Guidelines in Developing the Program of Study

Students in the Accelerated BS/MS Program, in consultation with the major professor, must develop a proposed Program of Study (PoS) prior to the start of graduate courses. Six credits of the program are completed as part of the Bachelor’s degree. The PoS must be approved by the advisor and the Graduate Program Representative for the Computer Science MS Program and must meet the distribution requirements listed below. For subsequent changes, the student must file a revised PoS for approval. If a course has U/G status, the student must follow the syllabus and grading scale designated for graduate students to have it count toward the MS degree. A U/G course will not be counted toward the graduate degree unless it was approved as part of the MS Program of Study prior to the start of the course.

MINIMUM CREDIT REQUIREMENTS

<table>

<td><strong>Total 30 credits</strong></td>
<td></td>
</tr>
<tr>
<td>Non-Thesis</td>
<td>6 course credits completed as part of BS</td>
<td>Minimum 19 course credits at or above 700 level (including CS 704 and 1 credit of CS 700).</td>
</tr>
<tr>
<td></td>
<td>22 course credits completed after admission to graduate status</td>
<td></td>
</tr>
<tr>
<td></td>
<td>3 Capstone Project credits</td>
<td></td>
</tr>
<tr>
<td></td>
<td><strong>Total 31 credits</strong></td>
<td></td>
</tr>
</tbody>
</table>

The following is a common requirement for both options: The students must have taken six Computer Science courses (specified below) or their equivalent prior to completion of the MS Program. The six courses are:

- CS 315 Computer Organization and Assembly Language Programming
- CS 317 Discrete Information Structures
- CS 351 Data Structures and Algorithms
- CS 458 Computer Architecture
- CS 535 Data Structure and Algorithms
- CS 537 Operating Systems

A maximum of six credits of the above courses with U/G credit may be used to satisfy the courses requirements of the two options.

In the thesis option, the student must register for thesis credits (CS 990) in at least two semesters.

Graduate Program Representative for the CS MS Program
Program Description
To encourage outstanding undergraduate computer science students to continue their studies toward an advanced degree, the College of Engineering & Applied Science allows qualified students to begin their master’s degree course work in their senior year. Students admitted to the Accelerated Program take six graduate credits as part of the BS degree requirements. Once admitted to the Graduate School, students in the Accelerated Program are required to complete an additional 24 credits (Thesis Option) or 25 credits (Non-Thesis Option) to earn a Master of Science in Engineering or Master of Science in Computer Science.

The Accelerated Program offers three advantages over the standard MS Program:
1. **Less time** - total credits are reduced by six credits.
2. **Less cost** – pay undergraduate tuition instead of graduate tuition for these six credits.
3. **No GRE** – students admitted to the Accelerated Program are not required to take the GRE

Admission Requirements
- Currently enrolled in the undergraduate computer science program
- 3.2 cumulative GPA or higher
- 36 credits or less remaining for BS degree

Application Process
1. Meet with a faculty advisor in your department to develop an Accelerated BS/MS Program of Study (forms are available in EMS E386 and E379). Ideally students should meet with a faculty advisor in the 2nd semester of their Junior year and start graduate courses in their Senior year. Applicant must be admitted to the Accelerated BS/MS Program prior to the start of the final undergraduate semester.

2. Submit the proposed Accelerated BS/MS Program of Study form to the CS Graduate Program Representative (CSGPR) in room EMS E379.

3. If the Program of Study is approved, register for two graduate-level courses (six credits) in your senior year. If a course has U/G status, you must follow the syllabus and grading scale designated for graduate students.

   *Note: In order to earn graduate credit for these courses, you must receive a grade of “B” or better.*

4. At the beginning of the final undergraduate semester, you need to formally apply to the Graduate School online at [www.graduateschool.uwm.edu/](http://www.graduateschool.uwm.edu/).

Once admitted to the Accelerated BS/MS, you are required to meet the academic standards of the Graduate School which includes earning grades of “B” or better in each of the approved courses. For details on Graduate School policies and procedures go to the Graduate School website: [www.graduateschool.uwm.edu/students/policies/](http://www.graduateschool.uwm.edu/students/policies/).
