On The Boards
Greenfield Bower Park

The City of Greenfield, Wisconsin, is exploring programming, design, and implementation strategies for public spaces and parks. Over the past several years, CDS has collaborated with the City of Greenfield to create a master plan for the area, focusing on the creation of a green space that will provide a sense of community and a space for residents to gather.

The project includes the development of a skate park, which will attract skateboarders from around the world. The skate park will be located in the former location of The Turf, a skate park that has been a popular destination for national competitions, as well as for local skateboarders. The skate park will be designed to accommodate skateboarders of all skill levels and will feature a variety of ramps and obstacles.

In addition to the skate park, the project will include the development of a community center, which will provide a space for residents to gather, socialize, and participate in community events. The community center will feature a variety of amenities, including a gym, a library, and a multipurpose room.

The project is expected to cost $10.85 million and is scheduled to be completed in 2021. The project will be funded through a combination of federal, state, and local funding sources. The City of Greenfield is working with CDS to develop a funding strategy that will ensure the project is completed on time and on budget.

The project will have a positive impact on the community, providing a space for residents to gather, participate in community events, and improve their physical health. The skate park will attract visitors from around the world, providing a boost to the local economy.
