

Android Settings to Connect to the “eduroam” Option

NOTE: To complete the set-up process and connect, you must be in a building with UWM WiFi. Visit the Student Union, Golda Meir Library and other select UWM buildings. To view the [building list](#), visit UWMWiFi.uwm.edu, click on “WiFi Availability” link.

Following are the setting configurations to access eduroam on an Android device.

Step 1: From your Android device, connect to the eduroam network from the list of available networks.

Step 2: Configure the eduroam network as follows:

- **EAP Method:** PEAP
- **Phase 2 Authentication:** MSCHAPV2
- **CA Certificate:** Unspecified
- **User Certificate:** Unspecified
- **Identity:** Enter your home institution’s use name as well as your home domain in the “username field” and then the corresponding password in the “password field.”

For members of the UWM community, this will look like your e-mail address, e.g. your ePantherID@uwm.edu.

- **Anonymous Identity:** Leave blank
- **Password:** Enter the password associated with the username of your home institution.

If the above settings do not work, try selecting “Unspecified” for Phase 2 Authentication. If this does not work, please contact the vendor for assistance.

**You have now configured your device to connect to the
“eduroam” option when you enter a building with UWM WiFi.**

Questions? Problems? Contact the UWM Help Desk at 414-229-4040 or at GetTechHelp.uwm.edu

Personal device set-up assistance available Monday–Friday, 8 a.m.–5 p.m. at:

- UWM Walk-in Help Desk, Bolton 225A
