UNDERGRADUATE MAJOR

The Urban Studies major provides the opportunity for students to explore scholarship on cities, suburban communities, and metropolitan regions with an interdisciplinary lens. Coursework in the major is drawn from the affiliated areas of African and African Diaspora Studies, Architecture, Criminal Justice, Educational Policy & Community Studies, Geography, History, Public and Nonprofit Administration, Political Science, Public Health, Sociology and Urban Planning, in addition to Urban Studies. Although interdisciplinary, the discipline of Urban Studies encompasses a distinct body of knowledge, one that combines both theoretical and applied approaches to understand urban processes. The major is designed to be flexible to allow the student to develop a strong foundation from the core courses and then build a set of elective courses that address particular urban histories and problems from different disciplines, depending on student interest and future goals.

Undergraduate Major in Urban Studies (L&S/BA); To declare a major in Urban Studies, make an appointment with the Urban Studies Associate Director, Jamie Harris to complete the declaration form.

Jamie Harris, Associate Director
Urban Studies Programs, Bolton 796

Urban Studies Programs Certificate

The Urban Studies Certificate Program provides the undergraduate student with a coordinated set of courses. These courses focus on urban issues and policy alternatives examined from a variety of humanistic, social scientific, and professional perspectives. Particular emphasis is placed on the impact of gender, racial and ethnic diversity within the context of urban policy choices and delivery. This certificate will be of particular interest to those students considering careers of graduate work in urban areas and as a supplement to majors in the arts and sciences or professions.

Summer Courses Offered 2019

URB STD 150* Multicultural America
LEC 201 James Harris ONLINE

3rd – 4 week session: July 22-August 17, 2019

An interdisciplinary course that explores the intersection of multiculturalism and urban development. This course is a required course for the major in urban studies and counts toward the urban studies certificate. In this course we will examine how city building and suburbanization are linked to race, ethnicity, immigration, class, and other social attributes by drawing on a variety of case studies from several disciplines in the social sciences. We will consider how economic development, federal and local policies, urban politics, and local community actions have all served in different ways and at different times, to structure inequality and the marginalization and privilege of certain groups and communities. We will also consider the ways different groups and organizations have used urban space to construct community identities and foster movements for social change.

This Course fulfills cultural diversity requirement for degree.

**Exploring the Urban Environment**  
LEC 001  
Tathagato Chakraborty  
TR  
2:00-3:15 PM

With an increasing number of people living in urban areas around the world, cities have become the focus of academic as well personal interest. Drawing on Milwaukee and other notable cities of the United States, this course will address the transition from rural to urban society and the interconnected influence of urbanization on social, political, economic, environmental and cultural spheres of human life. We will learn how to approach the city using theories and case-studies, including a few techniques for researching the “urban”. Divided into several small units, the course will introduce students to various (usually broad, interdisciplinary) approaches that scholars use to study the urban condition. Additionally, each of these smaller units will have readings/case studies that focus more specifically on concerns that are important or unique to Milwaukee and the metropolitan region. We will also learn about the changing nature of cities in the age of globalization and the future of urbanization. Additionally, typical course work will be augmented by guest speakers and chances to participate in extracurricular activities and events, both within the department as well as the community at large.

**Topic: Green Cities: Urban Agriculture, Sustainability and Environmental Justice**

As our world becomes increasingly urbanized, cities face growing social, economic, and environmental challenges that pose the questions: “what does a green city really look like?” and “for whom are they designed?” In this course, students will have the opportunity to explore conflicts of environmental social inequality in cities, including the uneven distribution of green space, gentrification, and food injustice. Looking at the topic of green cities from a critical perspective, this course will examine how neoliberal policies impact who has access to green amenities like parks and healthy, affordable food sources, while exploring efforts by cities to create more just, sustainable urban communities using equitable planning strategies and urban agriculture. Finally, the course will touch on our own relationships to the built and natural environments, the characteristics that we think a green city should have, and the larger meaning and significance of urban environmental sustainability.
