Got Afterschool Quality? Want to Improve It?

The Afterschool Youth Development Quality Improvement Program Can Help!

Our Afterschool Youth Development Quality Improvement Program has demonstrated positive impact on the quality of afterschool programs! By combining long-term training on supervisory leadership with assessment-based onsite advising, your afterschool program can become more effective, and can improve in its YPQA, SACERS, or other assessment scores.

Program Components:

- Supervisors from 10-25 programs are formed into a Cohort
- The 20-hour Supervisor Leadership Seminar meets monthly
- Supervisor receives 3 program assessments and reports over 10-month period
- Supervisors meet at their program site bi-weekly with a Quality Advisor

How you can participate: Contact Quinn Wilder (info below) to determine how you can get started! We will place you into an upcoming Supervisor’s Cohort, customize a package of services that fit your needs, or bring you into a group of partners planning to launch a new cycle of the program.
