

Bio Sci 370: Mammalian Physiology

Do you want to know how the body works?

Here is your chance to go deeper into physiology and learn!
What does each organ system do? How does it do it??

We will study the mechanisms that keep the body in a homeostatic state:
from the chemicals, to the cells, to the tissues, to the organs, to the whole system!!

Professor: Dr. Gutzman

- TR 11:00-12:15, Lapham 250
- Prerequisite: Bio Sci 315 (cell biology) or equivalent

- Upper-level course in Physiology: Excellent option for students seeking a professional degree. Pre-med, Pre-vet, Pre-Dental

Required Text (choose 1)

- *Human Physiology: From Cells to Systems*, 9th edition, by Sherwood: ISBN: 978-1-285-86693
- ***Alternative Text Option for those planning to attend Veterinary School: *Animal physiology: From Genes to Organisms*, 2nd, by Sherwood, Klandorf and Yancey: ISBN-13: 978-0-8400-6851-1
