The UWM School of Freshwater Sciences is seeking highly motivated and adaptable undergraduate students to work as part time lab technicians or assistants in various capacities.

**Possible Area Vacancies**

- **Analytical Chemistry Lab**: Cleaning, prepping, and general maintenance of analytical instruments. Preparing reagents and standard solutions.

- **Research Labs**: Maintaining lab cleanliness, washing sample bottles, field equipment and glassware. Sample collection, processing, and analysis.

- **Facility Operations**: Assisting building administrators on maintenance and general upkeep. Technical support for research instrumentation.

- **Research Vessel Neeskay Deck Hand**: Assisting crew on scientific cruises, winch operation, and general ship operations.

- **Office Administration**: Answering phones, filing, package receipt, and general assistance to finance and HR team.

- **IT**: A/V support, computer maintenance, upgrades, and programming.

The number of positions filled may be limited depending on the pool of applicants and available funding.

Depending on the area of interest, students can gain experience & valuable exposure to:

- Various scientific processes including some field work, sample collection, handling, and analysis using high-tech instruments and techniques.
- Daily operational requirements of a unique, off-campus research facility.
- Working among seasoned scientists in a professional and exciting learning environment.
- Technical support of electronics and instrumentation used for field research.
- Marine operations on-board R/V Neeskay.

Employment term begins spring/summer 2019 with the possibility of extension pending satisfactory performance and funding availability. Starting pay will be determined based on experience and position interest, ranging from $12 to $14/hr.

Send resume and 3 references’ contact info to Jessie Grow at jgrow@uwm.edu

Please specify area(s) of interest upon submission.
