SAFETY RULES for **MAX**[®]

OSCILLATING SPINDLE SANDER

1. **THE DESIGNED PURPOSE** of this spindle sander is to sand curved surfaces of wood, metal or plastics. Uses beyond its designed purpose may be hazardous.
2. **ALWAYS WEAR** eye protection.
3. **REMOVE** watches, rings, neckties, and roll up loose fitting sleeves.
4. **BEFORE CONNECTING YOUR MACHINE** to power make sure the machine and the power source are compatible. If you're not sure consult your dealer for further instructions.
6. **MAKE SURE** all nuts, bolts, screws and attachments are securely fastened before starting machine.
7. **TEST RUN** machine before starting any operation.
8. **HOLD** work piece firmly enough against table to compensate for both the rotation and oscillation of the spindle.
9. **WHEN SANDING** free hand (not using table) it will be necessary to hold work piece with both hands.
10. **DO NOT** attempt to place small rings to be sanded over the spindle while machine is running. stop machine again before removing sanded rings.
11. **DO NOT** attempt to sand small rings free hand, use the table.
12. **DISCONNECT** machine from power source before changing spindles, or inserts.
