

Department Analytics Dashboard

Provided by the Office of Assessment & Institutional Research (OAIR)

Description

The Department Analytics Dashboard provides summary data related to the following topics, by department: Enrollment, Retention & Graduation Rates, Student Credit Hours (SCH), DFW Rates, Completions, Faculty and Staff, and Financials. The data sources used in this dashboard are the UWM Data Warehouse and UW System tables. Additional details are provided in the "Notes" tab in the dashboard.

Users of this dashboard may be accessing FERPA-protected data and are therefore expected 1) only to access such data if they have a legitimate educational reason for doing so, and 2) to take appropriate measures to protect the confidentiality of such data, for example, redacting cell sizes less than 5 if the data will be shared outside of UWM.

Availability/Access

To help protect student privacy, this dashboard is limited to people who have existing access to [OBIEE](#). To learn more about requesting access to OBIEE, please navigate to <https://obiee.uwm.edu/access/>
