

An aerial photograph of the University of Wisconsin-Milwaukee campus and the surrounding city of Milwaukee. The image shows a dense urban landscape with numerous buildings, including several tall skyscrapers in the distance. The foreground is dominated by a large, multi-story building complex, likely the main campus. The sky is overcast with dark clouds. The text "Stellic" is overlaid in a large, bold, yellow font on the left side of the image.

Rollout: Phased and concurrent

Rollout for Registration

What it looks like?

How it functions?

What it replicates?

What's different?

Does not “generate schedules” with 867 options.

Nothing changes as far as PAWS functionality and capabilities!

Shopping cart before enrollment opens = Planner

Students can add courses to this at any time and then choose specific sections when PAWS shopping carts open.

Same scheduling tools as far as adding breaks.

Very similar searches and filters for finding classes.

Complete Registration

This pop-up
window
appears

Student can add individual courses from here if they need to, otherwise the courses in their plan will populate here and the student will select "complete registration" to finalize their selection. Depending on if the student has holds or other limits, they will get an error message if anything they are registering for isn't permitted, otherwise the registration goes through!

Stellic Degree Audits

- Degree Audits in Stellar will replace the use of the Academic Advisement Reports (AAR) in Peoplesoft to track degree progress and clear for graduation.

Used for Advisors and RO

Arts ▾ [edit](#)

- Take at least 3 credits that match the following:
 - Course with an attribute GER Arts(A)

Humanities ▾ [edit](#)

- Take at least 6 credits that match the following:
 - Course with an attribute GER Humanities(HU)

Natural Sciences ▾ [edit](#)

- Fulfill all of the following requirements
- Double counting allowed up to 1 courses within the following subrequirements unless specified otherwise

Natural Sciences Courses ▾ [edit](#)

- Take at least 6 credits that match the following:
 - Course with one of these attributes: GER Natural Science(NS); GER Natural Sci Lab/Fieldwork(NS+)

Natural Science Lab Requirement ▾ [edit](#)

- Take at least 1 course that matches the following:
 - Course with an attribute GER Natural Sci Lab/Fieldwork(NS+)

- A degree audit building team has started to meet with Stellic to build degree audits for each program at UWM (majors, minors, etc).
 - Initial audits will be built using requirements as they are presented in the Academic Catalog.
- Once degree audits are built, the audit builders will connect with the School/College/Department so they are able to review the audit.
- Once we “go live” with Stellic, additional staff will be trained to build and edit degree audits.
- Additional planning tools will be available for students to plan their degree requirements over the course of their 4 years (or time at UWM)
Students will use their planner, which connects with the degree audit, to plan their course enrollment
Enrollment will be available directly from the Planner

- Requirements will be assigned to students in different ways:
 - Universal requirements: requirements that apply to all students, or a subset of all students (example: GER requirements, Residency, or School/College requirements)
 - Program requirements: applied to students with a specific plan or sub-plan code

Number of
requirements still
needed in this
audit

Completed

Planned or
enrolled

01

General Education Requirements (Bachelors Level) ▾ ... 3 constraints

Applied Version: Draft

Oral and Written Communication Competency fulfill all 🔍 ...

✓ Part A > 3 constraints

✓ ENGLISH 102 College Writing and Research 3 CREDITS TAKEN IN SPRING '22 A

✓ Part B 1 constraint

✓ ANTHRO 424 Ethnoarchaeology and Experimental Archaeology 3 CREDITS ENROLLED FOR FALL '23

Much more user-friendly and visually appealing than the AAR

In this case, student still need 1 course in QL

Specifically QL B

Requirements can be fulfilled by a course, or we can use milestones or other indicators to meet requirements

The screenshot shows a user interface for tracking requirements. It features a sidebar on the left with a vertical line and three blue arrows pointing to specific sections. The main content area is organized into a tree structure. The top section is '01 Quantitative Literacy' with a 'fulfill all' button. It contains a checked 'Part A' with '3 constraints'. Under Part A is a checked '100-Level UWM Math Course' with '1 constraint'. Below that is a checked 'MATH 103' course entry with details: 'Contemporary Applications of Mathematics', '3 CREDITS', 'TAKEN IN SPRING '22', and a grade of 'A'. The next section is '01 Part B' with '1 constraint' and a search icon. Below Part B is a list item: 'Take at least 1 course from the following attribute: Quantitative Literacy - Part B(QLB)'. The final section is a checked 'Foreign Language' with '2 constraints'. Below it is a list of requirements: 'Fulfill any of the following requirements', 'The requirement is waived for students who have any of these tags: GERFORLANG:10, GERFORLANG:20, GERFORLANG:30, GERFORLANG:40, HSFORLANG:2 UNITS, HSFORLANG:3 UNITS, HSFORLANG:4 UNITS', and 'Other ways to complete this requirement may be available to some students'. A redacted name is followed by the text 'has the following tags: HSFORLANG:3 UNITS'.

01 Quantitative Literacy fulfill all

✓ Part A 3 constraints

✓ 100-Level UWM Math Course 1 constraint

✓ MATH 103 Contemporary Applications of Mathematics 3 CREDITS TAKEN IN SPRING '22 A

01 Part B 1 constraint Q ...

- Take at least 1 course from the following attribute: Quantitative Literacy - Part B(QLB)

✓ Foreign Language 2 constraints

- Fulfill any of the following requirements
- The requirement is waived for students who have any of these tags: GERFORLANG:10, GERFORLANG:20, GERFORLANG:30, GERFORLANG:40, HSFORLANG:2 UNITS, HSFORLANG:3 UNITS, HSFORLANG:4 UNITS
- has the following tags: HSFORLANG:3 UNITS
- Other ways to complete this requirement may be available to some students
