

International Society of Biometeorology (ISB) Call for Papers: Special Issue

Guest Editors: Drs. Daniel Vecellio and Yuliya Dzyuban

Insights from the Students & New Professionals of the ISB – 2023/24

After record SNP attendance at the 23rd International Congress of Biometeorology (May 13 – 16, 2023) in Tempe, AZ, we would proud to announce this call for manuscripts for the fourth SNP Special Issue of the International Journal of Biometeorology. This special issue would be a great opportunity for SNP members to have a chance to publish work which was presented at #ICB2023, however, any SNP member contributions will be considered. If you are interested in contributing to this special issue, please email guest editors Dr. Daniel Vecellio (dvecelli@gmu.edu) and Dr. Yuliya Dzyuban (ydzyuban@smu.edu.sg) by **September 1, 2023** with the following information: email subject of '**SNP Special Issue abstract**', provisional title for your paper, paper type, abstract (250 words), focus (e.g., plant, animal, or human biometeorology), author names, and expected submission date.

Manuscripts must be submitted by **February 1, 2024**.

Lead authors must meet SNP requirements (6 years post their terminal degree or below the age of 35, whichever comes last) and a dues-paying member of the Society. To join the SNP, please ensure that you are an ISB member (<http://www.biometeorology.org/members/>) and join the SNP commission.
