Notes:													
Index Map Sheet Number with " # " indicates Cape Horn detailed area maps													
Index Map Sheet Number with " * " indicates Coast of Brazil detailed area map													
Index Map Sheet Number with " ** " indicates earlier version available													
"Maury Sheet Number" if printed on chart, is printed usually in an upper left margin													
Bracketed "Maury Sheet Number" is a presumed number in series, but is not printed on the map or the map is not in AGSL collection; e.g. (5)													
Bracketed Lower case alpha -- e.g. (a) -- Maury Sheet Number indicates data additions or updates to earlier chart													
" Exist ? " Indicates uncertainty if map for this series at this portion of the oceans was ever released													
" Year Released " is not to be confused with date shown for supportive text supplied by M.F. Maury at time first map in a series was released													
" Last Data Point " attempts to find latest source year of the data plotted on a particular chart; release date assumed a minimum of one year later													
Where existence of map is in doubt -- a scan number has been reserved in the correct series location													
" UNLIKELY " in Notes column of table indicates map is perhaps unlikely ever made as it's area generally covers waters close-in to land													
													Scanned into AGSL system; entered in Access Data Base
													Needs further research.
