Copy” and for “Output Destination Type”, select “E-mail”. Click “Submit Transcript Request”.

124
6. Go to **outlook.office365.com**
7. Enter your ePanther username and password, click “Log In”
8. A PDF copy of your unofficial transcript will be e-mailed to you. Click the e-mail and select “Download”.
Appendix G: Travel Support Request

Funding through this program is intended for students who are presenting scholarly and creative work at professional conferences and exhibitions. You will generally receive a decision on your application within ten (10) business days.
