UNDERGRADUATE MAJOR

The Urban Studies major provides the opportunity for students to explore scholarship on cities, suburban communities, and metropolitan regions with an interdisciplinary lens. Coursework in the major is drawn from the affiliated areas of Africology, Architecture, Criminal Justice Educational Policy & Community Studies, Geography, History, Public and Nonprofit Administration, Political Science, Public Health, Sociology and Urban Planning, in addition to Urban Studies. Although interdisciplinary, the discipline of Urban Studies encompasses a distinct body of knowledge, one that combines both theoretical and applied approaches to understand urban processes. The major is designed to be flexible to allow the student to develop a strong foundation from the core courses and then build a set of elective courses that address particular urban histories and problems from different disciplines, depending on student interest and future goals.

Undergraduate Major in Urban Studies (L&S/BA)
To declare a major in Urban Studies, make an appointment with the Urban Studies Associate Director to complete the declaration form.

UWinteriM Courses Offered 2018

URB STD 150*  Multicultural America

LEC 201  James Harris  ONLINE

An interdisciplinary course that explores the intersection of multiculturalism and urban development. This course is a required course for the major in urban studies and counts toward the urban studies certificate. In this course we will examine how city building and suburbanization are linked to race, ethnicity, immigration, class, and other social attributes by drawing on a variety of case studies from several disciplines in the social sciences. We will consider how economic development, federal and local policies, urban politics, and local community actions have all served in different ways and at different times, to structure inequality and the marginalization and privilege of certain groups and communities. We will also consider the ways different groups and organizations have used urban space to construct community identities and foster movements for social change.

URB STD 297/497  Study Abroad

Understanding Cuban Urbanism in Havana

LEC 101  Michael Martin  OFF CAMPUS

Designed to enroll students in UWM sponsored program before course work level, content, and credits are determined and/or in specially-prepared program course work.
What do Socialists, the Bucks, and a streetcar all have in common? Want to learn about Milwaukee’s history, neighborhoods, and politics? This course will answer these questions and others as well as highlight the multidisciplinary nature of the field of urban studies. Divided into six smaller two-week units, the course will introduce students to various (usually broad) approaches that scholars use to study the urban condition. Additionally, each of these smaller units will have readings that focus more specifically on concerns that are import or unique to the Milwaukee metropolitan area. These include, but are not limited to: the new Milwaukee Bucks arena, public transit, Milwaukee’s segregation issues, the plethora of cultural festivals, community organizations in Milwaukee, and Milwaukee’s unique political history.

As our world becomes increasingly urbanized, cities face growing social, economic, and environmental challenges that pose the questions: “what does a green city really look like?” and “for whom are they designed?” In this course, students will have the opportunity to explore conflicts of environmental social inequality in cities, including the uneven distribution of green space, gentrification, and food injustice. Looking at the topic of green cities from a critical perspective, this course will examine how neoliberal policies impact who has access to green amenities like...
parks and healthy, affordable food sources, while exploring efforts by cities to create more just, sustainable urban communities using equitable planning strategies and urban agriculture. Finally, the course will touch on our own relationships to the built and natural environments, the characteristics that we think a green city should have, and the larger meaning and significance of urban environmental sustainability.

**URB STD 377 Urbanism and Urbanization**
LEC 001 Jamie Harris R 4:30-7:10 PM

The purpose of this course is to introduce students to the process of urbanization and the nature of urban society. Students will be exposed to a variety of classic and contemporary urban theorists and different methodological approaches to the study of urban areas as they investigate a number of substantive urban topics and case studies to account for the changing social and spatial patterns of cities and metropolitan regions. By the end of the semester, students will be able to identify and explain the significance of a number of central issues facing cities today such as globalization, urban growth and decline, immigration, concentrated poverty and urban sprawl, regional governance and sustainable development, among others, and the implications of each for the urban form. This course will be taught in a seminar style with emphasis on close reading of texts, considerable discussion, and student contributions in the way of class presentations and independent research. This is a required course for urban studies majors. Notes: Sociol 377 & Urb Std 377 are jointly-offered; they count as repeats of one another. Prereq: jr st & a Sociol 100-level course; or Urb Std 250(P).
URB STD 600 Capstone Seminar in Urban Studies

SEM 001 Jamie Harris MW 12:30-1:45 PM

This course is designed to provide a capstone experience for urban studies majors in their senior year. This course will help students to develop a fuller understanding of urban studies as an interdisciplinary field, with its distinct subject areas, theoretical frameworks, and methodologies for conducting research—in short, what it means to be an urbanist. There are several goals in mind for this course: 1) to provide exposure to the field of urban studies and urban studies scholarship; 2) to develop the skills necessary to plan, conduct, and evaluate urban research; 3) to apply these skills to a relevant urban-related subject matter; 4) to present research in a scholarly forum; 5) to engage and interact with scholars; 6) and, to gain understanding of what one can do with an urban studies major. This course also fulfills the L&S research requirement. This course will be run as a seminar with close reading and discussion of several articles that relate to urban studies scholarship and the research process. There will be a number of small assignments to help students develop their final research project.

HIST 595  The Quantitative Analysis of Historical Data
(Satisfies Stats Requirement)
LEC 201  Margo Anderson  MW  2:00-3:15 PM

History 595 is a "how to" course. It teaches you how to use statistical analysis to answer historical questions. Although I do not assume that you have a knowledge of statistics or any math beyond algebra, you have to use some algebra to understand the statistics. The course also will make use of the SPSS data analysis program and a computer for computations. So you will need to understand how to use one of the programs and how to interpret the output.

*Online course available
While the questions, data, and applications we will examine will be historical, you will be able to use the skills you learn to analyze all types of quantitative questions. These skills will be important to you if you pursue graduate training in history and/or the social sciences, and be equally useful if you pursue a career in business, government, or teaching.
