Course Overview

Urban Studies 150 is an interdisciplinary course that explores the intersection of multiculturalism and urban development. This course is a required course for the major in urban studies and counts toward the urban studies certificate. In this course we will examine how city building and suburbanization are linked to race, ethnicity, immigration, class, and other social attributes by drawing on a variety of case studies from several disciplines in the social sciences. We will consider how economic development, federal and local policies, urban politics, and local community actions have all served in different ways and at different times, to structure inequality and the marginalization and privilege of certain groups and communities. We will also consider the ways different groups and organizations have used urban space to construct community identities and foster movements for social change. A significant part of the course will examine how race and ethnicity have shaped patterns of segregation and economic division across the American urban landscape as well as the role of immigration and ethnic enclaves and economies in transforming urban spaces in the 20th and 21st centuries. Finally, we also consider how gender and sexual orientation have been defined and represented in urban space.

The City of Milwaukee provides an excellent opportunity to experience the cross-cultural mosaic of urban life, and to witness community relationships and social change up close, as they are made and experienced by individuals and communities. To gain competency in cross-cultural learning then, each student in the

course will be required to complete a Service Learning component. This will involve a commitment of 15-20 logged Service Learning hours (not including orientation) over the semester in a placement coordinated by the UWM Center for Community-based Learning, Leadership and Research.

Participation in a community setting will allow each student to experience directly how different social actors, communities, and neighborhoods work in different ways to define and remake the urban environment. Work in a community placement enhances understanding of the issues explored in the classroom, and our ability to put theory into practice regarding the social and cultural history of the city and its built environment.

This fall's semester course will have a particular focus on one neighborhood in Milwaukee: Washington Park. Although neighborhood boundaries are fluid, constructed entities, to give you some sense of the area we're talking about, Washington Park spans roughly from North Ave on the north, U.S. 41 (46th St.) on the west, south to Vliet and east to 35th street. Four of the service learning sites are located within the "neighborhood," and a few others are located nearby. Two service learning sites will be part of the Washington Park Collaboration and work with three other courses: (ARCH-645/845): Studies in Urban and Community Design Theory (Citizen Architect Studio, Arijit Sen, instructor) DANCE 490 - Repertory/Student Choreographer (Simone Ferro, instructor), & ART 595 - Colloquium in Print and Narrative Forms (Jessica Meuninck-Ganger, instructor). We may meet with this class a couple times over the semester, and students from this class will work with Arch 645/845 students at two of the service learning sites: Acts Housing & Amaranth Café.

Urban Studies 150 may be used to satisfy the Core Course requirement for the UWM Cultures and Communities Certificate Program. The Certificate is an opportunity to earn the equivalent of a Minor in multicultural studies and community engagement while also completing your General Education requirements. For more information visit the Program home page at www.cc.uwm.edu

Race, Ethnicity, and Diversity Credit and Social Science Credit

This course is affiliated with both Urban Studies and the Cultures and Communities programs. This is a Race, Ethnicity, and Diversity (formerly cultural diversity) and Social Science course that fulfills part of the General Education Requirements (GER). The course will address the following GER Race, Ethnicity and Diversity and Social Science learning objectives through a variety of assignments and assessments detailed below:

UW Shared Learning (SL) Goals Assessed:

- A) (3.1.3) Effective Communication Skills including listening, speaking, reading, writing, and information literacy.
- B) (3.1.4) Intercultural Knowledge and Competence including the ability to interact with and work with people from diverse backgrounds and cultures; to lead or contribute support to those who lead; and to empathize with and understand those who are different than they are.

GER Cultural Diversity (CD) Goals Assessed:

- A) (4.5.b.2) Investigate critically the social, intellectual, and political structures that support oppression based on race, ethnicity, and other human differences;
- B) (4.5.b.3) Explain fundamental episodes in the history and social construction of concepts of "race" and "ethnicity";
- C) (4.5.b.4) Reflect critically on how the students' own culture and experiences influence their knowledge of, and attitudes towards people whose cultural and social identities differ from their own.

GER Social Science (SS) Goals Assessed:

- A) (4.3.b.1) Recognize and analyze intrapersonal, interpersonal, and/or socio-cultural factors associated with individual behavior, collective action, or societal development.
- B) (4.3.b.5) Critically evaluate and apply alternative theoretical frameworks that have been used to offer meaningful explanations of social phenomena.

