

# Institute for Child and Family Well-Being

Training	Overview and Objective	Facilitators	Duration	Cost
The Brain Architecture Game	<p>Evidence-informed, experiential training in which participants learn about brain development and the effect toxic stress has on the structure of the brain. Informed by the original <i>The Adverse Childhood Experiences (ACE) Study</i>, this workshop aims to inform and create an empathic experience through the use of kinesthetic, game-based learning.</p> <p>Facilitators provide opportunities to learn about the devastating and snowballing effect of ACEs on brain development, and the impact of community and caregiver protective capacities on building resilience, executive functioning, and the body's stress response.</p>	ICFW Clinicians	3 hours	<p>Individual rate: \$35</p> <p>Group rate: \$600 for group of 20–30</p> <p>Upcoming: 1/24/2019</p>
Project Connect	<p>Project Connect is an evidence-informed, innovative, group-based adaptation of Parent-Child Interaction Therapy (PCIT). Project Connect uniquely works with both the caregiver and child using a hands-on approach during which the PCIT clinician coaches the caregiver to interact with the child using play therapy skills.</p> <p>Project Connect consists of two 6-hour sessions which focus on providing caregivers with specific skills that are proven to enhance the parent-child relationship, while also strengthening behavior management skills.</p>	ICFW Clinicians	12 hours - 2 sessions of 6 hours	<p>Cost varies based on # of families</p> <p>Capacity: 8 families per session</p>
Continuous Improvement to Impact Well-Being	<p>Reducing trauma symptoms, enhancing resilience, building adult functioning, or supporting child development are central goals of many programs. Continuous Quality Improvement (CQI), informed by brain science, provides an opportunity for programs to leverage their data to impact the well-being of children, families, and communities. Continuous Improvement to Impact Well-Being reviews core CQI concepts, with real-world examples, and will provide attendees with tools and action plans to measure impact on core outcomes over time, how to identify and analyze moderating factors, tools to engage the community in your evaluation efforts, and a framework on how to use data to as one component of a systemic intervention.</p>	Gabe McGaughey and Peter Power	6 hours	<p>Individual rate: \$75</p> <p>Capacity: 30</p> <p>Upcoming: 2/13/2019 9am – 3pm</p>

The Brain Architecture Game, Project Connect and Continuous Improvement to Impact Well-Being are just a few of many trauma- and executive functioning-informed trainings and events that the Institute for Child and Family Well-Being offers. If you are interested in learning more or requesting a training, please visit our website: <https://uwm.edu/icfw/speaker/> and <https://uwm.edu/icfw/events/>.
