

**Endorsement of the “Climate Action – Carbon & Resilience Plan”**

The UW-Milwaukee Faculty Senate endorses the “Climate Action -- Carbon & Resilience Plan” presented by the Office of Sustainability.

The Plan is a collaboration of the Office of Sustainability and a broad base of governance representatives, faculty, student, and staff subject matter experts, and the Milwaukee Metropolitan Sewerage District (MMSD).

The Plan presents critical *mitigation* and *adaptation* steps for the campus and charts a science-based and critically needed path for the University to reduce emissions, avoid the worst impacts of climate change, limit the institution’s impact on the environment, and build resilience into our community, infrastructure, and environment.