Race, Ethnicity & Diversity Learning Objectives	Social Science Learning Objectives
Students will be able to identify and characterize the cultural and social diversity of urban settings and communities drawn from readings in sociology, geography, history, political science, urban planning and your service learning placement.	Students will be exposed to readings drawn from the social sciences, urban history, and urban planning, which detail federal policies and local collective actions that have shaped urban and metropolitan development along lines of race, class, ethnicity, gender, and sexual orientation in the post-war period.
Students will be able to explain how patterns of urban development and change structure privilege and marginalization for different social groups as well how urban space is used to construct community identities and foster movements for social change.	Students will examine how neighborhood organizations and other community actors are presently working to address segregation and urban inequality, and to formulate urban and regional policy proposals that address these problems.
Students will gain a better understanding of how community residents experience and make sense of urban change and urban inequality as well as identify and recognize how different urban forms and functions reflect community values and communicate ideas about place and social categories.	Students will identify and assess competing theoretical frameworks related to urban development and race, ethnicity, class, and gender, to offer meaningful explanations of urban-related problems and change.
Students will be able to identify and characterize inequality, particularly racial and ethnic inequality, in the spatial and social order of an urban area, and be able to situate urban inequality in the larger context of urban development and change in the 20 th and 21 st century.	
Students will be able to describe and assess how some local actors and community organizations are addressing urban inequality from class texts and your service learning placement.	
Development of Important Skills that Apply Outside the Classroom/Transferable Skills	
Develop and refine, both in written and oral form, argumentation and analysis skills	Develop and refine presentation skills
Critical thinking and analysis skills	Problem-solving skills
Working with Groups and Collaborative Skills	

Requirements and Grades

Student performance in this class is assessed by a variety of evaluation techniques: in-class exam, written review and presentation of a reading, small group exercises, reading assignments, service learning journal entries, a final project assignment and group presentation, and overall participation in the class. Each of these assignments is aimed at developing academic skills. By the end of the course students should not only have a better knowledge of race and ethnicity and its relationship to urban development and change, but also improved their

ability to express themselves orally, and in writing, and apply their learning beyond the classroom.

I. Written Review and Presentations of a Reading (10% of Grade) Upload to D2L AND Bring 5 copies.

Each student will select **1 reading** out of a list I will provide the first week. Students will write a typed, two page review, due the week the reading is assigned. The week the reading review is due students will present their review to their group, and act as the facilitator of the discussion. I will provide a more detailed handout for how to organize your written review. These reviews should present some evaluation or assessment of the reading, identifying the significance of the topic for the concepts we have been addressing in class, and if possible, describe how the issues raised in the reading relate in some way to your service learning placement. In each review students should pose a question related to the reading/topic to be shared with their small group. During small group, the student presenting will have an opportunity to respond to other students' questions or comments about the reading. Afterward, we may have a whole class discussion in which the group facilitator will relate the group's discussion to the class as a whole. Written reviews need to be uploaded to the D2L site by 3pm on the day you present, and students should bring 5 copies to class for their group.

II. In-Class Exam (35% of grade)

There will be one in-class exam on November 10, 2016. I will provide more information about the content of the exam in the weeks prior to the exam.

III. Service Learning Project (35% of Grade)

Introduction and Objectives: One of the primary assignments for the semester is a community-based service learning project. The project is worth 150 points or 35% of your overall grade in the course. The purposes of the project are: 1) for students to learn about the ways organizations and community actors address racial and ethnic inequality, and promote neighborhood/community development and sustainable development practices; 2) to help meet the needs of agencies working to improve the lives of Milwaukee residents and their communities; 3) to more fully integrate the service learning with the course; 4) to work collaboratively with your classmates; 5) to create a document about your experience that can be shared. Students will base their final project on their 15-20 hours of service learning with a community agency. Students will do both individual and group work as part of the assignment. The group portion will involve creating a presentation about your service learning that will be presented to the class during the last period. Groups will be organized by service learning sites that are made up of 2 or 3 students. All materials except the time sheet should be uploaded to the appropriate dropbox folder on D2L.

Community Partner Service Learning Sites

Burleigh Street Community Development Organization (Sherman Park)

Groundwork Milwaukee/Milwaukee Urban Gardens (Eastside)

Silver Spring Neighborhood Center (Northwest Side)

Victory Garden (Eastside)

WasteCAP (Downtown)

Acts Housing (Washington Park) – Washington Park Collaborative

Amaranth Café (Washington Park) – Washington Park Collaborative

Our Next Generation (Washington Park)

Urban Ecology Center (Washington Park)

Assignment requirements and timeline:

(1.) SL Journaling Assignment (30 points) A total of five journal entries of at least two typed pages each are required over the duration of your service learning. These entries should correspond to different site visits and be dated. Journal entries 1-3 have due dates over the semester. Entries 4 and 5 are due when the final project is due. (see *Journal Entry Guide on D2L*)

(2) Service Learning Mapping Assignment (20 points) Students will develop a representation of their Service Learning site/area by mapping certain elements of the social and built environment. I will provide more information about this assignment later in the course. Prior to working on this assignment, everyone should read Corner's article on the "Agency of Mapping." **Due date TBD**

