Driving Change

The goal of Driving Change is to effect genuine and lasting culture change on research university campuses so that undergraduate students from all backgrounds, particularly those who belong to historically excluded groups, will excel in STEM and graduate from college well prepared to pursue advanced degrees and eventually assume leadership roles in STEM.

Who and What

- **STEM:** Science, Technology, Engineering and Mathematics. For this HHMI study, it includes Natural Sciences, Engineering, Health Sciences, Public Health, Freshwater Sciences, Nursing, Science Education, General Studies, Data Sciences, Atmospheric Sciences, and other areas at UWM.
- For the purposes of this study, ***historically excluded groups*** includes racial, ethnic, and other underrepresented groups in the sciences, including persons with disabilities.

Your thoughts

Let us know your thoughts and suggestions at this survey:

Please respond to our survey!

Examples of questions

How do we, at UWM, handle students who express an interest in pursuing a STEM degree but might be considered "underprepared"?

A large, empty rectangular box with a thin gray border, intended for a text response to the survey question above it. The box is positioned below the question text and occupies a significant portion of the lower half of the slide.

More examples of questions on the survey

In your experience/opinion, what role does advising play in helping students to select their major?

In your experience/opinion, what factors determine if a student is *well-prepared* to pursue a STEM major?

Are students, from historically excluded groups, entering UWM *relatively well-prepared* to major in a STEM discipline? Why or why not?
