TTSTA Mission, Vision, and Elevator Speech

Mission

The Teaching Today’s Students for Tomorrow’s America (TTSTA) project offers an innovative, interprofessional, and culturally responsive approach to improving access to and quality of primary care for Milwaukee immigrants and refugee populations while educating health providers and students for collaborative practice environments.

Vision

Health equity for Milwaukee Immigrants and Refugees that transcends social determinants of health.

This can be accomplished by expanding the TTSTA community-centered health home model through interprofessional collaborative practice (IPCP) and interprofessional education (IPE) environments across sites and systems.

Elevator Speech

Hi, my name is ____. I am/was the/a ____ on a groundbreaking initiative to promote refugee-friendly health services in Milwaukee.

One goal was to develop a model of primary care across health systems and practice settings that was interprofessional and culturally responsive. Our Community-Centered Health Home reached over 800 refugees.

We called this project Teaching Today’s Students for Tomorrow’s America because it had two educational objectives. First, to educate health care workers and students
about the unique needs of refugees; and second, to teach people from different health professions how to work together.

This 3-year initiative is/was funded by HRSA, the U.S. Health Resources and Services Administration (2015 – 2018). If you have any questions, here is my contact information.

**Funding Acknowledgement:** This project was supported by the Health Resources and Services Administration (HRSA) of the U.S. Department of Health and Human Services (HHS) Nurse Education, Practice, Quality and Retention (NEPQR) Interprofessional Collaborative Practice (IPCP) and Interprofessional Education (IPE) Cooperative Agreement under grant number, UD7HP28542, for $1,337,115.
