In **lecture** you will learn about the:
- complex interrelationships between organisms and their environment
- adaptations of individuals to deal with environmental challenges
- characteristics of populations, biotic communities, and ecosystems

**Bio Sci 310:**

**General Ecology**

Prereq – grade of C or better in Bio Sci 152 (P)

In **lab** you will learn to:
- plan and conduct ecological experiments
- analyze and interpret ecological data
- present scientific findings

310 is a required course for **Biology** majors in the EEB option, and counts as a lab course towards the major in the CMB and Flexible option.

310 is a required course for **Conservation and Environmental Science** majors.
