Instructions

As a student in the Computer Science Regylar Master's program, it is important that you have a solid foundation in Computer Science. To ensure this, you must have taken the five courses listed above (or their equivalent) before joining the program or you plan to take them during the program. Complete this form initially prior to registering for any courses, preferably with the help of your academic advisor. Fill it out again when you have taken courses or passed the sufficiency examination.

Please fill out this form electronically except for signatures, because this will make the form easier to read.

Each requirement can be met in a number of different ways:

- You have taken this course or an equivalent course with a sufficiently good grade (C or higher) to indicate mastery of the material. Check “PC” and give the required information. Non-academic courses, or audited courses, or short courses may not qualify.
- A Computer Science professor at UWM qualified to evaluate your mastery has waived the requirement for you. You may need to take one or more examinations in order to demonstrate your mastery of the subject. Check PE and list the professor and date evaluation was done.
- You can take it while in the program. For CompSci 458G, 535G, 537G and (substituting for CompSci 351) CompSt 751, you can use the courses as part of your program. Check “MT.” When you apply for graduation, we will check that you have taken and passed the course.

If your departmental admission letter mentions that you *must* take CompSci 351 or CompSci 317, then normally you should check the “Must Take” option.

Approval

Complete this form, sign it and send it to your advisor, along with a copy of all relevant transcripts. Once the advisor is satisfied, they should sign it and then send to the graduate office, typically by email to ceas-graduate@uwm.edu. The graduate office will consult with the graduate program representative (GPR) and get their approval, or refer it back to you and your advisor for correction. In any case, you will be notified of the approval decision.
