

School Library Media Concentration: Public Library or School Library?

School Librarianship Concentration

- Is a good match for people who have recent experience working in K-12 schools as a teacher, volunteer, aide, or librarian on a provisional license to know that the role is the right fit
- Allows for work in ALL public and private schools, as well as youth services positions in a public library
- Gives the strongest background for working with K-12 students
- Credits count towards the WI #1902 licensure and/or other states' certification requirements

Public Library Concentration

- May allow for work in some private schools
- Broader range of topics in coursework
- Keeps the door open to return in our certification-only program to complete the additional requirements to get the school library license in the future

Concentrations are transcript designated and can provide structure for utilizing 15 credits of electives in specific areas of librarianship.
