UNDERGRADUATE MAJOR

The Urban Studies major provides the opportunity for students to explore scholarship on cities, suburban communities, and metropolitan regions with an interdisciplinary lens. Coursework in the major is drawn from the affiliated areas of African and African Diaspora Studies, Architecture, Criminal Justice Educational Policy & Community Studies, Geography, History, Public and Nonprofit Administration, Political Science, Public Health, Sociology and Urban Planning, in addition to Urban Studies.

Although interdisciplinary, the discipline of Urban Studies encompasses a distinct body of knowledge, one that combines both theoretical and applied approaches to understand urban processes. The major is designed to be flexible to allow the student to develop a strong foundation from the core courses and then build a set of elective courses that address particular urban histories and problems from different disciplines, depending on student interest and future goals.

Undergraduate Major in Urban Studies (L&S/BA)

To declare a major in Urban Studies, make an appointment with the Urban Studies Associate Director to complete the declaration form.

URB STD 150* Multicultural America

LEC 201

James Harris

ONLINE

An interdisciplinary course that explores the intersection of multiculturalism and urban development. This course is a required course for the major in urban studies and counts toward the urban studies certificate. In this course we will examine how city building and suburbanization are linked to race, ethnicity, immigration, class, and other social attributes by drawing on a variety of case studies from several disciplines in the social sciences. We will consider how economic development, federal and local policies, urban politics, and local community actions have all served in different ways and at different times, to structure inequality and the marginalization and privilege of certain groups and communities. We will also consider the ways different groups and organizations have used urban space to construct community identities and foster movements for social change.

Spring Semester Courses Offered 2019

URB STD 250 Exploring the Urban Environment

LEC 001 Tathagato Chakraborty TR 2:00-3:15 PM

What do Socialists, the Bucks, and a streetcar all have in common? Want to learn about Milwaukee's history, neighborhoods, and politics? This course will answer these questions and others as well as highlight the multidisciplinary nature of the field of urban studies. Divided into six smaller two-week units, the course will introduce students to various (usually broad) approaches that scholars use to study the urban condition. Additionally, each of these smaller units will have readings that focus more specifically on concerns that are important or unique to the Milwaukee metropolitan area. These include, but are not limited to: the new Milwaukee Bucks arena, public transit, Milwaukee's segregation issues, the plethora of cultural festivals, community organizations in Milwaukee, and Milwaukee's unique political history.

URB STD 360* Perspectives on the Urban Scene

Topic: "Green Cities: Urban Agriculture, Sustainability & Environmental Justice"

LEC 201 Katherine Kocisky ONLINE

As our world becomes increasingly urbanized, cities face growing social, economic, and environmental challenges that pose the questions: "what does a green city really look like?" and "for whom are they designed?" In this course, students will have the opportunity to explore conflicts of environmental social inequality in cities, including the uneven distribution of green space, gentrification, and food injustice. Looking at the topic of green cities from a critical perspective, this course will examine how neoliberal policies impact who has access to green amenities like

parks and healthy, affordable food sources, while exploring efforts by cities to create more just, sustainable urban communities using equitable planning strategies and urban agriculture. Finally, the course will touch on our own relationships to the built and natural environments, the characteristics that we think a green city should have, and the larger meaning and significance of urban environmental sustainability.

URB STD 377 Urbanism and Urbanization

LEC 001 Jamie Harris R 4:30-7:10 PM

The purpose of this course is to introduce students to the process of urbanization and the nature of urban society. Students will be exposed to a variety of classic and contemporary urban theorists and different methodological approaches to the study of urban areas as they investigate a number of substantive urban topics and case studies to account for the changing social and spatial patterns of cities and metropolitan regions. By the end of the semester, students will be able to identify and explain the significance of a number of central issues facing cities today such as globalization, urban growth and decline, immigration, concentrated poverty and urban sprawl, regional governance and sustainable development, among others, and the implications of each for the urban form. This course will be taught in a seminar style with emphasis on close reading of texts, considerable discussion, and student contributions in the way of class presentations and independent research. This is a required course for urban studies majors. Notes: Sociol 377 & Urb Std 377 are jointly-offered; they count as repeats of one another. Prereq: jr st & a Sociol 100-level course; or Urb Std 250(P).

URB STD 600 Capstone Seminar in Urban Studies

SEM 001 Jamie Harris MW 12:30-1:45 PM

This course is designed to provide a capstone experience for urban studies majors in their senior year. This course will help students to develop a fuller understanding of urban studies as an interdisciplinary field, with its distinct subject areas, theoretical frameworks, and methodologies for conducting research—in short, what it means to be an urbanist. There are several goals in mind for this course: 1) to provide exposure to the field of urban studies and urban studies scholarship; 2) to develop the skills necessary to plan, conduct, and evaluate urban research; 3) to apply these skills to a relevant urban-related subject matter; 4) to present research in a scholarly forum; 5) to engage and interact with scholars; 6) and, to gain understanding of what one can do with an urban studies major. This course also fulfills the L&S research requirement. This course will be run as a seminar with close reading and discussion of several articles that relate to urban studies scholarship and the research process. There will be a number of small assignments to help students develop their final research project.

Additional Major and Certificate

DIS 606	Mania Taher	F	12:00-12:50 PM

For centuries, civilizations have transmitted values, knowledge, and histories in the form of buildings. Hewn in timber or carved in stone, architecture is a form of storytelling by which a culture renders traditions, practices, craft and ethics in material form for future generations. Just like words in a language, buildings are organized in a grammar and syntax to form cities. Buildings express our values and they nurture traditions that we care to retain. In that way, buildings and landscapes are cultural artifacts and should be read as evidence of human histories and heritage. But it is not just that we make our physical world. The shape, layout, visual character and form of our physical world also shape

us and influence the way we act in it. Uncovering these complex layered stories is necessary and important — not merely to engage with the animated world around us in a holistic way, but also because this knowledge allows us to know how to craft new buildings and places.
