Thesis Presentation: Building Communication Bridges Between Shoreline Anglers and Policymakers

Monday, May 6th, 2024
3-4pm CT

GLRF Room 3080 and on Zoom

Join us for a presentation by Joe Bevington, Master's candidate and the Center for Water Policy's Water Policy and Science Communication Fellow at the UW-Milwaukee School of Freshwater Sciences. Discover insights from his thesis research, focusing on bridging communication gaps between shoreline anglers and policymakers. This study surveyed Milwaukee County's diverse shoreline angling community, their preferences, motivations, and sources of information, aiming to enhance their involvement in DNR policy processes. The results of this study reveal surprising findings and valuable strategies to improve communications between diverse stakeholders and natural resource policymakers.