(3) SL Project Presentation (40 points) – Due December 8th -This is due the day each group gives their presentation to the class. Your group presentation should include multiple pages/slides (4-6), with some text and visual content (photos; video-short, less than 2 minutes; maps, other artifacts), and be visually well-designed. I will shortly provide more information on how students can create their presentation. In general, each presentation will need to include the content below:

- 1) Briefly discuss the mission/history of the organization/program where you did your service learning
- 2) Highlight the importance/significance of the organization and how it relates to the course/urban studies/topics we've covered, etc.
- 3) Provide some interview/comments from staff/clients
- 4) Provide some visual information throughout (photos, video, maps, etc.)
- 5) Discuss the nature of the project you worked on and include an edited and brief journal entry (1 or 2) from anyone in the group that is particularly interesting, relevant, provocative, etc.
- 6) **One slide devoted briefly to the #1-3 questions** that are part of the Service Learning Reflections worked out as a group. This will be different from your individual SL reflections assignment that everyone turns in.

(4) Service Learning Reflections – Due Sunday, December 11 by NOON. Each individual in the class submits their responses to the 4 questions below (typed, 5-6 pages, double-spaced): (60 points)

- (1) In what ways are your service learning and the work of the organization connected to urban/neighborhood redevelopment and the fostering of multicultural identity and community that have been addressed in class readings and discussions? Be sure to use and cite at least (3) TEXTS from class and some class lecture/discussion material to develop your response and cite your references.
- (2) In what ways are your service learning and the work of the organization addressing economic inequality, hypersegregation, and social marginalization?
- (3) To what extent are there limitations to your service learning work and the work of your organization to address structures of privilege and marginalization in Milwaukee? To what extent can local actions make a difference or do other outside factors supercede local efforts to reduce inequality (if so, discuss what they are)?
- 4) Did you learn or experience something new in the process of doing your service learning that you found to be meaningful or significant in some way. If yes, describe what you got out of the service learning experience, or alternatively, describe the ways you felt service learning did not live up to its goals (Please be aware that I am completely neutral on your response here, but I do want everyone to answer the question honestly).

(5) Completion of 15-20 hours of service learning (and submission of signed time log). Your time log should be turned-in to me in class on the day you give your presentation (Note: the site orientation does not apply to your total hours). IMPORTANT: Without this form, I cannot give you a final grade on your project-so don't lose it!** I will provide additional information about the final project, the grading rubric used, guidelines for your presentations and journal entries, and helpful suggestions.

IV. In-Class Exercises (part of class participation grade)

There will be several small group exercises in which your class participation will be graded. Typically, I will ask students to get into a small group to answer some questions about a film, discuss a reading, or complete an exercise. Afterward, we will often discuss these responses with the class as a whole. These in-class assignments will be turned in and graded. The point of these kinds of exercises is to draw on students' own experiences and knowledge and to facilitate learning in ways that are collaborative and active. Your preparation and participation are critical for these kinds of exercises to be successful. These exercises cannot be made up if you miss class.

V. Weekly Reading Assignments and Overall Class participation (20% of grade)

I will provide more information about these weekly reading assignments in class.

This class is organized around a good deal of small group work and class discussion on readings. Therefore it is extremely important that everyone come to class having read the assigned material and be prepared to participate in class discussion. If it becomes necessary, I may include some weekly quizzes on readings.

Distribution of Course Grades

- 10% Written review and group presentations of a reading
- 20% Class participation (including weekly reading assignments, in-class work and quizzes if necessary)
- 35% In-class exam
- 35% Service learning project

Final Grading Scale:

.931-1.00=A; .90-.930=A-;
.87-.899=B+; .831-.869=B; .80-.83=B-
.77-.799=C+; .731-.769=C; .70-.73=C-
.67-.699=D+; .631-.669=D; .60-.63=D-

Workload:

Credit hour policy: This 3-credit course meets for roughly 3 hours per week during the semester. Per UWM policy, students are expected to put in 7-8 additional hours per week for a 3 credit course (including studying, working on readings and assignments, and completing service learning to achieve the learning goals of this course).

Extra Credit Option

Students who attend the Urban Studies Fall Lecture in Greene Hall on Friday, Oct 28, at 2:30pm and do a one page written reaction that relates the talk/topic to a reading and/or class topic and submit to D2L within one week after event will receive extra credit. Also, students who attend the *This is Washington Park, this is Milwaukee* Play at the UWM Kennilworth Five-o-eight theatre (or Main stage) and write a one page reaction and submit to D2L within a week can also receive extra credit. I will provide more information about these upcoming events in class.

Required Texts:

All readings (book chapters and articles) are available on the course D2L site. Students should be sure to have read readings prior to class for the week they are assigned.
